Timestamp	Your Name (if you want, y	Viva Date	Viva Proctor ID (the id which was sent to you in	Questions asked by the Viva examiner (Write in points)	Any suggestions/tips to fellow students for this examiner?
4/23/2023 9:41:44	Jeevan Aji George		Level3 11	Project details Data structures from python - Arrays, Lists HTTP methods- GET, PUT etc. HTML - Styling	
4/23/2023 10:51:25	Aryan Pratap		Id =26 man with beard and glasses , don't know	Define ORM, Flask, types of storage, get post method, status code in terminal, routing, why different hash value ,	
4/23/2023 11:28:05	Himanshu		Level3_12	Show MVC in code. Limit the username input to less than 10. 2 layer and 3 layer protocol (client , server , server) and their combination. What is git? What is ORM? Show change in view part on hover. Which sends more data get or post? What do you mean by stateless? And something like what temples html uses (can't recall) Which is more secure http or https and why? If your database table is completed then he asks about database normalization. Minute change in code like if I add capacity of a venue as 20 it should reflect as 40. And some more questions that I don't even know what they mean . ---------- Very detailed study of your database(tables). Mostly interested in database, viva. Didn't asked much about most python (routes)	
4/23/2023 16:51:09	Griss Harris Dennis		level3_13	About Project Bootstrap Difference between list and tuple Session what is restful api Proctor asked me to create a button called reset on login page.on clicking the button after entering username and password, it deletes the username and password in the User table.	
4/23/2023 20:49:14	Sriya		3_11	Incline css update form put get post delete max no of tickest=5	
4/24/2023 13:13:26			level3_24	Template inheritance What are Javascript framework ORM and its pros and cons Libraries used in project What is Cell-spacing and Cell-padding What is version control system, another name for it? Frontend and backend validation. Which is more important? Show validation done in code Describe "User" model used and its column Explain each table in application and its purpose Diff between structured and unstructured database Diff types of testing used Diff between Python http and Flash http Types of frontend storage Can API return bool value? Why sql is so verbose?	
4/24/2023 13:55:18	Sukaniya		Level3_13	Nice proctor gave time and space to think and answer 1) Bootstrap and its uses 2) Delete all user from sqlite database - DELETE FROM USER shows error as i have foreign key constraint on it. 3) I have constraint not to have 2 users with the the same name in my code but forgot to handle it... He told me to handle then and there itself... It took some time but worked. He told me to think simple way for that. I don't know what that simple way is. 4) restful api - why you haven't used api in your application?? 5) types of constraints in sql 6) what is null and not null? 7) exception handling and it types (totally blank about arithmetic exceptions as i haven't expect these questions) 8) what is flask advantages and disadvantages 9) i have used bar chart for summary. He told me to change it pie chart. He allow me to see the documentation. It worked 10) jinja template and show that in your code	
4/27/2023 11:00:03	Shubham		Level_3_24	Show demo Show models Explain one query What is orm? Difference between authentication and authorisation? What is git versions? Ask to do some changes in css What is self padding?	
4/27/2023 12:11:13	Riya		Proctor3_24	1. If anyone use my app and got an error how would I help them 2.ORM 3. MVC 4.testing types 5.Database related questions (I forgot) 6.template inheritance 7.change background color 8.move nav bar to the footer 9. Python HTTP and flash HTTP 10. VCS and git 11.front end and back end validation, which is more important. 12. Java script framework.	
4/28/2023 13:24:38	Karthik Reddy		level3_43	demo authentication and authorization explain database schema change login form to card and align to center frontend validation and backend validation username validate (must have @,one capital letter) search functionality using venue_location and tags	
4/28/2023 14:20:30	Anurag Kumar		level3_11	1) Project Functioning in Depth; 2)Restrict the booking to 10% of the total bookings or direct to another page with an error message; 3)Change in code so that not more than 8 characters length of the password can be used for a password under user registration; 4)Difference between arrays and lists; 5)lambda function; 6)What you used in the search option in the app(post or get); 7)define the post, put, and get methods ; 8) Explain your database;	
5/7/2023 14:28:08	Sai Amrutha		Level3_25	Change login button postion to top right corner Define orm,decorator, mvc In db=sqlalchemy() is sqlalchemy() class or function? Ans is class Explain code for summary bar graph	
5/7/2023 15:02:21	Yash		level3_27	1) Authentication vs Authorization 2) Which security mechanism you have implemented 3) What is Jinja2 and where have you used it? 4) Scenarios where we receive get request for user id which does not exist 5) Some talking about Different status code 6) A lot of talking about APIs 7) He then goes through the code and ask some questions on the logic used in routes tip: make and revise APIs its not that hard and you can answer easily and get good marks :)

Timestamp	Your Name (if you want, y	Viva Date	Viva Proctor ID (the id which was sent to you in	Questions asked by the Viva examiner (Write in points)	Any suggestions/tips to fellow students for this examiner?
8/13/2023 20:41:23	Jeomon		level3_11	theroy what is difference between authentication and authorization? which all are http methods used in rest api? what is difference between put and get request? what are different types of implementations of css and which has the highest priority? explain the DB schema. show all the features that you had. programming I have the expiry date property for product in the grocery store app he wants to add custom validation stating if expiry date older than today's date show error message.....proctor was nice person he allowed me to check the datetime documentation.	
8/13/2023 22:01:16	ShubhamG		level3_11	Asked to change some things in my code as per their preference... Asked about GET and POST and what's the basic difference? Why inline CSS has more weightage than external CSS during styling? Can you use a GET request to do the same work as a POST request? Why is POST more preferable for some things than GET?	
8/30/2023 13:45:48	AM		level3_25	First asked to explain the code Asked about: decorators, orm, api, rest, GET, POST, PUT methods, rbac, What is model in db.model, logic in code for add product, HTTP, template inheritance, backref in model, Order of importance in CSS Difference between padding and cell spacing MVC-paradigm Suggested to build sales chart using Matplotlib, add more css and styling A good proctor	
8/30/2023 19:00:29	Animesh Sharma		3_25	1.Explain code 2.ORM 3.MVC 4.Structured -Unstructured Database 5.RBAC 6.Back-ref 7.Back-populate 8.Cascading rules 9.define Relationship in DB 10.explain product edit -remove code 11.client and distributed Server	
8/30/2023 21:26:40	Nishkarsh		Level3_25	What is MVC? What is ORM? What is the difference between client server and distributed server? Explain the models? What is inheritance of model? What is RBAC	
8/30/2023 21:39:32	J SAIKALYAN RAO		LEVEL3_25	go through the main code and database how did you implement databases MVC ORM GIT SND VCS APIs backref vs backpopulate some questions about the code distributed vs client-server did u use inheritance order of importance in css	
9/4/2023 7:36:54	Aditi juneja		Level3 25	Walk through your project then some questions related to things I have usedRBA{Make API calls for the API you have created Why LoginManager()? How are you hashing the passwords Inheritance DB related questions} Backref Distributed and client server ORM : adv and disadv. , where have you used it in your project Define MVC Define RBAC Difference between authentication and authorisation What is version control Types of tests, and define them Why have you used sqlite? And a few more ques that I don't remember...	
9/7/2023 13:18:59	Satyam Kuamr		vivh	jjj	
9/7/2023 19:52:28	Akhilesh Singh		level3_13	Viva finished in around 35 minutes. Proctor asked about myself. Asked what I understood from project statement. Then go through demo. I did not include search for admin. So he asked to add it. All Http requests? Response code 501? Asked to change port of flask app. Why Bootstrap?	
9/8/2023 7:42:05	Beyonce		18	Rest API/HTTP status codes/logic in building data model/change port number/build api to remove all items from cart	
9/8/2023 13:20:49	Baishali		Level_2_85	Nice proctor didn't ask many questions. Demo of the project and just explain the class model template of the project. Version control system, disadvantage of rest API , and few questions from the project	
9/9/2023 14:03:46	Bhavya Aditya		3_25	App demo Overview of the code Explain the flow of the app - basically focus on the features of the app and the corresponding routes/functions in routes.py In model.py he asked have you used inheritence anywhere, and have you defined any relationships Backref Backref vs backpopulate Explain how you are editing a product MVC ORM Client server vs distributed architecture	

Fill this sheet using this form https://forms.gle/769WTWE2NE2dPGx7A

Timestamp	Your Name (if you want, y	Viva Date	Viva Proctor ID (the id which was sent to you in	Questions asked by the Viva examiner (Write in points)	Any suggestions/tips to fellow students for this examiner?
9/9/2023 18:43:56	Rithik Agarwal		level3_13	1) Detailed walkthrough of the app, then asked if I had any additional features. 2) Asked me to create a delete button where I can select multiple products to delete from a particular section. 3) Truncate user table through db browser 4) Create a clear button in the login page upon click which the username and password will reset. 5) Explain why I have used certain codes and why was it necessary to the app. 6) What is bootstrap. 7) HTTP methods 8) Why Flask was used for the app (Advantages of using Flask) 9) Difference between lists and tuples. 10) What is mutable and immutable. 11) What is view in SQL. Chill proctor, was over in about 35 mins	
9/9/2023 21:27:14	Rushabh Shah		Level3_13_mad1_viva	Difference between list and tuple, Difference between primary key and foreign key	
9/9/2023 21:44:28				Run checksum. Demo of application Delete and edit a few things Difference between put and patch Difference between inline and internal css, which has higher priority What is lazy loading Make the app allow only unique username while registering Put restrictions on length of password and make it mandatory to have one special character in it	
9/10/2023 13:53:04	Asies		level2_85	Completed in 20 minutes App demo are you using ORM show relationships in your models what is backpopulates, backref and secondary Explain Git and VCS No code changes requested	
9/10/2023 14:07:23	Alexzendrene		Level3_11	Proceed with I'd Then hash checksum check 1.Cell spacing and cell padding 2.Db models (explain entities and referencing tables) 3.Rest APIs 4.Types of rest APIs for http 5.Made some edits in project regarding display the quantity in inventory 6. Very detailed examination for project functions each and every (most of time) Delete Edit Add Checking the warning for cart If product is not in inventory and we have added it. 7. Checked schema 8. Asked me regarding how you proceed with your models 9. Cart db model. 10. Billing summary which showed purchased products. Review :- nice and friendly proctor and finally told he has done his assessment and I have done great	
9/10/2023 16:20:48	Siddhardh Devulapalli		leve2_92	Product Detailed Demo (including CRUD, user dashboard, summary and APIs implemented) Walk through the Create and Update code for categories and products. Explain the code ORM, db models used and relationship between them backref and backpopulates Have you implemented Template Inheritance? Have you implemented Role Based access control? MVC architecture. Any other architectures you know of Horizontal and Vertical Scaling How did you implement Authentication? Explain Algorithmic Complexity (O(n) from PDSA) Proctor was friendly. Lasted about 55 minutes	
9/10/2023 20:51:36	J		3_25	*He asked me to explain some of the things in the code in detail like how is the quantity updated in the cart , how to delete a product and add a new product . *asked where metadata is in the html *orm , rbac , cascading rules , inheritance * Difference between GIT and VCS Feedback - He said that I should use matplolib and all for summary graphs . Also can use API. I should also know exactly what I have done in the code but in the end he said keep up good the work also .	
9/12/2023 12:03:47	Shriraang		level3_24	1. Introduce yourself 2. Give me Demo of your Application 3. Explain me ORM (no theoretical definitions) 4. Task 1- Change the background image and give a colour 5. Task 2: 1. Create a category hard drinks and make some alcohol available on your app 2. Create a adhaar card upload functionality only when user tries to buy an alcohol, the age of the user should be verified (24 and above) then only product should be added to cart.	
9/12/2023 18:38:38	Balram		level2_85	* Full Demonstration of the web app. * Advantages of ORM. * Expain logic behind deleting category. * Template inheritence. * (1-2 minor questions. Don't remember)	
9/13/2023 18:49:17	Divya			Questions: 1)intro about yourself 2) what is your project 3) explain project 4)in the login page create a button called which will reset the entered username and password. 5)he said he want the buttons side by side not up and down,so changed the code. 6)diff between http and HTTPS 7)diff between list and tuple 8)what is restful Api 9)what is standard port number in flask 10)can we change port number using the code.

Timestamp	Your Name (if you want, y	Viva Date	Viva Proctor ID (the id which was sent to you in	Questions asked by the Viva examiner (Write in points)	Any suggestions/tips to fellow students for this examiner?
9/15/2023 22:32:57	Msaligs			Move the header to the bottom of page. Change background color,font color. Client vs server side data validation. There is a category of tobaco product, ask the user to confirm his age is 18+ before allowing him to view tobaco product. Client side storage. What is cookie.	
9/19/2023 21:05:19	Mayank		level2_96	What is Vue Vue vs Vuex V-if vs V-show What is a Promise Fetch and Promise Var vs let cookies and JWT implementation sending data over form What is Routes and Route.js file What is redis and celery Unique key vs primary key Database model How you are exporting your venues	
9/20/2023 9:03:46	AJ		LEVEL3_12	Mostly About Database Few change in code like Length of Username Another change like If user adds item to cart stock quantity should decrease twice ORM MVC and show MVC in your code And few more questions	
10/5/2023 16:58:31	Anish		L3 12	Details of database Orm Mvc Https Http Stateless Git Username authentication Let's have a offer is going on , user cart a item and get one free Dom And some other things i can't remember	
10/5/2023 20:27:00			Level 3_13	Short introduction what you understand from the problem statement What Libraries used What is bootstrap and how did you used it implement a Bootstrap Page What are restful api difference between authentication and authorization what did you use for security and how What is mvc and show in your code what is CRUD explain your application and demo add delete functionality to delete orders	
10/5/2023 22:10:47	Bindu		Level_2_85	Demo of project Explain models Template inheritance Back populates and back ref Change in code(Flash message in login page) Proctor is good	
10/6/2023 14:37:29	Rituparno Sen		Level3_13	My viva was around 45 min The mentor first asked to give a short intro Then asked what was my understanding of the problem statement Went on to see demo Checked every functionality thouroughly Asked to make changes in my code so that one can apply a promo code or get a special discount if purchased items are above a certain threshold Asked question regarding apis ? What is rest ? Some questions related to response codes Some questions related to database Why we use sqlite? What are some differences between sqlite and MySQL etc. Overall the proctor is very patient and cool	
10/6/2023 16:36:23	Mahak		Level 3 12	Http and https Get and post Mvc in my database Orm Change in frontend for username length and subtract the quantity twice from the stock when purchasing items Detailed explanation of some routes and models Gives allot of instructions to enhance the project ....took 1.30 hrs	
10/7/2023 20:18:18	Abhijeet Singh		Level3_12	1. Http vs https 2. DOM 3. Edit code to allow only max 8 characters to be inputed 4. When user buys from cart, give him 1+1 and reduce stock accordingly 5.Asked what technology is used in html templates. Ans jinja 6. Get vs Post request 7. Session Cookies 8. Stateless vs stateful 9. Git 10. ORM 11. MVC 12. Spent 30 mins on models	
10/8/2023 7:32:16	Iqbal		Level 3_24	1. Explain the code 2.change something in the code(bg colour card colour etc) 3.java script frame work 4.ORM and explain in the code 5.cookies and session 6.few questions from database (CRUD) 7.Git and Git version	

Fill this sheet using this form https://forms.gle/769WTWE2NE2dPGx7A

Timestamp	Your Name (if you want, y	Viva Date	Viva Proctor ID (the id which was sent to you in	Questions asked by the Viva examiner (Write in points)	Any suggestions/tips to fellow students for this examiner?
10/8/2023 11:55:14			Level3_24	What is AJAX in Javascript What is Javascript framework How will u input data into the client's web browser - cookies and session variables Cell spacing and cell padding Python HTTP vs Flask HTTP methods Diff between url_for and redirect_for If u have a bug in ur app and a user reports it to you, how will u help them? Add image as bg Add image + gradient as bg Explain USER model briefly and make some changes in it such that it is reflected	
10/16/2023 15:32:16	Dhairy		Level3_13	0. tell me about yourself 1. Demo 2. Create a discount redeem form in or before checkout 3. Explain Model 4. Explain code in route.py 5. What is bootstrap, and use 6. Rest api 7. What is class in bootstrap 8. Primary key vs foreign key this is all I can recall,	
11/27/2023 19:04:42	param	11/21/2023	level3_25_MAD1_Viva	- detailed working and logic of the program files - how to center text in html - what is MVC - what are client-server and distributed architectures - how does the CRUD functionality work - questions about the views and controllers, e.g. 'explain the login flow' - relationships in databases	be completely clear on your code, and try to cover as much theory as you can, even on topics outside the syllabus
11/28/2023 21:45:04	Ponraj	11/28/2023	Level1_13	Intro yourself Show complete demo of your project Add or remove on changes (in my case ask me to change front end) Then theory question :- 1 what is rest full api 2 what is noramalization 3 differents between primary and unique key 4 what is exception and use 5 what is try and catch block.. 6 cluster in database... Then end	Be ready with your code , nothing else..
11/28/2023 21:48:20	Deepa	11/28/2023	Level3_11	1.Some code changes(mainly css change) 2.what is authentication? 3.What is authorization? 4.Cell padding, cell spacing. 5.Difference between put and post 6.Can we use put for creation ? 7.What has more preference inline cssand internal css? 8.Why incline has more preference?	Find all answers from previous year sheet and make your own version, most probably questions asked from them only
11/28/2023 22:14:03	Aditya	11/28/2023	Level 3_11	1)Explain you database 2)Name most used REST api method(PUT,POST,DELETE,GET) and explain them. 3)Difference between authentication and authorisation? 4)Cell spacing and cell padding. 5)Difference b/w PUT and POST 6)He did not made me code anthing(I feel special)	If you have time perpair everthing that you have implimented. If you don't have time book you slot and see which viva person is assigned to you(eg: level_3_11) and refer to the prviour year question accrding to the proctor.....80% Q will be same. Another advise impliment as many fetures as you can .... give the examinor no chance to pull out any mistakes.
12/9/2023 8:30:21	Saransh Saini	12/8/2023	level3_25	Went on for 55 mins 1. Complete demo 2. How is the data flow working (system architecture) 3. Swap the position of two elements on the the nav bar 4. What is MVC 5. difference between client server model and distributed architecture 6. What is the db.Model in the models you have created and why it is there 7. Then from where is the db inheriting properties. 8. Difference between cell spacing and padding 9. Explain how the controller (main.py) file is sending and receiving apis 10. What is ORM 11. What is @app.route() and what is it's need 12. Explain how my apis are working, (I opened postman and demonstrated all 4 http verbs) Overall the viva was moderate leveled, i managed to answer all instead of that distributed arch	Study about class inheritance and object oriented programming in python a bit Study about different architectures Know your code well they will ask you to change stuff All the best
12/26/2023 18:52:39	N	12/25/2023	3_24	1. changes to the template using CSS 2.making changes to navbar 3. changes to color and more 4. template inheritance 5. authorisation and authentication 6 .javascript frameworks 7. validation and more project demo with explaination	know your project
12/26/2023 19:14:27	Siddhant	12/26/2023	Level 3_11	Explain project Explain database schema What is lazy loading Difference between PATCH and PUT What is single page application Show function for a particular functionality (mine was rating of songs)	No need to get nervous with him, he’s pretty good.

Fill this sheet using this form https://forms.gle/769WTWE2NE2dPGx7A

Timestamp	Your Name (if you want, y	Viva Date	Viva Proctor ID (the id which was sent to you in	Questions asked by the Viva examiner (Write in points)	Any suggestions/tips to fellow students for this examiner?
12/27/2023 10:48:20	AK	12/27/2023	level3_13	1. intro yourself and show checksum 2. demo the app 3. demonstrate specific functionality Questions 4. make some changes (in admin page .. make a button to log into user. When i said cannot be 5. what challenges did you face in making the app? 6. why flask - benefits 7. difference between 2 tier / 3 tier apps (i spoke about client-server and MVC models) 8. explain MVC 9. show your database and what constraints are there in that. explain 10. REST APIs .. why used and advantages 11. static vs dynamic pages 12. What all types of testing you did and why? what apart from unit testing? PLEASE NOTE - questions are not provided in the order he asked. [1]	be relaxed ... know your app and why you have done things in a particular way
12/27/2023 23:05:24	Varad	12/27/2023	level3_13	1. Checksum 2. Demo 3. Change Rating from radio button to the stars, (that of Amazon like) 4. Explain Models 5. Explain Controllers 6. List and Tuple difference 7. What and Why primary keys 8. What and Why Bootstrap	If you know about your code and the things used from bootstrap or somewhere else then you are good to go.
12/28/2023 9:55:18		12/27/2023	Level2_126	Demo Template inheritance Types of software testing Why i didn't implement password hashing More questions on the app Asked to add requirement of @ symbol to username What does __name__ = __main__ do in main app file	Make sure you're ready to answer any question on why you implemented something in that particular way
12/28/2023 11:29:53	Harsh	12/25/2023	L3_13	Intro Detailed demo of proj 1. Tuple vs Dictionary 2. What is index 3. Database explanation 4. Why use Bootstrap 5. How have I implemented Security in the site 6. What is try and catch 7. Code - how to deal if user searches for * after initial text like - 'hap*'	See the previous questions sheet, GPT the answers, modify them for youself and use them.
7/27/2024 18:38:03			Level2_101	Demonstration of app Found a bug, Gave some time to clear it. I could partially do. Moved on. Asked to implement "search by username" functionality. Purpose of index, index on two columns in SQLAlchemy Prioritizing celery tasks Can we swap order of two decorators @role_required and @auth_required Can we replace primary key with unique+not null+auto increment json vs jsonify, json.dumps , websocket vs webhooks Props in Vue what are Vue routes what is Flask(__name__). Can we remove the __name__ parameter? WSGI Can we change db models when the app is in production (live). How? where did you use flask_security Gave a detailed feedback on what could be improved in the app.	
8/9/2024 10:30:32	Urjaswi Banerjee		Level 3_24	This proctor was really good.Maybe he was in a good mood lol.He asked me about 30+ questions and all were from this sheet only and at last he praised my work and asked me to rate out of 5.i said 3.But he said have a little more confidence your work should be 4.5/5.Below are some of the questions he Webhooks AJAX Router questions that I don’t remember Celery worker and beat difference What does celery worker do and how it works Cybersecurity questions like dos Priority mail,caching,orm,sql errors Asked me to code a bunch of things like changing background,colour of form,interchanging top and footer,change font size all of these will be easy if you are familiar with the html and style in your code(if you used vue cli) Lazy loading,spa,if app was responsive Bootstrap,css Frontend vs backed validation and which is more important.Overall all explain your code and project wellto proctor and be confident.and practice all questions from the sheet.Hope this helps.	
8/10/2024 10:59:51	Bharat		level2_100	What is Vue? Are you using CLI or CDN? What are webhooks? What is ORM and are you using it? What is ORM's advantage? What are Vue lifecycle hooks? What is difference between v-if and v-show? Changed the code - Add table to one page instead of Card view. Debugged the model. [2]	
8/13/2024 10:59:29	Tushar Bharti		Level2_100	Basis overview is like he will ask questions related to vue and backend , though questions are same as he asked above but still I am writing. 1. What is Props , Slot, How to pass data from child to parent 2. What is Vue Cli and vue cdn and what you have used. 3. What is Webhooks?? 4. What is Sqlalchemy?? 5. What is Difference between v-model and v-bind? 6. What is V-if and V-show? 7. What is lifecycle in vue js and explain them?? 8. What have you used for security purpose?? Flask Security or JWT?? 9 . He will ask for showing celery work. 10. He will ask a change in code type of questions and that he will ask randomly so you can't predict that (I was not able to do so I told sorry sir , I am not able to figure it out), So you can do the same if needed . Basically prepare all the questions from his side in this sheet you are good to go as he focuses majorly on vue js and backend. Overall Chill Proctor I will update my grade after I will get the results as how he penalize me for not solving code change question [3]	

Fill this sheet using this form https://forms.gle/769WTWE2NE2dPGx7A

Timestamp	Your Name (if you want, y	Viva Date	Viva Proctor ID (the id which was sent to you in	Questions asked by the Viva examiner (Write in points)	Any suggestions/tips to fellow students for this examiner?
8/16/2024 20:43:43	IA	8/10/2024	level3_25	Project demo Structured vs unstructured database Vsc vs git Url_for vs rendered_template What's db. model Explain detailed working of models Template inheritance Client server vs distributed architecture What is @app.route Backref vs backpopulate What's db.relationship What is MVC? How you login system works (logic)? Can html template handle boolean values How did u implement validation? What is ORM? Change position of submit button to the top left corner of the web page. Said I need to focus more on OOP's concepts.	Focus on all the theory questions and make sure you have all implemented all the core functionalities.
8/16/2024 22:22:00	Bhavya Patel	8/10/2024	level3_13	1) Intro, demo 2) explain your model and constraint on it Code change 3) what if hacker hacks your database? Implement password security feature 4) add delete button to remove a particular search result 5) change port to 8000 6) what change do you need to make if you want want to run your app on linux/mac 7) add constraints so that user makes strong password Theory 8) get/put/post 9) MVC 10) restful API 11) what are session and cookies 12) authentication vs authorisation. How have you implemented authorisation ?	Be ready with the theory and some core concepts like security features
8/20/2024 14:38:22	Kapil	7/10/2024	Level3_12	Viewing Models.py what is parent child relationship? ORM, Rest, mvc Different types of requests Javascript questions Is it possible to send data thru Get request?	Read the questions asked previously by the examiners.
8/20/2024 20:07:00	Rishabh Indoria	8/20/2024	level2_126	1. Downloaded the code first then gave a brief demo where he asked some details regarding f 2. Then he asked me to explain the routes and what functionality, he gave a lot of improvemen 3. I had implemented pagination, so he was impressed by that 4. Asked to create a phone number field in registration page and make appropriate changes to 5. What is load balancing? 6. What is scaling? 7. Constraint of RESTful API 8. What is CDN and how is it useful or better than writing css(bootstrap cdn) 9. Three differences between session and cookies	He is chill, you need to know what you have coded and be ready to change anything. Theory questions don't matter that much, you just need to have a basic understanding of them. Use GPT to get answers for t All the Best
8/20/2024 22:31:15	Paul Binu		lvl 2_86	chill proctor, went over library management project demo, explained vue component and backend route, showed backend jobs what is vue, why do we use vue what are the different lifecycle hooks in vue whats the advantages of using relational databases what is API all over in 20 mins (no coding changes asked)	
8/20/2024 22:47:25	Soham	8/20/2024	Level3_12	MVC,ORM,DOM Get/post Template inheritance Js tags Html ids and classes Differentiate between id and name attributes in form Diffn types of css Order of inline,external,internal How to call and handle JS function using ids Best of http and HTTPS n fullform Client server vs distributed architecture What is Git n its uses How does the network security work between client and server Explain the process	Pray to God or Study(focus on Google sheets questions)
8/21/2024 10:59:59	Jatin bhardwaj	8/21/2024	Level2_144	Explain your directory Exp whole models and routes Demonstration What is url_for Can you change the url_ for ,so it can through error Change the url_for so it take route name to connect Change the background to image Technical questions What is flask What is SQL What is structured and unstructured db,examples Http protocols Put,post,patch	
8/21/2024 12:12:53		8/21/2024	level2_116_MAD1_Viva	Apart from the topics already in the list[i.e. MVC, ORM, API routes, etc.], I was asked the following: 1. What if a hacker tries using SQL injections in the flask forms? 2. CSRF 3. If I change the url_for(home) to home_page, what will happen? Ans: url_for looks for function name not the route and if there are two routes with the same name, it will find the first one 4. Cascade delete in db 5. What if I login, then close the tab and reopen it? Will I still be logged in?	
8/21/2024 12:22:46	Ripunjay Kumar	8/21/2024	Level3_13	1. REST Api 2. Get Vs Put 3. Asked me to implement search functionality(So I should be able to search edu1 edu2 edu3 p 4. Explain database (Aisa explain Kiya ki unhe question kme ka mauka hi nhi mila)	Bs ye gform question sb pdh lo aur apne code ke bare mai pta hona chahiye
8/21/2024 15:06:12		8/21/2024	level3_11_MAD1_Viva	1)show your project 2)what is put post 3)show edit functionality code what you have used there put or post 4)explain your models 5)primary key and foriegn key 6)Like AND unlike operator 7)diffrenece between Authorization and authentication 8)Inline CSS and Internal CSS	just know your code and it is fine learn the procotor specific theory

Timestamp	Your Name (if you want, y	Viva Date	Viva Proctor ID (the id which was sent to you in	Questions asked by the Viva examiner (Write in points)	Any suggestions/tips to fellow students for this examiner?
8/21/2024 18:07:12	Harsh	8/21/2024	Level3_149	Introduction 1. What and why coded a particular thing? 2. Advantages/Disadvantages of SQLite 3. Database Models and My ER Diagram 4. Scaling and types 5. CSS and its types and its priority order 6. DOM 7. APIs and RESTful (10 min discussion and each detail within) 8. ORM 9. Changes in Code (fix an alignment of title) 10. was asked to Create and update a campaign 11. How is a new request being created.	My examiner was chill, he helped out if I got stuck.
8/21/2024 18:59:33		8/21/2024	level3_49	- Explain project directory structure and architecture - Show project demo - What's DOM? - Css types and precedence - external, internal and inline - What's rest api and any alternatives? (graphql) - based on previous question advantages if used graphql - Sqlite pros and cons over alternatives - Lazy loading in Sqlalchemy (I have used it that's why he asked) - Is my database schema normalized and how? - explain normalization - implement feature to only allow one ad request for an influencer in a campaign - center a text and div on a page - anything you wanted to implement but you couldn't while submitting (I answered filters and se - based on previous question, how would you implement that first using js only and secondly us	Be relaxed, they ask only standard questions mostly and some based on your responses and things you have shown in the code. So, understand your codebase.
8/21/2024 23:26:50		8/21/2024	level3_49	-Demonstrate the application -Show the code -Minor adjustments to styling of the html page -What is authentication and authorisation -Explain about different types of testing -Template inheritance -Pros and cons of using sqlite3 database -Show the APIs -What is API? What is REST API -How would you have improved your project if you had more time	practice the theory well
8/22/2024 11:08:56	sahs	8/22/2024	level2_116_MAD1_Viva	1. What is ORM? 2. Explain HTTP methods used: I used mainly to get and post. But still, you are required to exp 3. Asked to change my frontend logic a bit. 4. What is a decorator? 5. Template inheritance.	The examiner is chill, so you don't have to get nervous around him. But he asks all around DBMS, Python, MAD 1. So better prepare well.
8/22/2024 13:18:34	Vaishnavi	8/22/2024	level3_25	THEORY: 1. Git vs vcs 2. client vs distributed architecture 3. MVC Paradigm 4. logic for influencer negotiation 5. logic for adding campaign 6. ORM 7. sqlalchemy is class or fn 8. what is db.Model 9. what is app.py, models.py , functions.py 10. get vs post 11. structured vs unstructured db CHANGES: asked me to shift the signup option to the rightmost corner of the page	Knoe your project well and also prepare from this sheet
8/22/2024 16:54:45	Adarsh Pradhan		Level3_24	Questions were same as mentioned by others. Proctor was good. He just didn't waste any time, and asked point to point questions. Was understanding when some genuine issues occurred. Nothing negative like what some other people have mentioned here. Just be ready to explain your code, and how to make changes when asked.	
8/22/2024 21:06:05	sharda	8/22/2024	level2_126	1. why do we use backref 2. he made me do password hashing 3. he made me change the background color of the login page 4. what is load balancing 5 two difference between session and cookies 6. what is MVC paradigm 7. is it necessary for a foreign key to be unique? 8. how did you implement search functionality. have you used filter method or the search metha 8. why do we used CDN? 9. what is template inheritance	he is very helpful. he might ask why have you used what have you used, how you could have done it the other way. be ready to implement a few recommended functionalities, like password hashing and basic C
8/23/2024 1:14:39		8/22/2024	Level 3_11_MAD1	1) show your project. 2) sir gave some of his own opinions on my UX design but did not ask me to change anything i 3) explained db models that I created. 4) what is authentication and authorisation ? 5) what is SPA ? 6) what is lazy loading? 7) what is inline and internal css and what's the advantage of using internal css ?	Read the Google sheet questions well. Baki bhagwan bharose
8/23/2024 9:21:15		8/22/2024	level_3_12	1) MVC | ORM | DOM 2) Restrict the full name to 10 characters. If the character count exceeds this limit, a warning sh 3) Show the database. 4) What is the meaning of public and private campaigns? 5) Store the full name in all capital letters. 6) What are the types of CSS, and what is their precedence? 7) How do we get an element of a particular ID or class in CSS? 8) What attribute do we use to start CSS in inline, internal, or external CSS? 9) What symbol is used before ID and class in CSS? 10) What is Git? 11) Is Git centralized or distributed? 12) What other functions does Git have apart from tracking? 13) What are GET and POST, and what are their differences? 14) Can we submit data using GET? 15) Which one is more secure: HTTP or HTTPS? 16) What security measures does HTTPS use to ensure security? 17) What technology is used for templating? 18) What is template inheritance, and why is it used? 19) Are class inheritance and template inheritance the same? 20) What are sessions and cookies, and where are they stored?	Be very calm and practice all the theory questions from this Excel sheet. The examiner will throw questions at you one after the other. He will try his best to confuse you. Be very clear and firm in your answers. H

Timestamp	Your Name (if you want, y	Viva Date	Viva Proctor ID (the id which was sent to you in	Questions asked by the Viva examiner (Write in points)	Any suggestions/tips to fellow students for this examiner?
8/23/2024 10:48:30	Amit		Level3_43	Proctor Behaviour: Cool, Calm , talks softly Demo of the whole app first. Questions: What architecture are you using? What is MVC? How did you implement it? (Explain the code) Explain the Database Schema. What did you use for frontend? What did you use for styling? What are CSS selectors? Name them Is your app token based or Session based? Why token based over session based? What are you using for authentication? (JWT) Explain the working of JWT in your code. What is the difference between Authentication and Authorisation. Is Admin authorised or authenticated? What is a Component? Is your code responsive? How is it responsive? Can you make it responsive without using CSS? What is template inheritance? How did you implement the search function? If you had to implement search suggestions in your code, what would be your approach? Code Changes: The Username and Password field in my Login page, he asked me to shift them to the exact centre of page.	
8/23/2024 23:21:18		8/23/2024	level3_24	level3_24 experience i demonstrated the project in depth and he had joined the meeting 10 minutes before the time. he asked me to make changes in css like change background-color of specific objects then he asked theory questions like name some js frameworks, what is ajax , can flask endpoir i was only able to answer a few of them . and atlast he asked me to rate my project. overall good but i lacked in the theory part	Prepare theory well and be well versed with project. You should be able to manipulate css (background-color)
8/24/2024 12:35:20		8/23/2024	Level3_12	What is mvc, show which part of your code comes under model, and which one comes under c orm, template inheritance, where template inheritance is used in your code. What are the advantages of using template inheritance. What is restful API. What is class and what is object. css, types of css, css precedence. Which symbols are used for id and class in css. Where we should use id and where we should What are the benefits of using bootstrap. Can we use get to make changes Difference between get and post Which templating system is used in your code. Which is more secure? Http or https and why ? Define your database. How you connect your database to your code. What is git and git is distributed or client server? What is public or private campaign in your application. Somes questions from javascript which I didn't know. It was something about class in javascrip In many applications we see that if we login then we can perform tasks and have access for a l Change the backend such that the username of user is added in the uppercase only even if the Change the frontend such that users can only enter 10 letters as Username. Change the color of navbar. He also asked me to perform some basic operations like creating campaigns, editing and delet Signup as sponsor and send ad_request. Signup as influencer and perform some basic operations. Explain your code. And many more questions were asked.	Try your best to answer the questions. Complete all the theory part and all the very best.
8/24/2024 19:29:30	Prabhu	8/24/2024	level3_12	Short Intro Asked to register a new sponsor and create 3 campaigns, then register a new influencer Demonstrated the CRUD operation on campaigns, Ad requests functionality Q) What is MVC concept? Show the MVC implementation in the code Q) What database system is used in the application? Q) What library is being used to connect the database with the application? Q) What is ORM? Explain the model and it's purpose How was database structure created? Show the code part where DB is created Q) What technology is used behind templating in flask? Q) What is template inheritance? Q) Difference between ID and name attributes in HTML form Q) Difference between GET and POST request methods Q) Is it possible to send data/information from the client side through GET? Q) How is data sent to specific controller when user submits the form? {method and action} Code changes: Make change in backend code such that title of the newly created campaign is stored in all cap Make changes in front-end code for form validation such that username is limited to 10 charact Q) Which protocol is more secure? HTTP or HTTPS Q) Technology used in HTTPS to make is secure Q) Explain HTTP stateless protocol Q) Explain session Q) What is DOM? Explain it's working Q) Where is DOM effective? Client side or server side Q) Which programming language can manipulate the DOM dynamically? Q) How to target specific ID of HTML in JavaScript? {document.getElementById} Q) Why we use version control software like Git? Other functionalities of Git Q) Is Git distributed? Q) Explain 3 ways CSS can be implemented and their precedence Q) What special character is used to refer class and Id in CSS? {'.' for class and '#' for ID}	The presentation, questions and code changes happen in one continuous flow. Especially viva with this proctor will be like rapid-fire round, but he's calm, will provide suggestions and will correct you at times. Stay calm, be clear with the theory concepts and answer confidently. All the Best!!
8/24/2024 19:42:47	Karthik Reddy		level2_86	Very good proctor Asked Demo of the app Show models and explain why you are using fs_uniquifier How RBAC implemented Explain redis and how you implemented Explain celery and how you implemented caching Explain props in vue Different Lifecycle hooks in vue show job Scheduling report no code changes were asked

Timestamp	Your Name (if you want, y	Viva Date	Viva Proctor ID (the id which was sent to you in	Questions asked by the Viva examiner (Write in points)	Any suggestions/tips to fellow students for this examiner?
8/24/2024 20:23:18		8/24/2024	Level3_13	1) Restful API 2) List vs Tuple 3) What is Dictionary 4) Code change to implement user login from single page 5) Explain Database and relations 6) Primary key, Unique Key 7) http vs https 8) session vs cookies 9) authentication vs authorisation	Explain your database and make your demo in an efficient manner. if you take more time for any code change demo that he asks you to do, u can reduce the theory questions ;)
8/24/2024 21:45:10		8/24/2024	level3_12	1. MVC 2. ORM 3. GET vs POST 4. Can GET be used to send info 5. DOM is used in client side or server 6. HTTP vs HTTPS 7. Git VSC client server or distributed and why 8. How to access id in Javascript (something like that) 9. name vs id in form 10. template inheritance and what keyword it uses 11. how login info is stored: Session Management 12. explain one of the controllers route 13. change backend to make title Upper case 14. change frontend to username<10 letters	Read these questions mentioned in the doc
8/24/2024 23:07:31	Lokabhiram Chintada	8/24/2024	Level3_13	1. Into and Demo 2. Code changes (change password constraint such that password should be in between 8 an 3. About model and ERD Diagram 4. What is MVC 5. What is RESTful API 6. Difference between list and tuple 7. Difference between GET and PUT 8. What is primary key 9. Difference between unique key and primary key 10. What did you learn from this project	He is super cool . Prepare all the questions in this response sheet.
8/25/2024 12:17:31	Shreya	8/11/2024	level2_126	1. Demonstrate the application 2. Implement password hashing (with the help of internet if you want) 3. Explain the controller.py file, models.py 4. What is cascade in the models file and why backref is used, and the relationship among the 5. What is load balancing 6. What is MVC architecture 7. What are the constraints to Restful APIs 8. Three differences between sessions and cookies. 9. Change the background color of login page. 10. What is template inheritance.	Just be clear with your code! The proctor was really nice.
8/25/2024 18:58:05	Ranjit Sharma		Level2_144	Viva Lvl2 proctor 2_144 5-6pm Asked for Id Download submission from portal explain me the directory structure of ur app which version of vue r u using 2 or 3? Difference between vue cli and cdn? Why u have used cdn? Show me where u have used it (in index.html) How many vue files u have in total? Open and explain any 1 of them explain models.py difference between back_populates and backref explain RBAC in ur app how role_required decorator is working what is cache? schedule the time in celery to send monthly report and daily reminder at 5:20pm what is v-if and v-show what is axios? have u used it? (I said no and he asked me to show normal fetch api calls) what will happen if backend sends a 400 http code response, how ur frontend will catch that status code? give short demo how many types of storage are there in browser? where redis store its cache? what u know about vuex store? what are state, mutation and actions? what is the use of actions? how r u rendering charts in ur app? (i was using chart js) change the bars in chartjs to take only 2 colors I find proctor neither rude nor friendly he ask ques mainly from project 80% from proj and 20% from theory (atleast in my case) viva took 1hr overall good experience	
8/26/2024 16:14:06	chirantan dey	8/26/2024	level3_12	-all viva questions and code changes mentioned in grp pdf -prepare all of them thoroughly, practice the code changes beforehand -He will focus on models.py very much -keep your calm, he will always hurry you, you will have to deal with that hurry, sudden code ex -he might let you not to speak much about your approach, if we reprimands you just agree with it	it was hurried but ok, if you are prepared well beforhand you can keep your calm
8/26/2024 16:19:49		8/26/2024	2_145	- constraints on password so that it has one uppercase letter, one lowercase and one number - display total number of requests related to a specific campaign using jinja templates - explain models and libraries - whether the project is scalable or not, do all libraries support scalability - how to handle arrays sent from flask application to jinja templates - overall flow of the code and demo in the beginning, he doesn't take the whole demo, he'll stop	You will need in-depth knowledge of the code as well as the languages, he's polite and doesn't scold and if you've done something wrong, he'll point it out and let you correct it (no help from internet tho) He did not ask any theory questions at all so I would suggest prepping from the code thoroughly is the best choice
8/26/2024 18:58:58	Gurdeep	8/26/2024	Level3_24	●Demonstrate the project in full detail so he will ask less questions ●Explain all models and users one in detail ●Vcs vs git ●Javascript frameworks ●Practice the changes the background color of home page ●Change the position of navigation bar from top to bottom ●I used bootstrap so he asked me about bootstrap ●Rate your project	Just give a detailed explanation of project
8/27/2024 9:27:46	Rittwik Bhowmick	8/26/2024	Level3_11	Create 2 new account one for sponsor and one for influencer. Create campaign and other things(like viva 1) Explain your database. Asked me to explain some code. What is SPA What is authentication and what is authorisation Explain Put post get Explain lazy loading ,uselist and backref . That's all..	Just read the above questions and know your code very well.. and try to explain your answer through your code.. like when he asked me about authentication and authorisation I just showed my code of auth req

Timestamp	Your Name (if you want, y	Viva Date	Viva Proctor ID (the id which was sent to you in	Questions asked by the Viva examiner (Write in points)	Any suggestions/tips to fellow students for this examiner?
8/27/2024 11:22:19	Tarang Pansuriya	8/26/2024	Level2 116	1) Show models.py files in which he asked: i)What is ORM?which ORM you used? ii)what is backref? What dB.relationship? 2) Show database 3) Show routes file i) What is url_for() ii) What is the difference between authentication and authorization? iii) I have used Decorators that is why he asked about that also. 4) Changes in code i) Add in admin find section while searching it should show how many users found Something like if I search for any user then after searching it should also show "7 users found" For this I made one variable num and store the counts of users that matched with query admin ii) in my search admin is also coming while searching so He told me remove admin from sear	He is chill person and also very sweet guy. He will give you hints and tips to make changes If you don't know how to make the changes he want just tell him to give some hints or you can say I am not aware of that. Also he wants your front-end should look good and attractive but you can say him that in this MAD 1 project is more focused on backend part but after completing this I will surely make it more beautiful.
8/27/2024 17:31:11	Mrunal Mahajan	8/26/2024	3_11	1. Show the functionalites 2. what is put post 3. difference between Authorization and authentication 4. Inline CSS and Internal CSS and what's the advantage of using internal css over inline? 5. what is SPA ? 6. what is lazy loading? Gave me suggestions for my code	Don't worry, he's very chill. He asked the same questions from the response sheet. If you don't know the answer to a question, just say so—he'll explain it himself.
8/28/2024 10:44:51	Naveen Yadav	8/20/2024	level2_144_MAD1_Viva	Explain about project Show project functionality Question about how I have implemented ChartJs in statistics page What is the use of POST with GET How the filtering option is working What is inheritance (extends) What is jinga variable How to make a new filtering option How to change the background colour of app Different types of request methods What is plugins Why not use API	
8/28/2024 11:08:11	-		Level3_24	Showcase your app 1. Explain your DB 2. Explain the components in your code 3. Does Flask return a boolean? 4. Git version control 5. Explain js frameworks - Change the color of navbar - Change the color of button - Change the color of font Rate your app. Proctor was very rude just be patient (ends within 45mins). Doesn't repeat himself when you don't hear him. He ends up imagining you don't know despite asking him to repeat himself.	
8/28/2024 11:40:50	Tripti	8/26/2024	Level2_145	1) Explain the work of every file including how they all are connected 2) How secret key work ? Did you implement this in your project or not ? 3) Explain database (model.py) 4) How (db.init_app(app) ,app.app_context().push()) (From coding page) 5) Why you use this (if __name__ == '__main__': , app.run()) 6) Then few question from routes.py 7) Change the button color into green 8) Password validation (Password must contain one capital, one small, one number). 9) Why you use this "aria-current" (bootstrap part) 10) Purpose of url_for	Proctor is very sweet, also he will guide you if u get stuck. Focus on code understanding Make sure you understand your model relations and fundamental of flask.
8/28/2024 16:53:56	Suryaansh	8/27/2024	level3_49@study.iitm.ac.in	1) Explain the directory and the project structure (explain MVC) 2) explain models.py 3) what is backref and difference between backref and backpopulate 4) what is lazy loading and different parameters 5) show the whole demo of the project 6) change the shadow box in our project and change the offsets and the rgba color 7) change the size and color of the container in your style css 8) whats the precedence of classes when you write them together in 1 tag 9) whats the code for keeping a check on 2 ad request , make it without changing the models.p 10) explain one of the controllers in detail and why is it used 11) what is rest api and how is it used 12) what are filters and how can you use them in your code 13) what is referential integrity and explain different keys 14) what is normalization 15) explain template inheritance using example 16) make change in the request and show	Dont take the last slots or any late slots, proctor is overall chill probably a college student. Will explain if you get stuck somwhere. Follow whatever he asks and answer to the point. If he asks if you have used gpt then be honest because he will catch it nevertheless
8/28/2024 17:55:32	Bhavana	8/27/2024	Level2_116	He saw my main.py and asked questions from in between of codes along with theory. So just g 1. Which ORM are you using? SQLAlchemy 2. What is SQLAlchemy? 3. What is url_for? 4. What is the difference between request.form.get{ } and request.form[ ] as I used this in my c 5. Asked about which join i used in my code 6. Types of join 7. Asked question on session 8. What is template inheritance? Live coding question: In search functionality, asked me to search campaigns and then asked me to show the length l Ans. {{campaigns | length}} CSS head , h3 ,h5 ,etc.	He is very amazing helps you and explains you as well if you go wrong somewhere.
11/14/2024 19:35:50		11/13/2024	Level2_85	Demo of project and overview Database related ORM, MVC Modals Relationships Css changing Boostarp5 OOPS	He was cool just behave properly

Fill this sheet using this form https://forms.gle/769WTWE2NE2dPGx7A

Timestamp	Your Name (if you want, y	Viva Date	Viva Proctor ID (the id which was sent to you in	Questions asked by the Viva examiner (Write in points)	Any suggestions/tips to fellow students for this examiner?
11/19/2024 12:35:34	Anshul	11/16/2024	level1_119	- Use of a virtual env - What is ORM and usage? - What is MVC arch? Follow up q: What are the other types of architectures. - What is template inheritance in Jinja? - Use of APIs? - Use of Javascript - Explain CORS (since I mentioned it) - For my summary page, he asked me to change code to swap the two graphs positions(easy) - For a customer making a booking, my approach was choosing a date, he asked me to chang - Use of ChartJS? - How does data get sent from backend to frontend? - Why is all html files defaulted to a 'templates' folder? If we change 'templates' to any other na	Always read-up everything on your implementation. Anything you have added/worked on should be known thoroughly because he will ask you to tweak it in some way.
11/19/2024 12:55:34	Md Faiz Khan	11/15/2024	Forgot	I introduced my self, run the application and explain all the functionalities that I implemented af	Be clear with ur business logic and all the things u implemented and be confident It's not so tough
11/19/2024 13:52:00	Anonymous	11/15/2024	level2_126	First as usual run the checksum 1) Demonstrate your Project 2) How RBAC is managed in my project? 3) Working / Explanation of Login route 4) Explanation of my DB models 5) Is Foreign needs to be unique always ?(Ans : NO) 6) He asked me to add another field called age (to avoid Child Labor by allowing only 18+ for S 7) My frontend was a bit ugly so he advised me to work on my frontend design 8) Constraints of Rest API 9) And one more question he asked me that i was unable to answer so i forgot the question as	Well he is very nice. Just answer the questions to the point (without adding unnecessary details) . Me might ask Theory based questions along with the project so do prepare them as well. My viva lasted for arou
11/22/2024 18:18:48	Vaibhav	11/22/2024	level2_127	So basically it was my "level 1" viva 1. show your college Id 2. show checksum 3. explain project (Name, motive) 4. I was kinda lucky next and last que was demostrate your prject show all functanilties (i have 5. My summary section got error, but my Procter was nice, chill he said no worries improve in ki	All Procter's are awesome, chill. You just need to explain your project briefly (all roles and functions)
11/25/2024 11:01:41	Nihila	11/25/2024	13	Self intro Demo Change the constraints of email id . Should accept the email id only if it is in a format like somthing@somthing.something Primary key foreign key Restful api Get post Explain models used List and tuple difference	
11/25/2024 13:23:19	Atharv Khare	11/25/2024	level3_25	Demonstration : - Give a project Demo - Explain a route logic - Change the signup button location - Show the project structure - Show the config file - Why use CSS Project code related questions : Models.py - What is db.relationship - Explain your relationships and why you used them - what is db.model , a class or function - what is sqlalchemy , class or function - what is db here - explain the working of inheritance logic here - backref vs backpopulate , example Controllers - what is app.route and its use - can it return a boolean value - url_for vs redirect - what is app here - explain a endpoint - what is validation, have you used it - How are you handling login - What libraries have you used - Password hashing and verification Theory - Git vs VCS - Structured vs Unstructured DB - MVC - ORM and its use - GET vs POST - CS architecture vs Distributed - Why use CS - OOPS in python in detail APIS - Show API endpoints - Create a new endpoint and test it Told me to learn more about OOPs in Python for future	Know your project well and prepare from this sheet, cover all the questions this examiner has asked previously, and you'll be fine.
11/25/2024 16:56:00	Vaibhav	11/25/2024	level3_13	"Level 2 viva" - College Id - Checksum - Self Intro - Demonstration of your project - Show me login page, login as admin - Set a background image(my logo) particularly in a login box(which i have made) - Bootstrap (i have not used bootstrap in project) - Why you have not use bootstrap? - Why you use css?, How you added? - Explain your database? (+ER diagram) - Why you have use sqllite? - Why you have use Flask? (i have also said structure is bit easy) - Show me your Structure and Explain? - What you have learn from this project?	All proctors are amazing, just go through your project and database properly and why u are using them, what unique things that they are possesing and all the best!
11/26/2024 18:19:34	Dev Gupta	11/26/2024	Level3_13	1. Go through your application. 2. Create a single login route for all types of users (admin, customers, and professionals). 3. Add a button on Admin dashboard that will redirect the admin to customer login page. 4. A brief about the relationships between Models. 5. Explain different python modules you created in your project (routes.py, models.py, utility.py, 6. What is REST API. 7. Difference between Frontend and Backend. Which is more important? 8. What all tools/frameworks you used in developing your application. 9. What was the most difficult part for you when you were creating your application. 10. How dictionaries store data in memory. 11. How can you read key-value in a dictionary. (like dict.items(), or enumerate()) 12. What is namespace. Are you using namespace in your code.	The proctor is very patient, and cool. He didn't ask to complete the code modification in certain timeframe. Take your time. He kept asking, and I kept answering. He was impressed. At last, he stopped, and prais So, the moral of the story is: 1. You should know each and every part of your code, like your child. 2. The proctor will definitely ask for modifications in your code. 3. Theory - REST APIs, Models, Relationships are must.

Timestamp	Your Name (if you want, y	Viva Date	Viva Proctor ID (the id which was sent to you in	Questions asked by the Viva examiner (Write in points)	Any suggestions/tips to fellow students for this examiner?
11/26/2024 18:39:13	Harshit	11/26/2024	Level3_25	1) Shown my I'd card 2) Demo of my project 3) shown my all dependencies which i used 4) what is orm 5) client server architecture vs distributed server 6) redirect() vs url_for() 7) git vs vcs 8) where you applied validation in your project 9) said to change login button to the top right corner 10) said me to learn about oops	If anyone would assign this proctored must have a look on the question he ask because 90 percent he follows the same pattern of asking question
11/26/2024 19:44:09	Achal Deep	11/26/2024	level3_12	1. Introduce yourself. 2. What is git and it's applications. 3. http vs https 4. id vs class, and using which symbol it is represented in css 5. name vs id 6. ORM 7. Show the code, by which tables are created in db. 8. DOM 9. Change button color on hover. 10. Store service name in upper case. 11. MVC His voice was not clear; that's the only issue. Overall, the viva was good.	Just focus on this Viva Response Sheet, especially the section for your Proctor ID.
11/26/2024 22:26:23	Adrija	11/26/2024	level1_111	Project topic: Household Services App - Intro and show ID - Give demo of project - Create a new service, register a professional for it and create a service request for it - Accept that request and show the process including rating and reviewing - Asked how I was storing the user's id proof, photo and other docs securely - Asked what database engine i was using (sqlite) - Difference between authentication and authorization - Asked to explain the frontend and backend - Why did I use jinja - Explain the tables used and the relationships and show the ER diagram - Show how authorization and role-based access is being handled and explain the code - Are you using inheritance in templates? Explain what it is and show the code - Asked if anything (like session cookies) was being stored on the client side - Asked if I had any cart system for the project. I had not and I explained why it was not neede - Show any errors being handled by the app (like in my case the customer could not book servi Overall she was really nice and supportive. The viva lasted around 30 minutes. She joined 10	Prepare the commonly asked questions from this spreadsheet. Know your code and everything you have done in it and why you implemented it the way you did. Try to show your confidence, even if you're feelin
11/27/2024 18:59:18		11/27/2024	level3_11	1) Checksum 2) Demo 3) Explain Service and Service Professional from models.py 4) What is the difference beween Inline CSS and Internal CSS 5) What is the difference between Authentication and Authorisation? 6) What is the difference between 'LIKE' and 'UNLIKE' operator with respect to Database? 7) How did you implement search functionality in your project?	Chill Karo if u got this proctor...
12/5/2024 10:39:47	Prince	11/27/2024	L1 = 1_106, L2 = 3_12	L1 questions: Project demonstration and asked to explain the DB tables in 1-2 lines. L2 questions: 1. MVC & DOM? 2. How to access element by id in JS?(document.getElementbyID) 3. Which language is used to manipulate DOM? 4. What's ORM? Which orm we've used? 5. How we're actually connecting the DB to flask, which cmnd? (with app.app_context: db.init(a 6. Difference between id and class in HTML? 7. Diff between id and name in HTML? 8. What's GIT? Centralised or decentralised? What's decentralised? 9. HTTP v/s HTTPS? Which is more secure and why? 10. Backref v/s backpopulates 11. Get v/s Post. Which is more secure? 12. How we send data to backend? (form action) 13. Can we send data through GET? How? 14. How we access id and class in css? (# for id, . for class) Code changes: 1. Manipulate frontend to only allow username to be 10 letters. 2. Manipulate backend to store services name in uppercase.	Be clear with theory. Practice sheet questions over and over especially theory ones. He'll grind you. Be calm and answer to the best of your knowledge.
12/7/2024 12:29:21		12/2/2024	level2_127	It was my L1 Viva with this examiner. the viva flow was like: 1.) Checksum process 2.) Start the Project and explain the basic code structure 3.) Give Project Demo 4.) Read a bunch of core functionalities and asked me to showcase them one by one. 5.) Gave a few tips and things to brush up on before the L2 and said best of luck.	chill guy, just be honest and upfront about your project.
12/7/2024 16:18:46		12/7/2024	appdev_level1_viva4	For level 1: 1.Checksum 2.Perform core functionalities 3.asked to show models	he is a chill guy. just be ready with your project
12/8/2024 7:31:56	Mani Manjunath	12/7/2024	LEVEL 2_131_	Nothing much just demo	
12/9/2024 19:17:06		12/9/2024	appdev_level1_viva4	1. Core functionalities 2. Asked to see models and asked what database I used	Super chill guy, mentioned that he wanted a brief and concise explanation and I gave just that. Don't overexplain or exaggerate, just be calm and it'll get over in like 10 mins.
12/10/2024 17:27:13	M.R.Hikmathun Nisha	12/9/2024	level1_106@onlinedegree.iitm.ac.in	Core functionalities	-
12/10/2024 17:38:53	B Sanjay	12/9/2024	Level1_105_mad1	He's very kind and ask me to run my web application and also he helped me to fix some error.	Make practice on installing your files by downloading from server and also try to run as much as possible to learn more about it
12/10/2024 18:12:27	Sid	12/10/2024	l2_131	Just asks for demo of app	Very chill person just be confident and answer and be honest about your project he appreciates it.
12/10/2024 22:26:48	Tic-Tac-Toe	12/10/2024	level1_viva24	***13mins lasted new world record???*** 1. Let's first run the checksum then copy paste it in the meet chat dawg. 2. Go through your project homie. 3. Create customer request again [Can it be edited after being made?].	Chill Man (But not chill than me)
12/11/2024 11:12:15	Nayana S S	12/10/2024	Level1_105	Since this is l1 viva, he just asked me to demonstrate the project. Also checked whether all the	He will help us if any error occurs. He is a nice proctor.
12/11/2024 16:59:32		12/11/2024	Level 3_11	--> Asked introduction about project. --> Project demo. --> Asked how have you implemented search functionality. Theory Questions: 1. What are Single Page Applications (SPAs)? 2. Authentication vs Authorization. 3. Inline CSS vs Internal CSS and which has higher precedence? 4. PUT vs POST.	Cool proctor. Just be clear with how you implemented the search functionality.
12/11/2024 18:21:20	Pruthvi Prasad S	12/10/2024	Level1_105	I had level1 viva. Proctor just asked me to demonstrate the project. Checked all the core functi	Good proctor. Helps if any sort of error occurs

Timestamp	Your Name (if you want, y	Viva Date	Viva Proctor ID (the id which was sent to you in	Questions asked by the Viva examiner (Write in points)	Any suggestions/tips to fellow students for this examiner?
12/15/2024 0:32:57		12/14/2024	level3_12	1. What is MVC? 2. What is the difference between GET and POST methods? 3. What is the difference between "." and "#" in css? 4. What are the different types of css? Which has a higher precedence? 5. Explain the Models, Forms, Login 6. How could one implement a remember me system in Login forms? 7. Are the Graphs that you have made of any actual use? Could they have been different? 8. Is there a Search Functionality? 9. What is the hover feature in css? 10. What is Jinja templates? How can they inherit? 11. What is DOM? 12. Many different things about Server-side details vs Client-Side details. 13. What is the action attribute in html forms? 14. How does it differ from method attribute?	Just be confident, and know about the basics of different things
12/15/2024 12:56:30	hehe	12/15/2024	level2_126	1. Add an 'age' column for professional registration. and restrict it to individuals above 18 only (2. What is MVC? 3. redirect vs render template 4. Complete demo of project: explanation of models and templates 5. How jinja accesses variables? ans : {{ }} 6. what is backref?	the proctor was chill, gave a lot of feedback on code structure and logic, if you get this proctor make sure to go through the questions in this sheet asked by him. Almost all were repeated for me
12/15/2024 13:30:22	Abishek M	12/15/2024	Level1_119	Walkthrough (within 5 minutes) Modify ur code such that all services are in Capital Letters Modify ur code such that the price of the service is stored with decimals (after division by 1000 What is ORM? What is Restful API What is .a in ur CSS code? Difference between using # & . in CSS What happens if your HTML files are in a different folder instead of templates? What is template inheritance? Difference between redirect & render_template? What will you do to add a service ? (Show demo)	Viva was over within 17 minutes. Seemed calm. If you dont know anything, just say right away cos u dont wanna waste his time or yours. Tell I dont know and he says its okay & moves onto another question. 8/
12/16/2024 13:31:13	RBK	12/16/2024	level3_11	1. Start with project presentation 2. Asked to explain models (database) and routes functions) 3. Authentication and authorization 4. Lazy loading and eager loading (Examples of where we can use these) 4. Single page application (SPA)	Just go through the models and functions in routes, and for theory, refer to this docs.
12/16/2024 15:45:08	Rithvik TR	12/15/2024	level3_25	GO THROUGH ALL THR QUESTIONS IN THIS VIVA FOR THE INSTRUCTOR. 99% IS SAME -> I did the demo of the app for 35 mins. Explained each part and my reasoning. 1) Backref VS Backpopulate 2) Relationships 3) Client Server VS Distributed 4) Change position of register anchor link to top right	Go through all the questions that have been asked by 'level3_25' instructor. If you have more time, go through all the proctor questions too. And finally know your code well.
12/16/2024 16:20:12	N/A	12/15/2024	Level3_25	Overview of the app.py file Overview of the models Relationships: Have any been used? What is backref? What is SQLAlchemy? What does db.Model refer to? What is the MVC architecture? What is client-server architecture and distributed architecture? What are cell spacing and cell padding? How does the customer login process work? Move the register button to the top right corner of the page. Why was a relationship used in the database model?	Level 2 Viva took around 30-40 minutes for me. Please review the questions previously asked by this proctor, as he tends to ask similar ones. If you are still not satisfied, prepare all the questions in this sheet. Make sure you fully understand the code, including the syntax and how it works. The proctor is approachable and may offer assistance if you get stuck. If you are unsure about any topic, he will help you. The changes in the code will be something you have already implemented or similar to your previous implementations. Therefore, ensure that you are completely clear on the logic behind your code. Be patient and well-prepared. That's all you need, along with a bit of luck.
12/16/2024 17:12:09		12/14/2024	level3_13	For Level2 : 1.Introduce yourself 2.demo 3.er diagram Changes in code: do password validation where password should be min 12 length and should Viva: 1.list vs tuple 2.dictionary 3.rest api	He is very patient. No time limit for code changes
12/16/2024 17:13:12	Dharmik Patel	12/16/2024	level2_126	1. demo of application 2. explain models.py 3. what is use of backref 3. explain register customer html file 4. explain route for admin dashboard 5. add new column age in service professional, min. age 18 and edit html page as as-well. 6. what is load balancing? (i mentioned horizontal balancing so he followed up with what is ho 7. what is difference between encryption and hashing 8. sql query to add column into existing table.	The examiner is very friendly and will explain the correct answer if you are not able to answer. Tip: if you have noticed, my questions are repeated that of previous students. So questions will be repeated most probably.
12/17/2024 14:29:48	Matt Murdock	12/16/2024	Level_3_13	1. Asked me to change the login function code in such a way that if an Users tries to login with 2. asked me to add a delete function so that the admin can select the services and he should l 3. asked me to change the background image in theory he asked me primary key VS foreign Key http Vs https list and tuple and dictionary	the code changes were really difficult for me my mind was blank but the proctor was very kind and humble he tried to helpe me just chill and practice on your own code implement all the changes that is asked in this sheet on your code for practice
12/17/2024 16:59:29	Garima	12/17/2024	Level2_126	1. Project demonstration 2. Explain models.py 3. Horizontal scaling 4. Backref 5. MVC architecture 6. Lazy loading 7. Hashing vs Encryption 8. Explain admin dashboard route 9. Explain customer registration html page 10. Add a column age in the professional model with a constraint of the minimum age being 18	He is very calm, helps if any error occurs, explain things if you get stuck anywhere and also suggest some changes. Just remember all his question present in this sheet, he ask from these questions only.

Fill this sheet using this form https://forms.gle/769WTWE2NE2dPGx7A

Timestamp	Your Name (if you want, y	Viva Date	Viva Proctor ID (the id which was sent to you in	Questions asked by the Viva examiner (Write in points)	Any suggestions/tips to fellow students for this examiner?
12/17/2024 22:55:32	Jatin Dhanani	12/17/2024	Level2_126	1. Quick Go Through The Application 2. Explain the Model.py file 3. Explain admin_dashboard Route. 4. What is uselist (I have used it While defining a relationship in the model.py file, so he asked) 5. Is a Foreign Key Needs to be unique? 6. In what case does a Foreign Key Need to be Unique? 7. Explain a Customer Register Template. 8. What is the Structure of MVC? 9. What is the difference between hashing and encryption? 10. What is the difference between redirect and render_template? 11. What is the meaning of "Required"(Asked while I was explaining a customer registration pa 12. Explain a create-service route. 13. While presenting the application, I got one error. So, he first asked me to explain the error, 14. Then, he asked me to change the background color of a login page. 15. How does Jinja Access the Variable? 16. How to write a for loop in jinja? 17. What is templet inheritance?	He Was a Very Friendly Guy, and very helpful. Most probably asked repeated questions. He will give you honest feedback at the end. Everything else was chill. No need to worry.
12/18/2024 15:49:26	Khushi	12/18/2024	level2_145	-checksum, demo -briefly explain about models and routes -render_template and redirect -session -er diagram -jinja2 templating -http status codes -db relationships -code: password should contain atleast 8 characters	Really nice guy. 12/19/2024 11:36:04	S. Prashanth	12/18/2024		1) Explain the Project file structure. 2) Show project report and E-R diagram. 3) Explain how many to many relationship is represented in Data Base? (DBMS) 4)Explain @app.route(). 5) Explain how flask works internally. 6) Where and how did u use boostrap and jinja, explain using some html file? 7) Explain primary key and foreign . 8) Explain the sqlalchemy models. 9) Show how admin can view professional resume file. 10) Modifications to my code: (i) Password verification (either back end or front end modification) to restrict length, pw should contain both upper case & lower case and special characters. (ii) Arrange/sort the services which will be displayed to the Admin by alphabetical order.	1) Proctor allowed me to refer to the internet (said preferably not AI like ChatGPT) to make changes to the code. 2) You should be able to explain your code (especially sqlalchemy models) and various libraries used. 3) Also understanding of data base.
12/19/2024 11:54:08		12/19/2024	Level2_145	Perform checksum Explain folder structure and the files in it (what they are and what they do) Open models.py and explain what models you have used and why Open one of your routes and explain what happens in it Open one of the html files and explain what happens in that What does 'url_for' do? Open browser and show admin dashboard CODING: Change the services table and make it order by name instead of id CODING: Do validation to ensure that the password length has to be minimum 8 characters What does query.all() do? What does query.first() do? What does abort do? What are HTML status codes? What is the difference between request.form['name'] and request.args.get(name)? If you had to have a default value for request.args.get() how would you do that? Open your project report that you have made What are the db relationships you have in your models? What are many-to-many relationships?	Very polite and nice. He'll nudge you in the right direction with hints if you're unable to recall something or are having trouble doing something. Nothing to worry about.
12/19/2024 12:49:27	aqdas khan	12/13/2024	3_31	checksum short intro demo Question asked: 1) restApi 2)ER diagram 3)Db relationship 4)list and tuples 5) few questions about code like how this is working and all CODE CHANGES 1)create an admin summary tables that provide summary of admin dashboard like total service 2) add a background image then asked what i've learnt from this project and how strong i'm at coding	Nice proctor, chill guys, helps u if u stuck somewhere, just answer point to point , know your code, and be confident
12/19/2024 12:55:55	Shrikkumar	12/19/2024	Level3_42	1. Authentication and Authorization 2. Cloud Services 3. Horizontal Scaling and Vertical Scaling 4. What is session and where it gets stored 5. How do you handle runtime errors/ Have you heard about exceptions 6. What should you change in order to manage thousands of requests in a single machine	Know your project very well, he'll tell you to change functionality, so first explain how you are going to proceed and then go ahead

Fill this sheet using this form https://forms.gle/769WTWE2NE2dPGx7A

Timestamp	Your Name (if you want, y	Viva Date	Viva Proctor ID (the id which was sent to you in	Questions asked by the Viva examiner (Write in points)	Any suggestions/tips to fellow students for this examiner?
12/19/2024 14:54:12	Mohd Afsar	12/19/2024	level1_119	Questions I Remember From My MAD-1 Viva-2: 1. Provide an overview of your project structure. Explain where different folders and files are lo 2. Run your application now. 3. Show your models.py. Explain all the tables and models defined in it. 4. What is Enum, and what does it do? 5. What is backref in relationships? What is its purpose, and why did you use it? 6. What does lazy=True mean in relationships? Why is it written? 7. In the Admin model (or table), why did you use @staticmethod? What is its purpose, and wh 8. Show the login form you created, including both the frontend and backend logic. 9. What is the name attribute in the input tag, and what does it do? 10. What is the difference between the name and value attributes in an input tag? 11. How are you storing sessions in the backend? (This led to an in-depth discussion as you im 12. Show how you implemented the logout functionality and explain the logic behind it. 13. Demonstrate your project on the web interface. 14. On the Admin dashboard, show how you can sort all service requests alphabetically by the 15. In the frontend code, make a change such that the customer's address in the service reque 16. What is template inheritance? 17. What is the difference between CSS spacing and CSS padding? 18. Have you used any APIs in your project? What is a RESTful API?	All the Best for Your Viva! Make sure to thoroughly review your entire code and understand why you wrote every single line. The proctor will likely review your code in detail and ask random questions, so be prepared to handle any modifi Focus especially on your models, how you've defined them, and how you've implemented relationships. Pay extra attention to concepts like backref, lazy, and any custom logic you've used. Just be confident! If there's any question you don't know the answer to, it's better to admit it honestly rather than trying to guess or over-explain unnecessarily. And don't worry too much—proctors usually try to wrap up the viva quickly. Best of luck, you've got this!
12/19/2024 22:35:56	Muhammad Bilal	6/10/2003	level3_13	Proctor was very calm and nice , he gave me much time to think about the question.He asked 1.He asked me to add one more input field "city" in customer register page, which I did by addi 2.static vs dynammic web pages. 3.He asked me to add a background image behind my admin dashboard. 4.What is restful api? 5.What is bootstrap and its uses. 6.He asked me to create a table inside a table.	please refer to whatever I have written in Questions asked by the Viva examiner portion.
12/20/2024 17:14:54		12/20/2024	level3_24	1.change the background color,font color,button background color 2.Bring the navbar to the bottom of the page 3.Explain models in detail 4.Add a new row in the database and make it visible in the application 5.What are the different ways data can be stored 6.Project demo (first)	Give a detailed explanation of the models and routes initially itself.
12/21/2024 9:52:01	Aaron	12/20/2024	Level3_12	Id card verification and check sum Small introduction 1. He asked me to create 3 services and then to perform CRUD operations and a short and precise demonstration of my app. 2. What is ORM? Have you implemented it in your code? why haven't you implemented it? 3. What is MVC? Show MVC in your code. 4. Asked me to explain my models.py and a HTML template. 5. What is DOM? 6. GIT 7. Stateless VS Stateful 8. GET VS POST? Can we send data through GET? 9. HTTP VS HTTPS? Which is more secure? 10. Inline, Internal and External CSS. Which has more priority? 11. What is Template Inheritance? How do we implement it? 12. What symbol is used before ID and class in CSS? 13. What are sessions and cookies? 14. Which programming language can manipulate DOM dynamically? code changes 1. When you add a service name it should stored in uppercase in the backend. 2. Change button color on hover to RED.	He is pretty chill. Go through the questions on the Google Sheets carefully. He often repeats the same questions. He tends to rush you when asking theory-related ones. Good luck :)
12/21/2024 11:16:02	Chotu	12/20/2024	level2_145	- Show Id - Checksum - explain folder Structure - explain models.py thoroughly - explain admin_dashboard.html and route of admin dashboard - jinja2 template - method = post, get (technical difference also) - http status codes - render template and redirect difference - Code changes -> Password validation (Password must contain one capital, one small, one nu - Code changes -> Change the services table and make it order by name instead of id and the - what is @app.route ? and what @ means -diff btw sqlalchemy vs flask-sqlalchemy -show er diagram and what are primary key and foreign key	follow the sheets, similar questions asked, nice guys
12/21/2024 12:51:32	Anonymous	12/19/2024	lvl3_13	- he first asked me to give me the demo of the project - then he asked me er diagram, but I didn't had er diagram of my project so I explained my moc - the he asked me to bring the email label email box password label and password box all in th - and then he asked me about bootstrap and its uses (since I was using bootstrap) - then he asked me about primary key vs foreign key - then he asked me about what is rest api - then he asked me about HTTP vs HTTPS	while giving your demo, try to explain some parts of your code too and prepare the questions from the sheet, and while explaining your demo give answers to these common questions by yourself like I explained
3/10/2025 17:21:15	Test	3/11/2025	Level 1 126	What is Git and github, how to sort the data we got in frontend?	No
3/10/2025 17:47:45	Anonymus	3/7/2025	Level1_14	1. Show your code and start demonstration. 2. Differentiate between frontend and backend validation. 3. PUT vs PATCH 4. Which Database you are Using 5. He asked examples for everything.	
3/11/2025 16:50:08	Suraj	3/11/2025	level3_24	First asked to show Id card then asked for checksum and paste in the chat box 1. Explain about your project everything 2. Can Api return a Boolean value if yes then explain 3. Explain the database model of your project in detail 4. Explain frontend and backend validation 5. Which is more crucial fronted or backend validation 6. Rate your project. the viva went around 40 mins	I proctor is nice. He said you can disconnect the call now after the question asked rate your project. Just stay calm and be polite, try to answer the question in detail.
3/11/2025 17:21:03	Anonymus	3/11/2025	Level3_25	1) Show Id card and perform CheckSum. 2.Demonstrate your application 3.Explain your code 4.What is db.Model 5. Where you have initialized your database 6.Define ORM , SQlAlchemy , Template inheritance , Git vs VCS , Backpopulates 7.Why you have used backpopulates why not backref 8.asked to change the position of login button to top right 9.Does api return boolean values 10. Explain a route 11 . Your summary chart is changing dynamically , if yes , then show it	Prepare all questions from this google sheet, it will certainly help you during Viva
3/11/2025 17:22:18		3/11/2025	level3_24	1. Show me your ID Card 2. Demonstrate Your Project 3. Change background color 4. which is more important backend or fronted validation 5. show your frontend & backend part in your directory	

Fill this sheet using this form https://forms.gle/769WTWE2NE2dPGx7A

Timestamp	Your Name (if you want, y	Viva Date	Viva Proctor ID (the id which was sent to you in	Questions asked by the Viva examiner (Write in points)	Any suggestions/tips to fellow students for this examiner?
3/11/2025 18:56:16		3/11/2025	level3_25	1) Asked to demonstrate the application first 2) Then asked what is db.Model ? 3) is sqlAlchemy a class or object? 4)what is backref? 5) Did I use any relationship in the models and why? 6)what is ORM? 7) Difference between git and VCS? 8) What is MVC paradigm? 9) what is the difference between cell-spacing and cell-padding? 10)What is client-server and distributed architecture? 11) Did I use any API or not? My answer was no so he didn't ask anything from APIs 12) Then he asked me to shift a text and a button from the bottom to top-right position and also	Know your application's code properly. And just go through the questions from this spreadsheet. I also did that. A proctor generally asks similar type of questions everytime that's how I got all the common questions that I prepared from this sheet. Biggest Tip: If you haven't used a feature in your project, like in my case it was APIs, just say it politely and he most likely will not ask questions from there Anyways at the end, he 's good proctor. Told me that my project was nice ☺ and I should explore the APIs as well and more on OOP.
3/11/2025 20:29:36	Anonymous	3/11/2025	Level3_12	Do checksum Demonstration of project MVC and show in project Explain models.py in brief What is template inheritance Change subject name to uppercase Change the color of login to hover red What do you mean by statelessness Diffrence between get and post Can we send data via get What is git use of git Another use of git apart from tracking Is git centralized or distributed What symbol used before id and class in css Diffrence between id and name Technology used for templates Diffrence between http and https Types of css styles and attributes they use their precedence Define orm Define Dom Which programming language can manipulate DOM dynamically	Just thoroughly go through the response sheet it's more than enough
3/11/2025 22:10:00	Ishita	3/11/2025	Level3_13	ID Verification Introduction Checksum Explain the problem statement App demo Theory Questions (Not in Order): Explain the database What modules have you used? Explain in detail. How can email validation be done? What is MVC? Where is MVC in your code? What is the difference between packages and modules? What is the difference between list and tuple? Why have you used jsonify? What is the difference between CSV and json? What did you learn from the project? Code Changes: Perform password validation: (1 uppercase, 1 lowercase, 1 special char, 1 digit, > 6, < 20) Change the background image for the signup page	Maintain your calm, he will test your knowledge in depth and why you've done whatever you've done, the sheet helps, know your code REALLY WELL
3/19/2025 23:32:04	errorboy	3/12/2025	Level3_42	Level 1: 0. Download the project from portal. 1. Demo 2. How you implemented month's wise number of quizzes attempted 3. How you are deleting all chapters and it's related quizzes in your database 4. Difference between Restful get and Patch (basically difference) Level 2: 0. Show the id card and download the project from portal and run checksum file. 1. Demo 2. How app.py work (like the application workflow) 3. Questions on database (like how cascading work) 4. Difference between authentication and authorization? 5. questions about ports (like 302, 402 etc..) 6. Difference between Get, Push. 7. How you will scale your website basically scalability question. 8. Change Navbar color. 9. Modify date of the quiz to only take present or future date. 10. Why you didn't use an API	Tip for level 1: 1. Don't be scared, be confident. 2. If you don't know any answer then answer something which is related to that question. 3. If you don't know anything about the question then just say, sorry sir/mam I can't recall it now. 4. Level 1 viva is simple you just need to give your demo properly. 5. Focus on database more in level 1 viva. 6. Ask for feedback before leaving the meet.
3/21/2025 11:52:09	anonymus	3/21/2025	level2_127	this is my level1 viva. 1. show the id card 2. demonstration of project 3. explain the user table with all components in it.(like all fields, relationships, lazy, cascade) 4. define primary key, @, app.route, crud.	chill. show all functionalities correctly.
3/22/2025 10:46:09	Nitya	3/21/2025	Level1 103	For viva level1: 1. to show database to see changes that was done in project during explanation and models.py 2.what is unique and primary key? 3.difference between GET and POST? 4. what is MVC?. explain with example from project and asked me to show a few templates	for viva level 1 you should know your models well each key and relationship . should know about your project like how each functionality in your app works .rest it's very easy .just be confident.
3/22/2025 14:53:47	Mithra	3/22/2025	Level_1_94	My viva level 1 questions: - Frond end and backend Validation - ORM - Full form of CRUD - Cascade - difference between {% %}, {{ }} in jinja - what all frameworks have you used in the front end and back end - perform all the CRUD operations - PUT method - RESTful API HTTP methods - why ORM is used - what is default that you have defined. Role = db.Column(db.Integer, default=1) - Why is jinja used here? - Why you didn't use PUT?	Go through the basics and this full sheet once.

Fill this sheet using this form https://forms.gle/769WTWE2NE2dPGx7A

Timestamp	Your Name (if you want, y	Viva Date	Viva Proctor ID (the id which was sent to you in	Questions asked by the Viva examiner (Write in points)	Any suggestions/tips to fellow students for this examiner?
3/23/2025 13:46:34	Khushi Choudhary	3/23/2025	Level1_95	asked about GitHub form and collaboration ID Card checksum Demonstration of project functionalities extra add on u did in ur project other than mentioned ones Models explanation MVC authentication vs Authorisation fetch vs put git ... and ig ek ya 2 question aur the but I forgot ... the last feedback	Conclusion: Polite and gentle Man...
3/25/2025 18:14:20		3/22/2025		what is orm? where is admin hardcore code ? where have you use jinja in your code ? what is mvc ? display your project	Prepare level even for level 1 .
3/27/2025 17:17:19	Rathin	3/27/2025	Level3_42	1. He asked me a lot of coding questions. 2. He made me write code, including routes. 3. Asked about ORM (Object-Relational Mapping). 4. Asked me to write code to enforce an alphanumeric password and throw an error for basic p 5. Asked about sessions and their purpose. 6. Focused more on practical implementation rather than theory.	Just stay calm and honest… He's going to ask you a lot of technical questions about how you did this. The viva lasted about 45 minutes, so make sure to review your routing.py.
3/27/2025 17:25:10	Divyansh	3/21/2025	L2_142	This is Mad-1 Level-1 viva 1. Show ID card, Github repo , collaborator. 2. Asked Detailed explanation about the project. 3. Uses of cascade in db, is it only used for delete? 4. what is ORM? 5. what is restful api? is it stateless or stateful ?	Be confident explain your project in details, proctor is very chill guy
3/27/2025 23:16:16		3/27/2025	lvl1 viva: level2_142 lvl2 viva: level1_119	level1 level2_142 Perform all CRUD operations as an admin. and general demo What is Cascade? Can it only be used for delete? What database have you used? What ORM have you used? What is ORM, and why is it used? Show your models, Jinja2 templates. Is your database normalized? Explain the different normal forms... level2: level1_119 Explain the directories in your project. What is app.config["SECRET_KEY"]? What happens if it is not there? What n why app.app_context().push()? What is app = Flask(__name__)? Why do we use __name__? What is the datatype of x in your code? (x = XXX.query.filter_by(...)) Pointed out a route and told to explain then he asked smth with the anchor tag on post n get... Then In CSS, what is the difference between # and . Run the application as Admin. List them the data in alphabetical order in the table Format the data in uppercase. Have you heard of RESTful? What is it? What is an API? (I have not implemented it) What is MVC? What is ORM?	
3/28/2025 9:32:21	Abhishek Suman	3/23/2025		1. Difference between Authentication and Authorization 2. Explain GET, POST 3. What technologies did you use for this project? 4. How did you create admin? 5. Demonstrate project	These questions were asked in Level 1 viva, so be prepare with the basics of your project.
3/28/2025 14:18:45	Mithra	3/28/2025	Level3_12	MVC ORM DOM GIT STATELESS Change the subject name to uppercase by default Change the color of the hover Explain Backend Explain how the route is being accessed. Template Inheritance And Add. Delete, edit subjects Attempt a quiz Show summary and explain Which language is used in DOM Whether git is centralized or distributed and other functions of GIT Difference between centralized and distributed Types of CSS styling And what keywords we use to define CSS Styling How we import to external CSS to html Difference between id and name in html And what symbols we use to represent id and class in css Difference between Get and Post Can we send data through GET Which is more secure HTTP or HTTPs How we connect the database to the servee Session What commands you use to create the database Explain how the routes get data from the htmls And some more, but all the questions are mentioned in this sheet from his proctor id!	It was like a rapid fire round, he repeats the same questions, just go through the questions asked by Level3_12 proctor alone. That's more than enough. You can survive. He rushes, expects to make things quick
3/28/2025 14:37:41	Astitva Agarwal	3/28/2025	Level3_24	Level 2 First asked me to show id card Then i downloaded file infornt of so no need of checksum He said me give detailed and elaborative demo of you app Then i showed all the functionalities of my application He said me to explain all the backend and frontend of code including routes and all the models I explained each and every line of code giving all the explanation of code all the terminologies Then he said me to change the background color and text The procter was very nice he told me that where i could make my app better He told me that i was very confident about my code because i explain everything with example He asked me to leave i asked few questions regarding my application and communication skill	The procter was very chill and good very calm and polite Explain your code in very deep way explain each and every line so that he would not have any questions left with him You should know your code very well all the routes , models table frontend and backend Be confident for your code and just review this sheet for questions and topics Best of luck ！ :)

Make sure to ask for feedback from the proctor and have knowledge about thing you impleme
4/17/2025 20:36:01		4/17/2025	level3_25	Level3_25 show ID Run the application Shift the login button to the top right redirect vs Url_for MVC ORM db.model show database and explain it And how did I done the validation of the user,Then he asked he to go to the code part and asked me to explain that also Client server vs distributed architecture cell spacing vs cell padding what is backref vs backpopulates,relationship Explain time setting in code for quiz have u used Password hashing and what is that	
4/17/2025 22:58:03	MAFRIN S	4/17/2025	level3_26	Verification of Hall ticket Checksum verification DEMO *on the quiz edit page , copying the url , after logging out the admin, checking if you still able to edit as you paste the url* *asking to show the db models* 1. why @app.route()? 2. get and post explanation 3. A qn on list 4. decorator func 5. mutable and immutable datatypes 6. man in the middle attack 7. types of joins in db. and about outer join 8. sql injection and few basic questions	Pretty cool guy. Just make a clear demo.
4/18/2025 23:18:32	Sarita	4/18/2025	Level1_135	demo of the app explain the model.py (like cascade , lazy , relationship and so on) explain the routes what is flask? about tech stack you used change in routing add a column to a model.py's class and so on the frontend and store the data into the database change the colour of botton about bootstarp	He is very Calm. you just be rady with your code and your project report
4/19/2025 15:29:04		4/19/2025	Level3_25	1. Download your project and it thoroughly like presentation and show all functionality 2. What is db.model 3. Where you initialized db 4. What is SQLALCHEMY , a class or a function 5. Diff GIT and VCS 6. Explain with code how you implemented timer function 7. MVC Paradigm 8. Change a button to top right of the page 9. GET vs POST method explain in your code 10. Have you used relations in model 11. Have you used APIs 12. url for and redirect difference 13. Have you used charts explain with code how you did it	Read questions from the sheet mostly similar even the code changes are similar. Take all questions from the sheet for this proctor and copy them to notepad and write answers for all for viva prep . You will be able to do all questions asked by Proctor easily
4/28/2025 13:38:36		4/20/2025	Level 1_132	1. Diff between http and HTTPS and how is it more secure 2. how is the insrance folder created. like by what line of code 3. can templates folder be named as template and static folder be named statics, if yes then how ? 4. Https methods and why do we only use GET and POST , why not Put and Patch 5. some css, like if margin value is 1 rem what it means, what is rem. 6. Can ask any code change, color or button change and difficult css explanation. 7. Regular theory can be asked, like by other proctors 8. asked me , when we run the app, we see a warning in the terminal, make the required code changes so that this warning is removed. Will ask many weird uncommon questions like that which will be difficult or maybe even not possible. 9. Explanation of backref and in which type of relationships it. Should be used (like one to one many to oen etc) 10. Cascade...diff bet delete and delete orphan, how to decide when to use which and why 11. Don't rely on questions here...ha is very strict and there to cut down your marks by any way possible, cover everything and anything you did or see in your project and do it in immense detail...he can go into depths	
5/5/2025 21:13:07		4/11/2025	level1_14	Demo Explain Models About security functionality Jinja-2 Put & Post Cascade	Proctor is friendly. Prepare all the questions asked by him present in this sheet .
5/5/2025 21:20:43		4/15/2025	level2_25	Demo Explanation of several Logics in code like login page, admin dashboard, charts. SQL alchemy Db.Model Frameworks used ORM RBAC Flasklogin and password hashing MVC Get vs Post Backref vs Backpopulates Code change : Change the position of elements in register form to top right corner.	If possible explain each and every functionalities in detailed manner. Proctor is patiently listening and helpful. Must prepare with this sheet.

Timestamp	Your Name (if you want, y	Viva Date	Viva Proctor ID (the id which was sent to you in	Questions asked by the Viva examiner (Write in points)	Any suggestions/tips to fellow students for this examiner?
7/9/2025 17:24:16	Alok Tripathi	7/9/2025	level1_131 (viva 2)	1. explain the project structure. what files and folders did you create 2. what happens in a route that handles both get and post method?? 3. How is the post method triggered? 4. What is RegisterForm and where is it defined? 5. Have you used ORM, what is that?? 6. open you models, explain these classes and relationship b/w them.. 7. What is a foreign key? 8. How do you add a new user to the database using sqlalchemy? 9. Why did you use flask migrate?? 10. What are crud operations? 11. Explain what happens step by step when a user registers. 12. What is the difference b/w authentication, authorization and validation?? 13. How do you protect routes so only logged-in users can access them? 14. In jinja how does accessing reservation.spot.lot.name work?? 15. What is `.parking-summary-card` and what does the `.` mean in CSS? 16. What is display: flex used for? 17. How can you make a section take only half of the page width? 18. How would you add a hover effect on a button? 19. What js did you use in your project? 20. Open the code of chart.js and explain it. 21. did you implement a search feature in your app? 22. Can you open and explain the HTML form and route logic used for search? 23. What are the different http methods?? 24. Can you submit a form using put or delete methods directly from a browser? 25. What happens if you use method="GET" in a form? 26. What is version control? 27. What tool did you use for version control? 28. What is DOM? 29. What does git status show?	
7/20/2025 13:40:04			level2_139	level 1 asked me to show id card project demo asked me to show all the functionalities put vs post primary key asked me to modify the code such that the admin should see no of users	proctor was patient and calm
7/20/2025 20:02:42		7/20/2025	level1_96	1.she asked me to show my project (the functionalities of admin and the user) 2.frameworks i have used 3.relationship of my tables 4.tell abt sqlalchemy 5.MVC 6.github repo	
7/20/2025 20:07:40	Trikshala	7/20/2025	level1_103	1. GitHub repo page and collaborators page 2. App demo 3. Primary key vs Foreign key 4. Show the frontend code 5. Explain about jinja Templating 6. Explain about routing and what do routes do? (Asked me to explain a route function he chos 7. Explain what delete on cascade does and delete-orphan too 8. Show the database file, and the corresponding tables and the data in it (if there's prefilled da 9. Basic features - adding, updating and deleting a lot, booking a spot, releasing and summary 10. Finally, what's the difference between authentication and authorisation	Just be good with the theory part and be able to explain code - like what it actually does and why you're using a specific thing. Keep cool, i stuttered a bit, but he was pretty chill. Will also give you a review of how
7/20/2025 21:32:26	Sharbba	7/20/2025	level2_132	1. Run checksum 2. Run the code 3. Made me change the "Cancel" booking button to "release" 4. Made me reduce the height of my chart 5. What did you use for CSS? 6. What are the types of CSS with preference? 7. What tags are used for tables in HTML, create a table with 3 columns. 8. What is HTTP full form? 9. Tell me about HTTP codes. 10. How are you calculating leaving_time and cost? Show and explain code for that. 11. Difference between authentication and authorisation 12. Did you complete DBMS course? I did so he asked about ACID properties	If you are ever stuck somewhere he will give you time and guide you but will ask more and more questions. He also asked about AI percent and all. Also acc to him you should stick fully to the project document.
7/21/2025 7:27:56			Level_1 91	Demo of app Asked to demonstrate specific functionalities What's the tech stack used How to initialise flask How to use if condition in jinja What's orm and which one have you used How to get the email of an user in orm if you have their username	just don't panic and be honest
7/21/2025 11:49:59	Praphull	7/21/2025	Level 1_103	Questions : 1. Show git repository and collaborators. 2. Delete the lot, create the lot , 3. Book a lot as user then release then book other lot. 4. Show your db and all tables. 5. Choose any one template and tell me where have you have used jinja2 template. 6. Explain routes how it work. 7. Authentication vs authorisation. 8. Primary key vs foreign key	The proctor was good just be honest and explain what do know , a little bit of it.
7/21/2025 15:34:30	Pragati Chandra	7/21/2025	Level1_107	Show ID Demo (her focus is on if you can delete or edit the lot or not) 1)explain MVC architecture 2)Why we use Jinja2 3) explain Primary key	She is sweet and no meet for checksum and she ask very few questions
7/21/2025 20:38:18		7/21/2025	Level_107	Show demo Where jinja is used Show database and tables Get vs post MVC Authentication vs authentication AI usage	Just follow the steps of proctor
7/23/2025 13:42:23		7/21/2025	Level1_95	Show Demo What is MVC Explain the HTTP request methods in one line each What is template inheritance Show one example of jinja templating in your code	
7/24/2025 9:50:06	...	7/21/2025	2_127	1. id check 2. demo 3. show models.py. explain the reservation table 4. what are the request methods 5. show routes.py -> admin routes. 6. exlplain the code flow from login to admin dashboard. gave a feedback and suggestions viva 2 .END	
7/26/2025 22:47:17		7/26/2025	level3_43	1)have good knowledge of the frontend 2)look at the questions he previously asked that would	He is a very cool and nice guy. No need to worry

Timestamp	Your Name (if you want, y	Viva Date	Viva Proctor ID (the id which was sent to you in	Questions asked by the Viva examiner (Write in points)	Any suggestions/tips to fellow students for this examiner?
8/12/2025 12:44:02		8/12/2025	level2_142	Level 1 Viva - Show ID - Show github repo with collaborator - Asked about AI usage and whether I have mentioned it in report - Download Submission - No need for checksum Asked for following demo (Didn't expect full demo just asked specific things) - Admin Login - CRUD of Parking Lot - View booked spot after user books it - Admin Summary before and after booking spot - Registered Users - User Dashboard - User : Book and Release spot - User Summary before and after booking spot One mistake I made was I booked and released spot in short duration and price per hour was l Code related - Show models.py - Show where is admin created in code - Asked to show where Jinja2 templating was used with specific lines - That's it did not ask anything else. Theory Questions - What is ORM - What is Jinja2 templating (Asked while explaining the code) - Can GET request be used to send data - Can POST request be used to fetch data - Can we use DELETE request to fetch data (I don't remember this one exactly but it was abou - What is Flask and when is it preferred - What frameworks have you used in your project	This proctor was polite and he stuck to the questions as mentioned in previous rows. According to me, he wanted me to be quick and finished the viva within 13-15 minutes - Know your code - Be quick and confident. Open ID, GitHub repo , VivaBooking portal beforehand. - Have reference txt file with all necessary credentials and example data - Being to the point is good but being a bit explanatory will be helpful. Stick to 3-5 lines - Learn about GET , POST, DELETE etc requests and can we fetch, modify or send data with each type of request, for this proctor. He will definitely ask one for sure.
8/12/2025 14:26:30	No	8/12/2025	Level1_95	Asked : Idcard, GitHub, download from portal, demo all features, asked various methods of http, diffence b/w post and put , what methods I used how and that's it. Gave positive feedback	very patient and chill guy and understanding, my system got overloaded mid viva so he waited patiently and even allowed me to proceed with the camera off till I showed the demo.
8/12/2025 14:45:38	Shriyash Jagtap	8/12/2025	Level1 91	No theory question asked me to code, please go through jinja and flask api end points and how they are made, heard that he asked same question to some other student, also learn your config file well and be ready for coding	
8/12/2025 15:27:06		8/12/2025	Level1_95	Define authorisation and authentication Cascading in model Template inheritance	Proctor was nice, gave some time as faced some issue while creating venv, prepare basics
8/12/2025 16:40:52		8/9/2025		Types of storages, status code,sir will see the code in routes.py and ask us write a specific part of the code	
8/12/2025 17:03:51	..	8/12/2025	Level2_127	All processes (from id card to running project) Includes showing collaborator on Github repository. 1. Can u tell me what request methods we have? (http methods) 2. What do u mean by cascade? >> have you declared the AI usage in your docs?	You already know the generic flow of what happens after what (I'd card then Github then code then....) He might be late in responding to you if you're asking if I shall proceed with next step (name it) But I'd recommend you to still wait most of the times.
8/12/2025 17:09:12	L	8/12/2025	Level2 proctor	1. Give a very detailed and in depth demo. As you are supposed to go to the code and explain 2. Asked me to make some changes in code. When I was stuck, He didnt help me with the cod 3. Then he told me to change the back ground colour, text colour and card background colour 4. Questions on HTML requests.	Understand your code well. When giving demo, try explaining the important parts by specifically pointing so they know that you know your code well and have not just copied from somewhere.
8/12/2025 19:11:18		8/12/2025	level1: level1_93 level2: level3_12	Project: Vehicle Parking level1: Maam didn't ask much. told to go through the project like giving demo. Q: Backref, Lazy Q: Orm Q: explain any one route Level2: After demonstration and coding questions he told to stop sharing and started asking questions. What ever is present already in this sheet he asked all of that so study that thoroughly. Nothing new was asked he takes time in asking questions and tells to explain models. Coding Questions: Q: Give 20% discount to all lots Q: On hover submit button should change red	Both Proctors were calm. Sir had some voice issue, I had to repeatedly ask him to repeat questions.
8/12/2025 19:21:46	Sakshi	8/12/2025	Dont know (not mentioned in email as well)	• have you used jinja.show me where did you use it. • What is jinja templating? • what is Flask? Why it is useful? • can we fetch data using post method? • how did you calculate the price of parking spot. Show me and explain.	Don't go for detailed topics (it's for Viva 2). Stick to the basics and be aware of your code!
8/12/2025 20:12:50	G	8/12/2025	Level1_viva20	Id card and github repo What is redirect Where is db initialised What is ORM Difference between POST and PUT What does the line if __name__=__main__ mean Where does db get created How have you defined the routes to direct to admin and user dashboard respectively How does the data reach the form? Where does request function come from Write the query to filter out all the users with the first name starting with S	
8/12/2025 23:39:12	Sk	8/12/2025	level1_93	First the demo what is ORM what is jinja templets how you handle user and admin access Explain one of your routing how its work	the proctor was really nice so if you got her as your proctor then its your lucky day
8/13/2025 0:52:42	Harika	8/12/2025	level1_107	1. Showed id 2. Github repo and collaborator 3. Asked for demo(didnt have to run checksum because i downloaded the project in front of he 4. Asked if I used sqlalchemy and its advantages 5. Asked which part of the code was the toughest while coding for me 6. Gave a positive feedback and wished good luck for level 2	She's friendly and kinda easy going. Be respectful and know your theory and code properly.
8/13/2025 1:05:50		8/12/2025	Level2_139	Demo for loop in jinja2 template Put	

Fill this sheet using this form https://forms.gle/769WTWE2NE2dPGx7A

Timestamp	Your Name (if you want, y	Viva Date	Viva Proctor ID (the id which was sent to you in	Questions asked by the Viva examiner (Write in points)	Any suggestions/tips to fellow students for this examiner?
8/13/2025 10:54:22	Heisenberg	8/12/2025	level1_107	1. Asked me to show my student ID and then checked the collaborators in github 2. Project Demo 3. Explain the CRUD operations in the code 4. Have you used SQLAlchemy? If yes, what are its uses? 5. Explain about the price allocation in your code 6. Have you used AI? If so, explain where	Know your code and learn the repeated theory questions. That'll do
8/13/2025 11:15:14					
8/13/2025 11:15:59	?		?	?	?
8/13/2025 12:31:31	..	8/13/2025	level 1_91	Main focus on configuration and API Asked what can replace dotenv Demo of project Basic Jinja coding How have I implemented charts	Focus on config.py and api
8/13/2025 13:11:55		8/13/2025	level1_viva14	show the demo what is cascade have you use orm in your project what is frontend backend validation what frameworks have you us	he is very sweet and calm gives a feedback and suggestions for the viva 2
8/13/2025 23:23:24	Madhura	8/12/2025	level2_139	1. ID 2. Download and run the app 3. How is For loop implemented in Jinja? Write code in notepad 4. How to fetch data of parking spots having lot id 1? 5. Show the working of app, core functionalities.	Helping and understanding proctor, calm
8/14/2025 3:40:10	Anonymous	8/13/2025	Level1_119	I began explaining the code models.py and app.py, the proctor never interrupted in between. I explained for 25-30 mins, then the proctor asked me whats UserMixin and followingly he told He then gave the coding question to fetch date as given in the previous excel row for the same	Make sure to thoroughly go through the models.py and app.py. Once hes convinced you thoroughly understand each and every word of these two files, he wont test you further by asking more theory questions.
8/14/2025 9:52:29	Anonymous	8/12/2025	Level1_103	Non theory questions: 1. Show collaborators on GitHub 2. Run checksum 3. Run application 4. Demo the app Theory questions: 1. Authentication vs Authorization 2. Explain MVC 3. Explain how admin is identified 4. Explain where and how Jinja2 is used in the code.	Know your code, you can be asked to explain any line of code in app.py, templates and models. Be confident, the proctor is chill and gives you time to think your answer.
8/14/2025 10:54:29		8/13/2025	level 3_24	- asked me to do checksum - asked me to present my app first - can flask return a boolean value? - what did I use to style my app? When I answered Bootstrap, he asked what's better CSS or B - what happens when you try to return a table that has no values	Honestly, great proctor! he motivated me for my last answer and kept telling me good after my responses. Just stay calm, be polite and explain your app in detail. If he thinks you know what you're doing, he won'
8/14/2025 11:02:49		8/14/2025	level3_11	App demo, explain cost,booking logic, explain models, explain search functionality, diff between put/patch, diff between ilike& like(i used in my app) single page application, standalone component,lazy loading	
8/14/2025 11:13:24		8/14/2025	Leve1-93 (viva 1)	Level1_93 (viva 1) Very Sped up viva Shower id,GitHub Downloaded project Login in admin Asked to create a lot and incr/decr lots Then delete that lot Show registered users Show summary tab Create user Reserve a spot, occupy it, release it, show the time stamps in the summary Demo done Asked what framwork i have used How I have implemented user and admin Explain relationship between tables(i opened the report where I had table diagrams and explained it) She asked about the AI usage Then in templates she asked where have you used jinja How is the data getting transferred from backend to frontend Asked if I have frontend and backend validation for which I said 'no but I may do it later'	
8/14/2025 13:48:50	A	2/5/2003	level2_127	1) Id card and github repo collaborator 2) Download the project from portal and demonstrate it 3) Cascading 4) Types of request methods and how many 5) Difference between Put and Post 6) Login as an admin and edit parking lot 7) Asked me if i made summary charts , I didnt - Said no worries	Greet him , Explain with ease , take time. Overall chill and super supportive
8/14/2025 16:04:55	Kya karoge janke	8/14/2025	Level1_93	1. Show id card 2. Download the zip file from portal / Do check sum 3. run the app 4. project demo, any extra features 5. which framework used? 6. Show any template file, how are you transferring data from backend to frontend 7. what do get_or_404 do? 8. where you used redirect(), session, and flash (i have used flash so she asked) 9. what is the first framework you used when you started the project (I said The first file i create 10. Did i use template inheritance, and where?	She is sooo polite and nice. She gives you time to explain. She allows you to explain in hindi as well. You are really lucky if you get her as your proctor.
8/14/2025 17:51:56		8/13/2025	level2_127	1. ID CHECK 2. GITHUB COLLAB CHECK 3. DOWNLOAD PROJECT FROM PORTAL NO CHECKSUM 4. PROJECT DEMO 5. SLIGHT GLANCE AT CODE 6. ASKED TO CREATE NEW LOT 7. UPDATE NUMBER OF PARKING SPOTS IN THE LOT 8. DELETE LOT 9. TEMPLATE INHERITANCE 10. PUT AND POST	proctor is chill just be confident
8/14/2025 19:29:48	..	8/14/2025	Level1_132 probably	It was taking time to unzip so he first asked the questions then went on to project demo what http methods we have Do u know about status codes What does 303 status code do Do u know about json? Can json be parsed into html template, if yes then how. Create a new py file and write a function for delete lot A few other theory questions I forgot.	Prepare theory part well, keep your calm, join meet 10 minutes prior as he also joined early and viva concluded in maximum 30 minutes.

Fill this sheet using this form https://forms.gle/769WTWE2NE2dPGx7A

Timestamp	Your Name (if you want, y	Viva Date	Viva Proctor ID (the id which was sent to you in	Questions asked by the Viva examiner (Write in points)	Any suggestions/tips to fellow students for this examiner?
8/14/2025 19:53:56		8/14/2025	level1_119 (Viva Level 2)	MAD1 Viva level 2 ID, checksum As usual demo (stopped midway) Asked to explain models.py Code changes - Change colors in pie chart - New page with dropdown having all parking lots Theory - What is Version Control System , One example - What is metadata in http request - What is db.func.count (Its an aggregate function) - Why is secret key needed in a session - Priority order in CSS (the inline, internal, external priority thing) - Can a flask endpoint return a boolean	Examiner is chill. Asked if I can see matplotlib documentation he allowed. I also asked for MDN docs of HTML I knew it was too much but I was going wrong in the <select> tag (used list instead of <option> tag) as expected he didn't allow. Overall he was polite and gave time for answering, didn't rush. Viva got over in 30 mins
8/14/2025 20:12:48	None	8/14/2025	Level1_viva14	1. Explain all the HTTP request used in the app. 2. Explain the frameworks used. 3. Explain the user model, and how you implemented admin 4. Asked about frontend and backend validation. 5. And a bit about all the codes, asked if I used bootstrap then show it. 6. The cost calculation part.	Just have a clear idea about your code, that's enough. A chill proctor, even helps in a little if you get stuck. Make sure to know the concepts well. He just checks if all the core requirements are there or not. Atlast
8/14/2025 20:24:04	Ak	8/14/2025	Level1_93	Show collabrator in git Demo Are you using validation Write jinja conditional statements Explain me route where you update number of spots Where you initiate db How you initiate db	Very nice proctor
8/14/2025 21:49:59	Shiva Ramakrishna	8/14/2025	level2 132	Viva 1 Showed ID, Downloaded the code from viva portal 1) Asked me to rename the zip folder name to viva_1 2) Showed the demo 3) Asked about routes, blueprints 4) CRUD operations - admin side 5) summary page visual dashboard (Asked for charts especially) 6) Inline Vs Internal Vs External CSS 7) Authorization Vs Authentication 8) ORM	Go through this excel sheet and that would be enough
8/14/2025 21:57:17	Somsankar Chakraborty	8/13/2025	Level1_93	ID card and Git collaborator Project demo (downloading from portal) Asked what frameworks i have used Ask me to explain any one route Asked me to show some particular templates She asked me whether I have used JinjaZ engine and template inheritance How is the data getting transferred from backend to frontend Explain any two tables, how are they connecting (I showed parking lot and parking spot tables Types of CSS and explain ORM	She was super chill. She'll give you enough time. You'll be lucky if you got her as your proctor.
8/14/2025 23:44:38	Ayesha	8/14/2025	level1_viva14	Show ID Show Git collaborators Have you used AI? Show project demo Show database model What is cascade in DBMS? What frameworks have you used? What security have you implemented? Different HTTP methods.	He’s a really nice and polite guy, gave me enough time to think, even gave feedback for the level 2 viva. Honestly, you’re lucky if you get this proctor.
8/14/2025 23:49:00	Halka SRK	8/14/2025	level1_viva14	-show github collaborator - show the demo - is the admin being created with the creation of database - asked to show booking calculation - what is cascade -PUT vs PATCH - what is frontend and backend validation (gave suggestion for level 2)	Just learn whatever he ask and he's very good guy
8/15/2025 1:19:08		8/12/2025	level2_142	1. REST 2.Principle of rest 3. can we fetch data using GET method 4. can we fetch data using POST method 5. what ORM 6. Which ORM you have used 7. Why you have used jinja 8. What is framework 9. could you edit the code and make the column instead of rows.	The proctor was bit tough and if you got this proctor you have to be very specific to the answer you might feel that he is rude. Just know your project thoroughly.
8/15/2025 10:27:19	..	8/14/2025	1_132 viva 2	Missed some of these questions, just adding missing questions now 1) suppose your app has current storage of 18GB, you wany to scale the app and scaling up d 2) Do you know what are APIs?	Again, don't panic and keep your calm. Nervousness will lead you nowhere.
8/15/2025 10:38:24	Mayur	8/15/2025	Level1_94	- ID and Git - Download file from the site - Asked me to do basic demonstration - Asked me to open app.py, asked what is os.getenv, and all the setup_config (I have 10-12 pa - Asked me to copy url and paste the same onto incognito mode, it asked for login, asked why - Asked how is this possible, is there something you have done manually? (Yes) How? (Using - Asked me to create a new route in app.py and create a template - Then asked me to display all users in the newly made route - It showed the object first, asked me to display only username Gave me time and allowed to refer to pages that I have made, but it was difficult.	PLEASE PREPARE YOURSELF VERY WELL, LEVEL 1 WAS PROBABLY HOW PEOPLE DESCRIBED LEVEL 2
8/15/2025 11:55:10	Ahana	8/14/2025	level1_93	1.Full code demo 2. Routes functions 3. What is ORM ? 4. Timestamp calculation 5. Jinja template usage, how to write for loop in Jinja 6. Purpose of redirect 7. Questions based on your code ..	Remember to keep ID card with you. Checksum is not mandatory. Be polite.

Fill this sheet using this form https://forms.gle/769WTWE2NE2dPGx7A

Timestamp	Your Name (if you want, y	Viva Date	Viva Proctor ID (the id which was sent to you in	Questions asked by the Viva examiner (Write in points)	Any suggestions/tips to fellow students for this examiner?
8/15/2025 13:28:16	vinshi	8/13/2025	level3_25	full app overview explain code changing the position to top right corner what is db.model explain a part of code where there is feature of updation MVC ORM difference between backref and backpopulate make an API endpoint if you have used it in get post(couldnt understand the question clearly POST,GET where is metadata used in html go through the summary section of its working dynamically or not	learn the theory questions by heart and learn about APIs
8/15/2025 13:34:04	Harshpemare	8/15/2025	129	1]demo of your code 2]post and put 3]template inheritance 4]what is blueprint 5]question related to model	study hard and lets rock
8/15/2025 13:51:04		8/14/2025	level3_24	LEVEL 2 VIVA Do checksum and paste in the meet chat Start the intro of the app Interrupted few minutes later and said 'after you complete the intro, explain all the code line by I explained the whole app in detail in a single flow (including the models) and also explained th When I had finally reached the API, he stopped me after few seconds and made me change ba When I did it successfully, he said okay great that's it from my side and ended the meet immed That's it. No questions asked about project or theory. I had consumed 40 minutes of his time with my explaination. So he didn't go for any questions Lasted for 45 mins.	He was somewhat rude and uninterested right from the moment he joined the meet. As if someone was forcing him to take the viva. Cannot predict the behaviour of the examiner from this sheet. They behave differently with different students at different times. Maybe he was annoyed that I had hijacked his lunch hour. But he was patient. Did not interrupt. Gave time to figure out things when I got stuck once or twice. He wants detailed explanation. So explain everything about your app in complete details right from the start. Consume as much time as possible. Then he'll not bother to ask further questions. Practice the code changes that he asks, from this sheet. He always asks to do the same styling changes.
8/15/2025 15:02:39			Level1_31 - viva 1	Checksum App demo (only asked me to show admin dashboard) Changes in code - parking lot, vehicle 7-8 questions All the questions were related to coding part	VIVA 1 was equivalent to VIVA 2
8/15/2025 15:47:52	Raghav	8/15/2025	Level1_95	check for ID_card check for github collaborator access use only code download from viva portal then start application LLM percentage should be given in report application complex scienarios like in vehicle parking app if a person books parking site and ac Code question like where you handeled this error and template inheritance (show example in c Authorization vs authentication(show example) what is cascading?	Very chill proctor. Go through code ones and stick to the other question in this sheet of same Proctor. Best of luck
8/15/2025 17:43:04		8/15/2025		Demo Asked me few code changing ques. Http methods Database	Seems like viva 2
8/15/2025 19:25:31	Rajnikant	8/15/2025	L2_25	*Level* 2 Proctor : I2_25 *Easiest proctor ever* 1) Show id card 2) project demonstration 3) Code overview 4) Change location of create account to top 5) What is @app.route? 6) url_for vs redirect 7) ORM 8) Sqlalchemy( ) object or class 9) Backref vs backpopulate 10) MVC End. Thankyou Raj , feedback from my side is enhance your knowledge in OOps concepts.	Chill guy
8/15/2025 19:46:13			Level 1_92	Show ID. Show GitHub Repo and added Collaborator. She asked me If I can do the checksum. I told her that I'm not sure about that. Even though I knew :) So, she allowed me to download from dashboard and run in front of her. After that she asked couple of theory questions e.g. what is ORM? Show where u used orm? What will be the raw SQL for some qu	
8/15/2025 21:45:39	Padhai me dhyan do...naam jan ke kya karoge		Level3_13	He is a good proctor. As long as you know your project, you can do well. Asked for the demo initially. Code changes were to check if the password is more than 8 characters, had at least 1 upper and lower, and special case character. Asked theory questions that are normally asked, such as mvc, tuple vs list, get vs put, Asked me to explain my models.py which I did in detail, also asked about the app.py few details.	
8/15/2025 21:46:12	Nahi bataunga		Level3_13	1. Intro about you 2. Your learning from problem statement 3. Demo of project 4. Explain code in app.py file 5. combine admin and user page sign in option 6. Create a button which can delete all lots together and show its working 7. Truncate vs drop in sql 8. Restapi meaning and use 9. Explain models file Will give you proper time, for coding, explanation etc.	
8/15/2025 21:48:03	Hakla		Level3_13 viva2	He is chill First he told to introduce myself And asked to demonstrate And tell to add an image in the background in login page. And told to explain the app.py line by line in detail. Then, ask a few theoretical questions like mvc, difference between list and tuples and where have u used, and differ get and put

Timestamp	Your Name (if you want, y	Viva Date	Viva Proctor ID (the id which was sent to you in	Questions asked by the Viva examiner (Write in points)	Any suggestions/tips to fellow students for this examiner?
8/15/2025 23:02:15	Underworld mein jigra Yaa	12/13/2004	level1 96	If you will get this proctor. You are Lucky! 1) Ask for ID Card 2) Ask to download project from portal and demonstrate. 3) Have you implemented summary chart. If yes, then what you have used for charts. 4) Have you use AI. If used, then have you mentioned it in project document or not? 5) Which architecture you have used for you project?(MVC) That's all. She gave a positive response and ended the meet.	Just present your project nicely and explain the code parts if she asks. She will probably not ask any other questions.
8/15/2025 23:12:04	R priyadharshni	8/15/2025	Level1_93	1)ORM 2)explain the models and routes 3)jinja template inheritance use 4) explain database schema 5)what are frameworks used 6)where sqlalchemy is implemented. 7)how connections are made from frontend to backend. 8)execute the CRUD operation at admin side. 9) reserve slot and cancel it. 10) show graph representation of admin side. 11)show users management.	Just be ready with your id card, git hub page for showing collaborators, and downloading page of project from portal. Prepare this question along it you should know your project codes well.
8/16/2025 0:01:06		8/14/2025	Level1_92	*explain orm *MVC *where did you initiate database *which function in flask help with jinja tem	More interested in database part. She is patient so be polite and answer. It'll be fine
8/16/2025 1:46:51	Shield Hero	8/15/2025	Level1_138	Proctor ID: Level1_138 (Duration 57 minutes) 1. Show ID card 2. Project Demo - 10 mins 3. Explain the complete flow of the code(templates) - 3 mins 4. Similarly he asked to explain flow for controller(CRUD routes) - 3 mins 5. Explain models.py code and the schema used with all the relationships between models - 4 6. Open any template and explain what the jinja functionality you used here - 3 mins 7. What are the benefits of using Jinja2 templating - 1 min 8. Which methods did you used from RESTful in your backend code - 1 min 9. What are the functionalities of different HTTP methods - 1 min 10. In edit route which method is used POST or PUT? - 1 min 11. If PUT is used for updating then why you used POST there? Difference between POST and 12. Made code change in my inline CSS part in admin dashboard template - 5 mins 13. Go to the signup page add one more field named as phone number such that after submitti 14. What is the difference between APIs and Controllers - 2 mins 15. What is Flask blueprints? (Not answered) 16. What is inheritance in Jinja2 - 1 min 17. What is the hierarchy of CSS you used and its types - 1 min 18. Gave me positive feedback he is very cool and calm proctor(5.0 rating)	Be thorough with every part of your code and thoery. Proctor is easy going and kind. All the best.
8/16/2025 7:34:21	Julie	8/15/2025	level2_139	level 1- 1) asked to show ID card 2) download submission from portal and show models 3) He first asked questions and told me to write Jinja for loop 4) asked to login as admin , add new lot , edit lot , reduce spots to 0 and 1 , checked users , su 5) login as user , book a spot, vacate spot , summary charts and logout	He is calm and supportive . Good Luck!!
8/16/2025 8:27:11		8/15/2025	level1_131 (11:00 am-12:00 pm)	1) first tell me the project workflow (ex:-controller.py , models.py etc) 2) asked me to open admin dashboard html page and asked what is 'name' 3) tell me to run the app and create a booking spot 4) authorization, authentication , validation 5) block element, inline 6)a git command 7)code changes: - 1) db command to add a parking spot at 10 no spot 2) told me to make cards of admin dashboard line by line as column as	She is helpful and also give feedback
8/16/2025 10:08:00	Ut	8/15/2025	Level1_96	Ask for ID card github repo and to download the submission from portal Run the app and demo Show summaries from both sides Application context vs request context in flask What is jinja2 how it is used in your app	Chill proctor
8/16/2025 12:55:41	sumit	8/15/2025		show documention of AI/LLM used run the project checked core funcanality of demo what is cascade show ER diagram relationship between tables show the cost calculation part

11/19/2025 23:16:31			level1_93	followed the exact same pattern from viva rubrics then asked theory questions: 1.what are the frameworks used 2.how are you separating the user, admin, and doctors in models code 3.point out where you have done the initialization for flask 4.point out where you have used or initialized the database 5.Show me any one of the templates, Point out any line where you have used jinja 6.Are you using template inheritance 7.tell me how you're passing the data from the front end to the back end or vice versa 8.do you know about ORM 9.tell me the order of execution of CSS styles 10.tell me amongst the frameworks or modules that you have imported, which was the first one	very calm and the bestest proctor u can get, she'll let u explain everything and be polite to her and see the viva rubriks before u submit ur project since i missed a partial feature in my project :(
11/20/2025 11:33:01	No Name	11/18/2025	Level2_135	First, we greeted each other and asked about my day • He asked me to show the GitHub collaborator page • After that, he told me to download the submission from the website and asked me to share th • He asked me to run the app and explain it's features and also checked the edge cases • He told me to open my code and explain the models.py in brief • Then asked me a few theory questions like 1)what's ORM and what ORM have you used 2)Frameworks I've used 3)what's RBAC and it's implementation in your code 4) HTTP methods and difference between POST and PUT, give an example for POST in your c Finally, he said your evaluation is over and asked me if had any questions and then wished me	Chillest proctor ever, helped me throughout. I was getting a errors in the edge cases but he didn't seem much bothered with those, only wanted to make sure whether I'd done it on my own. No worries about this
11/20/2025 20:00:54	Atharva	11/20/2025	Level1_103	For Viva1: First asked me to demonstrate the website (blacklist, appointments (if ones books an appointment 1. What is the use of delete-cascade and backref, why are you using them? 2. Show Jinja in your code 3. What is ORM 4. What are all types of HTTP methods, and describe why they are used	it will be blocked for other patient), search function of admin)
11/20/2025 22:02:02	Anonymous	11/20/2025	Level1_viva1	1.) If having checksum ready then provide that or else download project from portal 2.) Install dependencies(if virtual env created) Explain the whole demo to proctor each of the functionality in 10 min 3.) Add, edit doctor, and edit patient from admin side 4.) Show demo by searching doctor and patient from admin side 5.) Remove one doctor try to login from his side 6.) Go to patient dashboard to perform live demo by booking same appointment at same time a 7.) Go to doctor dashboard cancel patient appointment and it should reflect in patient dashboa	Very friendly in nature give us time also if thing not working also suggest and very friendly Make sure your each of the functionality mention in core milestone working well each of it or else he will catch and ask why this happen
11/20/2025 22:08:53	Sumaiya	11/20/2025	level2_127	Level 1 viva *show id card *show github repo collaborator *show id card *project demonstration *asked http methods *asked all core functionalities *asked to write jinja for loop on notepad *asked one line from code	proctor was good enough..try to be confident
11/24/2025 12:36:19	Manikandan R	11/19/2025	Level1_viva31	Asked id card, check_sum . checks all the app core functionality, asked to change the code wh	she is very straight forward. checks all the functionalities which were mentioned in the milestones (only core) and asked two theory question. so be prepared.
11/25/2025 12:06:25		11/25/2025	level3_24	Level 2:- Show id card Provide checksum/download file live from the portal Give a demo Explain all the codes Can flask endpoints return boolean? What will happen when we render an empty table? (Ans:- header part of table will be there with blank body)	Explain all the codes line by line.
11/25/2025 21:28:48	Susmita Bhattacherjee	11/25/2025	Level3_43	Asked to show ID and then asked for project demo 1) Which CSS you used? How many types of CSS are there? Which one is best to use? 2) Which architecture you used? Explain in your code 3) Difference between Authentication and Authorisation 4) Basic difference between session and cookies 5) How different routes communicates with each other? 6) Explain your db schema 7) Does all your datas are hard coded? If not, then how the data is populating 8) CODE change: Asked to change UI of LOGIN page	He is very cool, calm and soft-spoken and supports a lot
12/2/2025 16:12:31	Name	11/27/2025	Level3_11	• running of application + detailed explanation of models • what is SPA • difference between authentication vs authorization • what is lazy loading • what is RESTful • appointment workflow (availability -> booking -> completion/cancellation) • difference between PUT and POST • explanation of the app on the part they ask • difference between HTTP vs HTTPS	Depends on the examiner and your confidence about your app. Theory questions come regardless of whether implemented in the app or not. Going through the viva FAQs in detail is enough for theory. Just chill!
12/3/2025 19:26:09	Narendar Modi	11/27/2025	level3_45	LEVEL-2 ---She asked 25+ questions which i forgot...writing only those which is remembered---- 1.Demonstrate your project 2.What is MVC architecture? 3.Template inheritance 4.Https methods 5.Post,put,delete,patch,update 6.Backref and backpopulates 7.How database is creating and how do you check if your project is running or not,explain it. 8.How tables are created? 9.Explain relationships between tables? 10.How to convert one-to-one relationship into one-to-many? 11.What is Scalability and Concurrency? 12.What is space padding? 13.How does flask handles routing? 14.How template inheritance working?	She will ask you many questions but basics ,which you should know.She is quite strict but also supportive!...if you got this proctor then prepare your best!
12/4/2025 15:34:56		12/2/2025	level1_91	- demo of the app - checked features from view rubrics points on portal - explain user class - what is ORM? explain - what are http methods - difference between get and post

12/5/2025 14:04:11		12/5/2025	level1_102	Show the functionalities of all members Add and edit, doctor and patient How to prevent patient from booking twice What is MVC?	Just be confident, the proctor is super chill and very supportive.
12/5/2025 14:12:59		12/5/2025	Level 1 Viva 1 (in meeting it was proctor 96)	1. Download submission and run the project 2. Explain request response cycle 3. Redirect vs Render Template 4. Have you made GitHub repo	The viva ended in 15 mins and just 2 questions from his side
12/5/2025 14:59:30	Amit Shivhare	12/5/2025	level_01_95	first asked to show id, then asked to show demo asked functionallity then asked to explain one route of my prject then asked to explain the one html file what do you know about template inheritance different http methods	keep calm go though the code you have written know everyline about it chill protector give positive feedback to me
12/5/2025 16:38:26	Anonymous	12/5/2025	Level2_142 Level 1 Viva	1. Show ID Card 2. Checksum - Mine didn't matched at the moment, it matched when i checked it when preparing, but not then, he asked to download from Viva Portal and run it directly without checksum 3. Demo of my project 4. He asked to create a page with 2 input fields (Integer) + submit button, on submit, route to new page there show sum of those input fields	
12/6/2025 13:50:26	Bharat Maheshwari	12/4/2025	level1_91	1. What is CDN 2. How do you get a user from SQLAchemy query 3. What is bootstrap	
12/6/2025 14:47:54	Hash Birla	12/6/2025	level1_viva31	1. joined 10 minuntes late. 2. greetings, 3. asked me to run checksum, for which i said my pip needs an upgrade and upgrading it migh 4. asked me where is my flask initialization. 5. asked me what is db in db.create_all(). 6. asked me show the models. 7. asked me login from different roles, and to show her different functionallities. 8. then asked me to change the appointment booking code so that a patient could not book mo 9. asked me what is flash and how are you implementing it in html, which i just used in my code 10. asked me diff b/w inline, internal and external css.	all of this took just 15-20 min. not very chill but you'll get by with the proctor easily if you dont panic.
12/6/2025 19:43:02	Sudarshan	12/6/2025	Level2 142	MVC Architecture,DOM,CRUD operations , ORM, What database you have used Write a code in which you have one page with input and submit button and after filling it should	Don't forget basic code flow even in level 1 viva , make sure your laptop won't lagg
12/6/2025 21:22:50	-	12/6/2025	level1_106	1]Write a Flask code to return Hello world 2]Jinja functionality 3]Template inheritance 4]Default Flask port 5]Can the port for flask be changed	
12/6/2025 21:41:40	Lohith	12/6/2025	Level1_129	Theoretical questions : Explain MVC and How Controllers are being implemented in your proje	Chill proctor was late by 5 min. Just be confident in what you answer and show everything he asked for
12/7/2025 11:30:49	Someone Else	12/7/2025	level1_106	LEVEL - 1 VIVA 1. show your student ID 2. show GitHub repo collaborator 3. Download project, unzip and run. 4. Demonstrate whole Project 5. No theory question asked 6. Open your patient routes and delete book_appointment route and rewrite whole in google do I was literally unable bcoz I have seen level 1 viva questions from previous students..my bad :(7. Then asked me to write register route full function. 8. In docs make full registration page using only HTML with custom form fields given by proctor Then viva ended !! and mujhe pta lg chuka th ki mera toh game baj chuka h :)	bhai level 2 ultra pro max vla prep ho tb jana viva mein...they can literally ask anything baki tumhari kismat rhi ab..is Sheet k bhrose mt rho !!! GOOD LUCK!!
12/7/2025 17:00:13		12/7/2025	level1_131	LEVEL 2 VIVA THEORY QNS - - explain project structure - open models.py and explain relationships - how have you defined 1:1, 1:N, N:M relationships in the code - how have you implemented add doctor logic, what is the data flow process - what are http methods - can you use put instead of post for a form? what will happen if you use put? - when is post method triggered? - what goes inside the parentheses in url_for() and redirect()? options - /login, login.html, user_ - authentication vs authorization - what is version control? - what is the git command for creating new branch? CODE CHANGES - - write ORM query to add a new department to the department model - on admin dashboard it shows total no. of doctors, patients, appointments in a row - make it so - create a new file test.py and write a route /course/course_name. it should print "course is [cou - consider list a = [1,2,3]. write a jinja for loop to print elements in 'a' that are greater than 1	just be confident and know your basics for routes and jinja syntax
12/7/2025 20:08:45	Vahrun	12/7/2025	level1 103	First downloaded the app Then asked me to go through all the features that are there for the app Proceeded to ask about cascade, backref, and back populates then asked about MVC after that asked me to write a app.route then asked me to explain about the get post routes for the login route in app.py that i coded asked me to show a view and explain it briefly that's all i could remember	the examiner asked practical questions that are related to the project, so try to have a example within the project.
12/7/2025 20:44:44	xyz	12/7/2025	level1_106	Level 1 Viva: Asked me to show ID, Github repo download code from portal and run explain all core functionalities in detail frontend and backend logic of doctor search functionality when logged in as patient (expected t open notepad and code patient registration flask route	very chill examiner. just be clear and to the point in explanation.
12/7/2025 21:09:30		12/7/2025	level1_107	level1 viva 1) show id card 2) show github collaborator 3) gave me the option to download or do checksum (i chose the first option) 3) asked demo (i took some time and explained neatly, always take time and explain it properly 4) have you used flask, sql alchemy, jinja for this proj? literally thats it	she is very chill and respectful. just mind your manners and keep everything open beforehand to avoid delays
12/8/2025 13:10:17		12/8/2025	Level1_139	Level 2 Viva She is a bit strict Ask more theory questions. Asked to do some changes in the code. Using paint, draw three circles and explain MVC. What is ORM, have you used. Is your database structure or not. Gone through my CSS and asked about various things I have used. HTTP methods. Overall she took only 30 mins, but was a bit strict in nature.	Just have a strong grip on theory concepts.

12/8/2025 13:44:49	Ridhi Sehgal	12/6/2025	level1_93	LEVEL 1 VIVA 1. She was very sweet 2. Firstly, she asked me to share my screen and show the github repo - collaborators 3. Then, she asked me to download my submission from portal and demonstrate my project 4. which frameworks did you use 5. how are you separating the user, admin, and doctors in models code 6. Show me any one of the templates, Point out any line where you have used jinja 7. Did you use template inheritance? 8. tell me how you're passing the data from the front end to the back end 9. tell me the order of execution of CSS styles 10. asked me to simply write the syntax of if loop of jinja {%if%} {%else%} {%endif%} That's all	She's very sweet and patient, You're lucky if you get this proctor I booked the 9pm slot on 6th dec
12/8/2025 14:07:36	OM_R	12/8/2025	Level1 103	1.Show the id 2.Checksum 3.Create Doctor 4. Register new patient 5. Avilable slot 6. Book 3 slot 7. Cancel one by patient 8. Cancel one by dr 9. Completed one by dr and adding all info 10. Admin can block and deleting patient 11. Checking database for patient history 12. What is Authentication and Authorisation 13. Open note pad and write login route controller	
12/8/2025 14:57:19	Amandeep Singh	12/8/2025	level1 128	I. First asked me to show id, then github to check collaborator and tell me to download and seti II. Then told me to show some Core functionality and ask to explain how it is working in code, h III. Ask me to change code in search query so that if I write some department name , doctor of IV. Asked theory question 1. Difference between authentication and authorization 2. What is ORM And some common theory question like MVP and other. He Ask only 4, 5 common theory ques	He is very helpful, i am bad at English communication, he gave option to talk in Hindi, also one thing doesn't work in front of him, he said no problem it's ok then countiue to ask diffrent question
12/8/2025 15:13:40	Hash Birla	12/8/2025	level3_11	Level 2. 1. Asked to show the working of the webapp. 2. Asked to create, update a doctor and set their availablity for the week. 3. Asked to Book an appointment for the same doctor. 4. Checked if we could book more than one appointment for a single day. 5. Asked to Show and explain the models. 6. Asked what is lazy loading. 7. Asked the difference b/w inline and internal CSS. 8. Asked to explain my update doctor route.	Chill Proctor, Didn't ask for any code change. was giving me feedback in between the explaination like what more could i do to make it more user friendly.
12/8/2025 16:28:40		12/8/2025	lvl 1_95	LEVEL - 1 :-- Checked basic functionality Asked what is MVC Asked about Cascading Asked to open notepad and write a route which takes two nums as an inputs and return it's sur	Overall Good guy gave a affirmative feedback and asked to prepare well for Level_2
12/8/2025 16:51:26		12/5/2025	level2_127	show demo what is cascade in notepad write a jinja for loop in notepad write a simple route that returns hello world that's it	he is a chill guy just follow the sheet for this proctor
12/8/2025 17:40:02	Radha N	12/8/2025	level1 91	Show the id Download submission from viva workflow site Show the functionality of my website To explain line 10 and 11 of my code How to code if I have to change db from instance folder to static folder Can patient edit the information	Kind, supportive
12/8/2025 19:48:48	Priyadarshini Negi	12/7/2025	level1_93	1. She didn't ask for the checksum because I downloaded the project folder in front of her from 2. She asked me to show all the core functionalities (basically a walkthrough of the project, like 3. What tech stack/frameworks have been used, and for what purpose? 4. She asked for an explanation of how the project has been organized 5. How does the frontend connect to the backend? 6. What is SQLAlchemy? 7. She asked me to point out where each piece of code is located. 8. For what purpose has datetime been used? 9. A walkthrough of the code logic showing how the doctor can enter the patient's treatment de	Answer confidently and with composure, and make sure you know what is used for what purpose in the code. Use terms like 'authorization,' 'ORM,' etc, while explaining your code.
12/8/2025 22:15:18			level2 viva level1_130	* he don't want me to show the demo, just download the project from submission and open the * he asked me to explain the architecture, models and it's relationship and whole work flow of p * then point out any part of code and asked what does it do. * he asked me if patient book a appointment what's the whole work flow of it. * he ask me write a route for a page which take your first and last name as input and return the * then he give me a list ['head', 'nails', 'toe'] and asked to write a jinja code for returning words v * what is argument phrasing * what is api phrasing * write syntax of git branching * write syntax of git if you no longer want to track or end track of code * 1, 2 more theory questions	know you every part of the code, I mean every thing from "." to "-" every thing and work flow.
12/8/2025 23:01:17		12/8/2025	l3_12	demo of the app git is distributed or centralized? use of git other than tracking? what is the more use of distributed how it is better than centralized ? indepth knowledge of git a GET vs POST and their uses how is the database created show me in ur code? how is users logged in some apps for a long time like how they are logged in for so long? what is the id and name in the html ? DOM which language can manipulate DOM? ORM? indepth explanation of models.py only two basic changes prevent user from adding more than 10 characters in the password show the consultation fee in the patient dashboard	good proctor follow the sheet he asks almost same questions
12/9/2025 12:24:32	Monika	12/4/2025	Appdev_level1_viva1	VIVA 1: 1. Show the demo of application 2. Show double booking prevention of appointments 3. Authentication and authorisation difference 4. Lazy = true meaning 5. Blacklist the doctor and show what it does 6. Difference between Blacklist and delete	The proctor was chill and asked the questions on the flow of my demo. He made sure that we are not panicking when questions are asked.

Timestamp	Your Name (if you want, y	Viva Date	Viva Proctor ID (the id which was sent to you in	Questions asked by the Viva examiner (Write in points)	Any suggestions/tips to fellow students for this examiner?
12/9/2025 12:38:09	Monika	12/9/2025	level3_45	VIVA 2 1. Write a query to search patients from admin dashboard 2. Write a query to delete patient from the database 3. Write a route to view patient from admin 4. Explain double booking prevention from backend 5. Backref and back populate 6. Lazy = true and lazy = dynamic what it does 7. What is db.model? 8. Explain where and where your folders and files located 9. Authentication and authorisation difference 10. MVC 11. Why is GitHub used? 12. Did you use any virtual environment 13. What is name in the form search query 14. What is jinja 15. Difference between URL and redirect 16. Make css changes like align boxes in left to the centre 17. Inline and block elements	Very strict proctor, for theory go through the responses in this form. For coding part learn by blocks of search , edit, appointment, etc.,
12/9/2025 13:23:10		12/8/2025		1) How to make a new branch in git 2) marshal-with 3) Authorization vs Authentication 4) inline and block elements 5) basic jinja loops and app routes with parsing URL parameters. 6) They asked me to explain some lines and logic of my code (python and templates) 7) Explanation of my DB structure	Be strong in your basics and concepts. Don't get stressed.
12/9/2025 14:21:50	Somya	12/9/2025	Level2_142	Viva level 1 checksum was not working so i downloaded it from portal 1. Id card, git repo 2. Demo of the project 3. MVC framework 4. write a code to input value and submit button 5. which orm have you used? 6. How much percentage did you used AI/LLM? 7. What kind of help did you took from the AI/LLM? 8. show the model.py and the jinja templating used?	Proctor is chill guy, you should have complete understanding of your project and should be able to demonstrate the project completely. Be confident
12/9/2025 14:46:00		12/8/2025	Level1_129	1. Asked me to make changes in my code so that one patient cannot book two doctor's appoint 2. Theory questions: What is MVC explain according to your project. What is ON DELETE CAS	He is not that strict. Just do basic questions.
12/9/2025 18:57:42			app_dev1	1) git hub repo 2) download from portal and start the application 3) walkthrough the project 4) create doctor 5) doctor availability 6) edit doctor details 7) search doctor/department from admin dashboard 8) patient dashboard 9) appointment booking 10) same time appointment booking with 2 doctors 11) patient history 12) add sumary of appointment from doctor's side and visible from patient side 13) patient edit 14) asked me to change my code to show the successful appointments done by each doctor al 15) no theory question asked	he was patient and sweet
12/9/2025 20:42:28	Nishant Kulshrestha	12/9/2025	level1_viva31	LEVEL 1 VIVA 1. show id - then checksum(is not) - download the submission from portal 2. Core functionalities were asked like(register patient,add doctor, admin dashboard, book app 3. CODE CHANGE - Admin should be able to add only 5 doctors maximum. If limit reached, ad 4. what is database 5. explain user table 6. inline vs internal vs external css properties and difference 7. where have you initialised your flask app most of these were asked	Straightforward proctor ... ask questions rapidly and listens well to your explanation and will ask questions during your demo only like when i was adding doctor she told me to limit them to only 5 like that.
12/9/2025 21:44:24	Heater (you know if you k	12/9/2025	level1_131	1) Explain the relationships of models 2) Write SQL query 3) Write jinja loop 4) Write a route 5) CRUD - create new user and add 6) Explain the check availability route 7) In html page what is the name doing in input tag 8) In html , in the form tag what will happen if i change the method from POST to GET 9) What is command line 10) Gave option for what will go in url_for() and redirect(). Option - /home , home.html , home 11) What is DOM 12) route for endpoint like /sum/a/b where i want sum of a and b	Know how to present your code and how to write the codes like queries , route and all
12/9/2025 22:32:49	Kshitij Agarwal	12/9/2025	Level1_viva31	1. Show your id card 2. Show your GitHub profile 3. Demo of the complete project 4. She asked me write a code so that admin can not add more than 2 doctors. 5. Show Database 6. Show where app initialising 7. Difference between GET, POST, PUT, PATCH 8. Flash message frontend logic	
12/9/2025 22:52:18		12/8/2025	level1_viva20	Showed ID card Download project from portal Demo project Why is virtual environment needed? Open notepad Write a route to display hello world For loop in jinja Write a query in sqlalchemy Delete pre existing database Checks if admin is created automatically and the related code for it Create two doctor profiles Search functionality and how it was implemented (frontend, javascript) Create 2 patient profiles Checks if we show all of the available departments in patient profile Checked if cancelling and booking again on the same slot is possible Checks if booked slot can be booked by another slot Checks the process to give treatment Checks if doctor can be deleted Different between post and put methods Difference between put and patch methods Meaning of if __name__ and it's requirement What is a port What is the use of db.Model	Very chill proctor, don't worry!

Fill this sheet using this form https://forms.gle/769WTWE2NE2dPGx7A

Timestamp	Your Name (if you want, y	Viva Date	Viva Proctor ID (the id which was sent to you in	Questions asked by the Viva examiner (Write in points)	Any suggestions/tips to fellow students for this examiner?
12/10/2025 10:31:49	Divyanshu	12/9/2025	Level2_127	I'd, Github collaborator. All functionality check, Explain each models , Why u use (lazy = True), Write a for loop in jinja, Write a route for loading a html page, taking user_id as input ,	Be confident, sir is very chill, he gives u much time to do what he said, so don't panic.
12/10/2025 11:10:30	Sreejak Bhattacharjee	12/10/2025	level1_viva20	Setup the environment Asked to create a .txt file in vscode and asked to code a route which accepts data from the forr code a basic jinja for loop code an sqlalchemy query to accept all user of age more than 25 then we went on to the functionalities of the project like create different users like multiple doct Asked the difference between POST and PUT Asked the difference between PUT and PATCH Asked whether we can use PUT and PATCH interchangeably or not. Thats it ended the meet with wishing each other.	This is by far the best proctor you can get. I was a bit nervous and I told him that and he helped me calm down. He is very helpful and will help you with code or even setting up the environment if you get stuck. D
12/10/2025 12:24:35		12/9/2025	Level1_92	Show git Demo Change table to only see pending appointments Authentication vs Authorization Http methods and function	
12/10/2025 15:40:34		12/10/2025	Level 1 _96	1. Show the id card 2. Show the git repo 3.show the demo of the app with all the core functionalities. 4. Write a hello world using flask in a notepad 5.what is session 6.How we initialize flask?Show in the code .	
12/10/2025 16:09:23	RFB	12/10/2025		1) demo of the app 2) write code to establish one-to-one relationship between two tables 3) use of uselist=True/uselist=False in sqlalchemy relationships 4) about cookies and tokens, why are they used, are they hashed or not, etc. 5) write code to create a new patient	Stay confident :)
12/10/2025 16:57:22	Eram Nishat	12/10/2025	level1_96	• Download zip from portal and run app • Walk through the project and explain if all the core requirements are fulfilled • Show GitHub and added collaborator in repo • Theory about app context vs request, Flask sessions, cascade • Write a route to view all cardiologists Viva lasted for about 20 minutes.	Nice proctor overall. Try to get the app running within 2-3 minutes.
12/10/2025 19:21:17	Siddharth Bhaumik	12/10/2025	Level 1 viva 20	1.Project demo 2. Where is admin details being generated in the code 3. Show the database and checked if updated correctly 2.Difference between PUT and POST? 3. Can you use PUT and POST interchangeably? 4. write a flask route to render hello world 5. write a query to filter users above 50 years of age	Consideratel.Ended in 15 mins. Instructed what to do during project demo. The proctor has asked these questions in previous vivas too.
12/10/2025 19:30:43	Your Buddy	12/10/2025	appdev_level1_viva31	0. ID, show Github collaborator, download project 1. Full demo 2. Show model, how users are implemented 3. Change code so that Admin cannot create more than 2 Doctors. 4. Inline vs Internal vs External style (in CSS) 5. render_template() vs redirect()	
12/10/2025 23:00:09	Shruti	12/10/2025	level2_142	What are the models used show them in the code Basic crude operations demonstration (just implementation of our project) Asked to create a route between to HTML pages one to get the input and the other to display tl	He should have 10 minutes late I took around 5 to 10 minutes to complete the code but he said being an IIT student we have to completed within 2 to 5 minutes Max He said to prepare well for viva level 2
12/11/2025 8:41:28	Padma Kumar	12/10/2025	Level2_142	This is my MAD1 project level 1 viva. 1) First asked me to show the id card and github collab. 2) Asked me to download the project from the portal. 3) Full demonstration of the project. 4) Asked me to write a code for a simple app which takes one input and a submit button in one That's all. No theory questions for me.	Nice and cool proctor. Just prepare the questions of this proctor in the viva sheet. It's more than enough. Make sure to prepare that coding question also because it is asked frequently by this proctor.
12/11/2025 11:47:35	manish	12/9/2025	level1_96	1. demonstrate your poject (i took most time in that and he listen carefully) 2. what is orm 3. what is session management 4. diff b/w app context and request context Thats it	no need to worry, jsut do you presentation well
12/11/2025 14:16:17	drushti	12/9/2025	level1_viva20	- student id - install file and run it, why virtual environmet is used - where is the database stored, show the database and check if updates correctly -Write a route to display hello world -write app route with different methods like post, put -which is the pre defined method in app route (GET) -For loop in jinja -Write a query in sqlalchemy -complete app demo : create pateints, doctors, make delete modify appointments, check availa -techstack used to create charts -show code line which leads to - avoiding bookings at the same time, admin credentials -how is data stored to the db file -why OMR	v chill proctor, helped when needed. will ask to write code as well, don't entirely depend on project demo
12/11/2025 19:00:18	Aravind	12/10/2025	Level 2 127	1) ID card 2) Github to verify collaborator 3) Project demo 4) Jinja code for loop 5)Code for route with PUT and POST method 6) What's lazy??	He is very polite and professional. He usually asks the same basic questions, like the Jinja loop code, so be prepared for that. He doesn't go too deep — just the fundamentals. At the end, he said I did very well, that my project seemed good (though I know it's not great), and he also advised me to prepare for the Level 2 Viva. If you get this examiner as your proctor, consider yourself extremely lucky.
12/11/2025 19:52:59		12/11/2025	level1_92	1. Demo 2. Make changes in the table to show cancelled appointments in the admin dashboard 3. what is authentication and authorization? 4. Which function have you used to connect backend and frontend? One more question was asked about SQLite but I can't recall	
12/11/2025 21:26:56	Vithyasagar	12/11/2025	Level2_142	1. ID Card 2. Github to check collaborator 3. Demo of the project 4. Asked me to book appointments on the same date and time under same doctor so that it car 5. Then he asked me to create a new app route with taking a field as input, and with a submit b 6. Explain different HTTP Methods 7. Which ORM you used and why. 8. Which database you used 9. Is HTTP stateless or stateful and what is a state He asked me to rate my project on a scale on 1 to 10 That's it	Chill guy. Joined late. Very patient. Js be confident with your answer. Prepare the questions in this form alone. He ended by saying all the best for Level2.

Fill this sheet using this form https://forms.gle/769WTWE2NE2dPGx7A

Timestamp	Your Name (if you want, y	Viva Date	Viva Proctor ID (the id which was sent to you in	Questions asked by the Viva examiner (Write in points)	Any suggestions/tips to fellow students for this examiner?
12/11/2025 21:54:16		12/11/2025	Level1_93	Show me the main python file Show me where you have created database file Show me your templates and route What techstack you are using Run the application and show the features Question on routes. In them basically the imports and why i imported them. Questions on templates Question on css and order in which they are implementing Template inheritance Write code for writing a route which renders your name.	Very sweet proctor, helping nature. If you get her you are very lucky.
12/11/2025 22:46:29		12/11/2025	Level1_129	First checked my whole project deeply and checked for all the features after that asked me to s	Sir is chill if u know coding it's easy but if you don't he gonna check how much u know and ask for more and more
12/11/2025 22:58:47	Saudeep	12/11/2025	Level 1_129	After demo, he asked to add experience as functionality for doctor details in admin dashboard	Just practice code change properly he can ask to add or change anything in code
12/11/2025 23:08:23	Jeevan Prem	12/11/2025	Level 1 viva20 (25 min)	- shown id -explain admin creation functionality -post vs put -sql query notepad -jinja for loop notepad -route to accept html form input s in notepad -app demo End	Don't worry,similar viva questions as previous.
12/12/2025 10:29:28		12/12/2025	lvl1_96	show id card download project and demonstrate what is orm difference b/w get and post changes to code : show the top doctor name (doctor with most appointments) on the admin da	examiner was very patient with the project demonstration and also very chill and relaxed...dw too much just make sure yk minor code changes as well
12/12/2025 11:25:04		12/9/2025	level1_viva14	1. Download and Demonstrate Project 2. asked logic behind the booking of appointment by the patient 3. tested the functionality of app when a patient tries to book 2 appointments with 2 different dc 4. asked me to make an additional column in doctors table in admin dashboard that reflects the	Sir is friendly. but asks code changes mostly rather than theory questions. All the best for your viva :)
12/12/2025 12:05:04	xyz	12/11/2025	level3_47	Viva level 2: models theory (ORM, backref, relationships bw tables) flask routes (login management, authentication vs authorization) explain any one route in detail, how is it connected to front end bootstrap css basic questions code changes- change color, add an extra field in patient regn (model, frontend and route) and	proctor is very nice and helpful and patient, just be confident and know your code.
12/12/2025 17:13:04	Krishna Kumari	12/12/2025	Level1_viva20 (level1 viva)	1. Asked me to show id 2. Asked me to download project and run it after deleting database. 3. Before login as an admin, asked me to open notepad and write a route to display hello world 4. Asked me to login as admin and create two doctor profiles, edit department of one of them. 5. Then asked me to login as doctor and checked provide availability page and asked to book s 6. Asked to create two patients and then login as one of them and asked to book appointment, 7. Then login as doctor, update a patient treatment form. 8. Again login as patient to see medical history. 9. Finally login as admin to see upcoming appointments. 10. Asked me diff Between PUT and POST. 11. He was about to end viva saying he has no more questions to ask, but I asked him for feed 12. Viva ended.	The proctor is really chill, so just be confident and you are good to go. He was in a hurry so my viva was about 20 mins. He usually has a short time viva record. Follow the questions from this sheet of this proctor. All the best !
12/12/2025 17:52:58	Ayush Gourav	12/12/2025	level1_96	1.Show your ID. 2.Download and run your project if you don't want to do a checksum otherwise show it from yo 3.Demonstrate your project and show all the core features (I took about 15–17 minutes for this 4.Then he asked me to explain the relationship between my Patient, Doctor, and Appointment t 5.asked about the difference between Application Context and Request Context. 6.then asked me to write a query to get all patient history from the Treatment table. 7.Lastly, he asked about Cascade.	The examiner was chill and listened very carefully during the project demonstration. He asked me a lot of questions
12/12/2025 18:02:19	gowri	12/12/2025	level1_132	-asked why foreign key and db.relationship used in the same table, what is the difference -asked what can be used to modify only the name of the doctor table without changing other co -asked about 305 status code -difference between session.db and session storage -and some other such questions too, i can't remember now -coding question: function to delete doctor and jinja template to show the deleted doctor as wel	The questions were a bit unexpected for me. Sir asked me to make the file structure explanation quicker next time as he had to stop my explanation part before completing it to ask the viva qns and there was no
12/12/2025 21:18:43		12/12/2025	level1_106	Level 1 Viva proctor level1_106 - show student id, github code and collaborator - download zip file of code - unzip and run and explain project. show all functionalities - open text editor or blank file - write flask code for a simple hello world - what port is project running on - what is app context and request context finished in 15 minutes. tip - i guess if you explain everything and all functionalities work properly, they wont ask much. i had a small mess up where i couldnt remember patient login so i had to register new patient a	basically keep explaining your thought process and details and tell the proctor everything that you know about the topic they ask
12/12/2025 21:27:05	Vignesh N	12/12/2025	Level2_142	- ID card and collaborator in GitHub - Demo of project - I had used remember me feature. So asked how it worked and asked to show demo of it - MVC Architecture and show where it is implemented - Create a new route and template to add a input field and submit button so that it will reroute t - Asked which ORM and Database was used - Asked to rate my project from 1-10	The questions asked were mostly from Excel for this proctor. See that and also be thorough with your code and functionalities
12/13/2025 0:37:04	lazyy	12/13/2025	level1_viva31	checked all the core functionalities inline vs internal vs external css post vs put limit no:of doctors to 7 max	
12/13/2025 3:45:52	Someone	12/12/2025	Level1_129	Demo Coding: Asked me to add age column in add doctor functionality Theory: Explain models.py and relationships in it (asked for history table) What is MVC Diff between PUT and PATCH	

Fill this sheet using this form https://forms.gle/769WTWE2NE2dPGx7A

Timestamp	Your Name (if you want, y	Viva Date	Viva Proctor ID (the id which was sent to you in	Questions asked by the Viva examiner (Write in points)	Any suggestions/tips to fellow students for this examiner?
12/13/2025 13:33:18	Priyadarshini Negi	12/13/2025	level2_126	General checks (ID, GitHub, etc.) Difference between url_for and render_template. How to ensure a one-to-one relationship. Code change: -Add an age field while registering a patient -Ensure users below 25 years are not allowed to register -Store the age field in the database What is horizontal scaling and vertical scaling? Explain the logic behind the admin search patient feature. What is template inheritance in Jinja? Write the SQL query to search for a patient (in Notepad). Are foreign keys unique? Explain model.py	Be calm, don't fumble over your words, and if you don't know something, calmly say, "Sorry, I don't know." Make sure you know the logic of all the functions and can explain it articulately.
12/13/2025 16:19:32	Stranger	12/13/2025	level1_95	demonstrate project, explain 1 whole route, open dashboard html page, what is cascading, Open notepad and write a code takes two nums as an inputs and return it's sum with a string h	Proctor was quite scilent person didn't speak and say anything.... kind of not interested in taking viva
12/13/2025 16:30:48	V	12/13/2025	level1_95	1. Shown id card digitally. 2. Github repo 3. Checked Collaborator access 4. Asked for LLM Declaration percentage in project report. 5. Project demo 6. Asked to explain backend for patient booking. END - he said "that's it for level 1"	The proctor was quiet. I didn't know I was going good or not. So, I asked for feedback myself. He gave positive response but I still can't say he was actually satisfied.
12/13/2025 17:11:00		12/12/2025	lvl1_131	VIVA - 2 Explain brief structure of your project (how did u implemented models , views , controllers ? what is DOM ? explain diff b/w url_for , redirect() , render_template ? what is orm and why u used db.model ? what is flask ? Explain term stateless w.r.t to http ? what is diff b/w inLine and Block ? (that's all I could remember) codes write a endpoint of doc_avail again write a loop in jinja with several condition write a code to perform crud operation in db [20-25 mins overall]	be confident , she is very sweet and helpful
12/13/2025 21:43:53	-	12/13/2025	MAD1 - Level 2 : Proctor => level3_12	Login as admin, show adding department, doctor, CRUD on doctor/department Login as patient, book appointment, show medical history (appointment prescription etc) Login as doctor, change doctor availability, show patient history Show models.py and explain attributes in each model (overview) Given 10 mins- show fee for doctor and admin should be able to add fee fir doctor while creatir Ans: (added fee field in Doctor Model, added input type text and name=fee in html, then retrie What is https, why its secure What is ORM, Why do we use it What is DOM Which templating language used (ans jinja) What is Stateless When http is stateless, how we use login and it remembers (ans we use session to store user What is template inheritance Which is client side and server side in name and id (ans: name :server side, id: client side) Git is distributed? What distributed means here Uses of Git (Tracking, Collaborate..etc) Which version control system used (Git) Difference between GET and POST (ans: Get for fetching and displaying data, POST for send can we send data using GET (ans: yes we can send and it will be visible in url as query param In deployment, is this 2-tier or 3tier (ans : 3 tier brower, server , and db server) Notes: Total time: 50 mins He is in hurry up mode, asks question then you can gave him brief answer quickly He will give you feedback in between like this id is redundant in model	Go through all questions in this sheet, and use gpt to explain each along with cross questions and answers

Timestamp	Your Name (if you want, y	Viva Date	Viva Proctor ID (the id which was sent to you in	Questions asked by the Viva examiner (Write in points)	Any suggestions/tips to fellow students for this examiner?
12/13/2025 22:05:48	Ron	12/13/2025	Level3_12	0. ID, Download project or checksum, 0.1. Introduce Yourself, 1. Project demo (a little guided; like ... now do this) 2. Explain all the Models in code 2.1. He gave some worthy and gentle suggestions for good practice 2.2. Because I used password hashing, he asked me which one, "SHA" was my answer 2.3. What does this "backref" do? (in relationships) 2.4. I used "lazy" also, so said half line about it 2.5. How are creating all your tables? I used "db.create_all()" 3. What is ORM? (Theory Question) 3.1. What are ORM's benefit? 3.2. Show me ORM in your project. 4. Asked me to open certain page "Admin" > "Add Doctor" 4.1. then asked me to show the corresponding template in code 4.2. Where is the submit button (I showed it in template code) 4.3. Asked me to show & explain "Add Doctor" route handler function also 5. on add doctor page, add new field in form "Fee" -- He as guide said me that you need to make 3 changes: -- Template, Route handler & Model 5.1. Show me the Fee in sqlite DB (allowed to use any tool) -- I wasn't aware how to do that 5.2. Then how did you check your database implementation -- I said through coding output only 5.3. He asked me to update a view of doctor table, to see Fee -- It was a template change 6. Difference between GET and POST 7. Difference between id and name 8. What is template inheritance 9. What is more secure HTTP or HTTPS (I said HTTPS) 9.1. Why? - How is data secured in HTTPS? 10. When a form is submitted, and route is not defined, then which route it goes to? 11. What type of VCS is GIT? 11.1. How is GIT helpful? Why do we use GIT? 12. How is session managed? (session and cookies concept) [I hope I am not missing anything]	He is genuine and nice person. Prepare well, you will do good.
12/13/2025 23:03:26	Vaishnavi	12/13/2025	level1_20	print hello world write a jinja for loop fetch user aged above 50 and then checked if my application contains all the core functionalities	it was hardly 20 mins very chill guy all three questions he asked me were repeated ones which i read in this form
12/14/2025 1:47:01	Prateek	12/13/2025	Level1_20	1. Asked me to write a SQL Alchemy Query to select users over age 50 2. Asked me to write a route with a custom field 3. Asked me to write a jinja loop 4. Asked me to demonstrate app 5. Asked me doctor adding code in my project and ask me to locate it in the code 6. Asked me to explain it line by line 7. Asked me to show my forms.py file 8. Asked difference between Post and Put	He is chill, and calm person and would give you enough time to demonstrate. Just work on the points I mentioned, you should be fine.
12/14/2025 6:47:53		12/13/2025	level3_45	1. Demonstrate your project 2. Explain project folder structure 3. What is MVC 4. What is ORM 5. What is VCS 6. Stateless vs Stateful 7. Html semantic tags 8. Some CSS questions (basic) 9. What is template inheritance 10. How would you load more data from another column in Jinja using a for loop 11. Add a welcome message on dashboard 12. Add a text to the navigation topbar and make it appear in the center 13. Demonstrate any one template and routes used in it 14. Flask routing 15. Explain flow of any one Flask route 16. url_for() vs redirect() vs render_template() 17. request.args vs request.session vs request.json 18. Flask handle files 19. Debug mode 20. Authentication vs Authorization 21. What is secret key 22. Where are the user credentials stored when they login 23. Asked me something about the login page and route, checked if admin could create a doct 24. Explain database models 25. Foreign key 26. Relationships one to many and many to one 27. How to achieve many to many relationship 28. What is the secondary parameter in relationship() 29. rollback() in SQLAlchemy 30. commit() vs flush() in SQLAlchemy 31. get() vs filter_by() SQLAlchemy 32. Write a SQLAlchemy query and Flask route for a new table called "Diseases" and update d 33. Demonstrate creation of new doctor and patient, book an appointment and check conflict 34. Explain how data was loaded on the dashboard 35. Handling testing in a situation without front end just backend connection 36. Change some stuff	She was strict but supportive, questions were rapid fire and had to be answered within one minute or else she would move on. Make sure to prepare all questions in this sheet.
12/14/2025 11:12:16	Jeevan Prem	12/13/2025	Level3_11	Viva lvl 2: -Showed id -showed app demonstration -explain models.py -explain doctor create route -SPA(Single page application) -Authentication vs authorization -post vs put	Chill, very easy, easier then level 1,no code changes
12/14/2025 11:14:56	Ravi Kumar K	12/8/2025	Level1_92	1.First, She would check whether you add a collaborator on GitHub? 2.Show the complete project demo : Login as Admin, Add a Doctor, Add a Patient, Book an App 3.Which function is used to connect backend and frontend? (render_template() in Flask) 4.HTTP Methods. Where is only GET request used in your routes? 5.Difference between GET and POST 6.Authentication vs Authorization. Explain how authorization is implemented in your application 7.Code Modification Task (Live Change) : •For me she asked to display only completed appointments in past appointments section. Show •Explain the logic after making the change 8.Dashboard Functionality : Explain what each dashboard does 9.How data is stored and retrieved. How tables are related (User, Doctor, Patient, Appointment 10. Explain any route or function she points to. Explain filtering logic used in queries	Final Tip (Based on Your Experience) •She is polite and supportive •Focus is on functionality, not trick questions •Know your own code •Explain in simple words •Perform exactly what she asks during the demo

Timestamp	Your Name (if you want, y	Viva Date	Viva Proctor ID (the id which was sent to you in	Questions asked by the Viva examiner (Write in points)	Any suggestions/tips to fellow students for this examiner?
12/14/2025 11:50:14	Ravi Kumar K	12/10/2025	Level1 126	Quick Go Through The Application. Ask you to disable your auto complete on VS code! 1. Explain hashing? if not implemented would ask to Hash your password? 2. Explain the Model.py file 3. Explain admin_dashboard Route. 4. What is uselist (I have used it While defining a relationship in the model.py file, so he asked) 5. What is the difference between redirect and render_template? 6. What is templet inheritance? 7. He would ask you to write SQL query in Notepad : Write an SQL query to create a table nan 8. He asked me to add another search functionality to filter the doctor by experience? (As I did 9. How does Jinja Access the Variable? 10. How to write a for loop in jinja? Tip : Be prepared to make any changes in your code. Especially with the Admin, Doctor and Pa	Tip : Try Booking a slot in the night for around 8-11PM, You get the proctor level details via email a day before the viva in the Night before 10PM. This way you get approx 12 hrs to prepare according to the proct Refer to the Viva question asked by this proctor previously and prepare accordingly. This way for sure you will be able to clear your Viva.
12/14/2025 13:08:47		12/13/2025	level1_93	• Asked for a demo (she gave me intructions what to do and i followed them) • Asked me to show the main file • Asked me to show where i have done the imports • Asked me about sessions • Asked me about CSS priority • Asked me about what frameworks i have used • Asked me about some error codes which i couldn't answer • Asked me to write a route to display my name	Proctor was really good and helpful. I was nervous before but got at peace as soon as viva started.
12/14/2025 17:40:08	omen	12/14/2025	level1_14	1. Show your code and start demonstration. 2. Differentiate between frontend and backend validation. 3. what is jinja 4. how relations are implemented 5. He asked examples for everything. 6.cascading in database 7.security implemented if not how will u implement it 8.if any core functionality is missing then implement it	honestly very cool person gave time to think helped to implement stuff and help understand clearly what he is asking and if any functionality is missing would say to you to implement that on spot make sure ever
12/14/2025 17:55:07	Jougachar	12/14/2025	level3_45	1. Explain folder structure 2. Explain render template 3. Add disease column in patient table 4. Db.relationship def 5. Backref and backpopulate def 6. Usecase of secondary 7. Go to controllers and explain route for patient 8. Diff bw get and post 9. Can we send data through get 10. Request.form and request.args 11. Use of render template 12. Diff bw get and filter by 13. Use of fstring 14. write a piece of codee in jinja2, where the code will display a dr name and the patients ass 15. Write a code in jinja2 , where it will look for appointments for a particular patient,, if there's 16. Structured and unstructured database 17. Write a route for updating patient treatment form 18. Patient name should be clickable in dr dash,and when dr clicks on this than it should redire 19. app demo 20. Authentication vs Authorization 21. Z index in css 22. Semantic tags in html . 23. SQLALCHEMY benchmark or something . 24. How do you return json in flask . 25. How do you change host/host no. 26. Default port no. Of flask 27. How will you test the database without creating frontend. 28. Version control meaning 29. Use of virtual environment 30. Use of debug=true	She is helpful and friendly .just have a deep understanding of theory concepts and few code changes ..
12/14/2025 18:57:49	M.K.	12/14/2025	1_14	1.Show collaborator on GitHub. 2.Show your app. 3.Show functionalities of all users(Admin, 1 Doctor, 1 patient)-- this will be checked in depth: -- register patient, --register a new doctor, --book an appointment, --cancel+ reschedule an appointment, --check if you can do multiple appointments at the same time. --check if a patient can access their prescription. --check if doctor can access their treatments. --check if doctor can change their availability. 4.What is the primary key of each model(in the code). 5.Write a code to show the list of all doctors, their departments, their experience in years on the 6.Show how your changes are getting updated dynamically. Theory: 7.Explain all HTTP methods 8.Explain cascade. 9.Explain how you are doing backend validation.	Know your code. He asks almost same theory to everyone(Check other entries). But he will give coding task.
12/14/2025 19:50:00	Siddharth Bhaumik	12/14/2025	Level3 viva12	the exact same code changes and and questions were asked on 13-12-2025	10 mins given for code change. Expects fast answers.
12/14/2025 21:26:54		12/14/2025	level1_92	1. What database have you used 2. Have you used ORM, which ORM have you used, where is it in code 3. What is ORM 4. Change Code to reflect appointments which are only completed and not all appointments (I 5. Show an example of a frontend and a backend validation (I did not have that in my code so I	If you download the project, the checksum won't be done. Open github to show repository. Start app and start vs code. No need to formalis the flow, the viva examiner will ask you to show functionalities one by o
12/14/2025 21:49:26		12/14/2025	level1_129	came about 10 minutes late 1) id 2) github collaborators 3) asked me if I had already downloaded the codebase and I had so he asked for checksum 4) ai usage 5) asked to add experience column for doctors and show on patient side (had to delete db for t 6) on theory question, what is cascade all delete 7) by then it was pretty late so he just asked me if all the functionalities were present, no demo	the 'add experience column' coding question seems to be very common with him so certainly do practice that, he also repeats his questions so go through the same questions of his in this spreadsheet and youll
12/14/2025 22:04:15	Nilay	12/14/2025	Level 3_43	Level 2 Viva: Said to do demo of application and then basically asked- Describe your database design Explain architecture like MVC and your database models Describe how your authentication works Is authentication session based or token based What's is diff bw session and cookies What's the diff types of css and css selectors. And asked a schema qstn,that's it Literally	Very chill proctor,aakshay is his name,he was great,didn't asked me any code exchange.he asked almost same qs like previous sheet,do check them,all is repeated.He even gave me feedback,great guy.You're l
12/14/2025 22:43:02		12/14/2025	Level3_24	Level3_24 feedback Level 2 Same questions as the previous feedback Yapp till he stops you and ask questions	Yapp as much as u can

Asked theoretical questions. 6.1 What is SPA. 6.2 What is inline styling. 6.3 What is cascading effect wrt databases. 6.4 What is the difference ilike function and like function (I used ilike for search functionality, bu 7. Said he was done with the assessment and asked whether I have any questions or not. I asl 8. Did not ask to do any code changes.	Prep well according to what your proctor has asked in the past.
12/15/2025 16:03:34	naam jaanke kya karoge	12/15/2025	level3_42	Level-2 show id demo(has asked do this try this and this means he check s the functionality in the demo only h then asked about the route he pointed out the line number to explain its usage how database is created how it is connected to your app asked about relationships how you implemented authorization in code DOM Bootstrap how used and why scaling(not directly but with scenario what if multiple user try to your app) code written exception handling in one route on doctors registration page add confirm password then validate in route give scenario what and how you handle the situation if we want to add city to the doctor field h	keep calm he also helped you in code if you stuck just go through the question get ready to face practical questions instead of direct theory questions
12/15/2025 17:15:46	Ganesh S	12/15/2025	Level_3_45	1. She asks lot of questions once you answered. Please make sure, you practice the questions	She obessed with css z index idk why, then routes and models, jinja templates, simple simple code changes, very good proctor, very motivative, kind, strict all in one. lol
12/15/2025 19:32:32	-	12/15/2025	level2_127	Demonstration Authorization vs authentication Different request methods GET vs POST open notepad, n write if loop in jinja Proctor level2_127	proctor is chill
12/15/2025 22:50:54	H	12/15/2025	Mad 1 level 1 thisnis masked now	Full demo of project. Model is normalised or not. What are 3nf, 2nf, 1nf forms. Wht is difference between 3 tier and 2 tier architecture. What is MVC ? How it's used in the code. Write code to take a input from a page and display it into another page.	Id's are masked, so can't use specific questions. Good luck
12/15/2025 23:10:49	noora	12/15/2025	level2_126	viva2: 1) asked me to show the demo 2) while i was explaining he asked a lot of theory ques, and mostly he asks repeated ques. i fo 3) asked to explain admin search functionality 4) asked to explain admin dashboard template 5) to close the flash mssgs i used a bit of JS, so he asked ab that. i didnt know what to say cuz 6) back populate vs backref 7) render template vs redirect 8) asked me to explain models.py and all the relationships. he is very patient cuz in a hurry i ac 9) for code changes he asked to set an age limit such that patients under the age of 18 cant re 10) asked me to explain admin functionality and then he asked me to write a raw sql query in n 11) he also asked me to provide slots as a doctor, told me to provide 2 slots at the exact same	proctor is friendly and patient. if u get him just focus on the ques present in the sheet already becuz almost all of the ques are repeated. i booked for 9-10pm slot and my viva lasted around 30 mins
12/15/2025 23:43:20	Teichmüller space	12/15/2025	Level3_47	1. Started off by instructing me to setup my environment and installing requirements. 2. Identify MVC in my app - which moved on to explain it by doing some action, like registering 3. Code Change. Asked me to add an address field, in doctor's registration. So I had to add a r 4. Another Code Change had to do with changing minor text colors, what bootstrap class I'm us __No more code changes__ For theory questions, I had to describe my database relationship in detail. I described I used "U Some explanation for keywords like, "redirect", "url_for", HTTP methods, "CSRF"(which I could	The proctor is very calm and gives you enough time to explain your thought process, kind of trusts you to speak for yourself rather than rapid fire questions. Please practice minor code changes, and learn about
12/16/2025 12:56:32	Krishna Kumari	12/16/2025	Level3_42	Level 2 viva : - Asked me to set up my camera, download project, checked id card as well and asked me to r - started with the demo but he himself started mentioning what he wants to see further so went - asked a bit about models like why have I used orm, why user mixin, just basic questions over - same for routes, he specifically asked for doctor delete route and asked me to make a change - asked what is scaling, how would I go for large scaling apps - in models, asked for relationship between appointments, doctor and patient - also asked why did I have extensions.py (i was getting a circular import problem in my model	The proctor is really calm and nice, he just focuses on the project and ask relevant questions, doesn't go for theory much. The proctor really just wants to check if the student is clear with the basics of app, for the rest he does help with writing code, i was nervous while editing the code so he did explain me what I should be doing an
12/16/2025 16:44:34	Shahil Khan	12/16/2025	level1_132	-asked to write a route to edit a doctor profile - write jinja flash message and fecth the new info - aksed about error code 305,306, - why we get bad request error ,	be confident to write the code
12/16/2025 19:06:15	Harry	12/16/2005	Level1_103	Gave option if i want to download the zip file through portal or show the code saved locally. Asked to demonstrate the project and checked about the functions. Then asked me to open notepad and write a code to go to homepage from search page(basica Then asked to write flask login route with username and password. Then asked me to open any template and show where jinja is used. Then asked questions on: What is MVC What is difference between Authentication vs Authorisation Explain GET vs POST Then asked for questions i have in mind.	You should know your code well. I actually misunderstood in homepage question due to language barrier. He is too kind. He switched to hindi for convenience. If you are not comfortable in english, dont hesitate i
12/16/2025 22:27:32		12/16/2025	Level3_42	1.demo 2.mainly he focused on doctor's 3.y used bootstrap and show me the code how u used it 4.about Authorization and authentication and its implementation 5.template inheritance 6.write a code so that admin cannot delete a doctor if he has active appointment using appoint 7 .about reln between appointment and doctors,patient	Go through the previous questions in the form he is chill and nice guy accept it if u don't know the ans but get good understanding about ur code
12/17/2025 10:49:43		12/17/2025	level3_42	1) checksum and oppe setup 2) demo (checking functionality) 3) where is authentication and authorization implemented 4) how relations are defined between models (in code) 5) (code): make sure no doctor with existing bookings gets deleted 6) exception handling and HTTP codes 7) where is bootstrapping in the code and where and how is it used 8) if i am familiar with javascript, i told him i wasn't but the charts in my project were js which i c 9) what is your understanding of scaling 10) are you interested in app dev the viva lasted for less than 30 minutes, he said i did well and had a good understanding of the	look into the questions he's asked previously, he's pretty chill if you don't know certain things as long as your basics are clear you're good, you got this!

3/17/2026 16:09:02		3/17/2026	level1_95	Interview Flow Summary Asked to show ID card Asked to log in to admin dashboard and demonstrate functionality While explaining company module: Asked about logic for student applying to a drive Asked how you prevent duplicate applications You hadn't implemented it Asked how you would implement it → slight confusion, but logic idea was correct (placement m Technical Deep Dive Asked to demonstrate the full application You used this to buy some time Interrupted and asked to: Show frontend files Appreciated your frontend structure/organization Code Review Asked to: Explain models file → you explained well (no follow-up questions) Show all project files one by one Noted: One unused file in your project Conceptual Questions Asked: How to change admin dashboard appearance You mentioned Flexbox Also acknowledged limited frontend expertise (honest answer) Asked: About HTTP requests (types of requests) Key Observations Strong points: Good frontend structure Decent model explanation Weak points: Struggled with real-time logic implementation (duplicate apply) Slight hesitation under pressure	backend was very important to him
3/17/2026 17:25:54		3/17/2026	level1_14	THIS IS FOR LEVEL 1 - asked for github collaborators - ID card - Schema diagram - checksum validation and pasting - What is ORM - Can you show if only approved drives are seen by the student? - How do you ensure that a student can apply only once - How is ORM being implemented and what is the name of the library that does it - Backend validation and frontend validation with examples - Code change -> asked how to add a column that gets the number of applications put by a stu	He is very chill, answer confidently. If you don't know completely, finish what you know and tell what you dont know.
3/17/2026 18:09:41	Om Prakash	3/17/2026		1.Demonstrate the functionality of your application. 2.Show me the dashboard of company. 3.Write code for Logout button on a notepad. 4.What is CASCADE in database. 5.What are different methods in your application and what are their use. 6.Show me how the route is working for a particular action on button click of your application. 7.How to put constraint for duplicate entry in a table in a database ? 8. download your application from github and run it in vs code.	know your code well, if any functionality not implemented , then say it's not implemented , but you should be able to explain, how you can impliment that functionality , at least the logic if not the whole code
3/17/2026 22:20:45	Ananjay	3/17/2026	viva20	Show me where admin is adding programatically? (basically show him .env) Show me exact code which is defining after log in user will redirect to which dashboard, as adn SQL Alchemy notepad code is must to go, he ask it (I didnt wrote all the questions bcoz most questions are repeat)	All the questions were same which previously asked just 2 are extra which he even emphasised on. He is a very chill guy btw
3/18/2026 13:55:17	Aryan	3/17/2026	level2_131	1. First he started with demonstration, showing the full app and functionality 2. Show me your models.py 3. What is MVC and how it is applied into your application 4. what is jinja and why is it needed in your application 5. What would be harder if jinja was not present in your application 6. Explain the specific part of code, what it does and the logic No code changes were asked.	He's super chill, He emphasized on application demonstration and its functionality, but also asked basic question which were already there in the VIVA PYQ. Just focus on the code logic, understand it properly. VIVA-1 is super easy, you just need to understand the logic behind the code. and try to explain the logic behind the code while showing the demonstration. For example while adding an entry during the demonstration, explain where it is added, how it is added, and what is used in the whole process from clicking a button to the end of process. It's basic, but only if you know the LOGIC
3/18/2026 15:09:47	kk	3/17/2026	appdev_level1_viva33	firstly the proctor gave me two options either download my project zip folder from iitm portal or Q1)show me your collaborator Q2)run you app Q3) give me demo about your app Q4) he asked me about functionality of some buttons Q5) do you have edit profile and history button in you student's dashboard Q6) proctor asked me some theory questions like 1)url_for 2) explain your login method 3)defir	Just know your code ....dont panic ....if some of the functionality is not working in your code its fine just be honest about it .....overall , the proctor was very calm and relaxed

Timestamp	Your Name (if you want, y	Viva Date	Viva Proctor ID (the id which was sent to you in	Questions asked by the Viva examiner (Write in points)	Any suggestions/tips to fellow students for this examiner?
3/18/2026 15:30:15	NA	3/18/2026	Level1_93	Asked to show the id card Then asked to show the GitHub collabrator *Asked to do the checksum *I then ran the project *She just asked me to show the core functionalities,not everything *She just checked the main functionalities of admin, student and company dashboards *Asked about types of css like inline,internal,external *Asked to show the models and controllers code *Open notepad and write a for loop in jinja *A route returning hello world	She sounds like a chill person My viva completed in 13 mins.. Just know your project...
3/18/2026 15:51:20		3/18/2026	level1_93	1. Either download the file in front of them, or do checksum. 2. Give the demo. After which they will ask you to switch to your code. 3. Explain what frameworks you have used. 3. Open routes and explain the what 'url_for' is imported and used for. (basically can ask for an 4. Write/Share syntax for a route. 5. How can we use a for loop in jinja 6. Are you using template inheritance 7. Order of CSS Priority	Overall very nice, the viva was over in about 10-15 mins, I joined 10 mins earlier would suggest the same, the proctor will join early too and you can start the viva and end it accordingly. They even gave feedback
3/18/2026 21:48:55		3/18/2026	Level2_142	LEVEL1 viva: DEMO- Q first asked to show ID and repo then checksum or download project from portal and open in editor then run project and show the demo asked around 5 general flow questions like- if company blacklisted can they still log in? etc asked to show all the different roles in detail in the demo then asked to explain models file THEORY-Q asked MVC, RESTful, APIs, use of Jinja2, explain tech stack and why they were used CODE-Q frontend validation: change the password requirement to minimum 8 characters backend validation: ensure there is a special character in the password and show error msg if i	learn your project well and be ready to explain your flow
3/19/2026 10:19:21		3/18/2026	appdev_level1_viva33	1. I was asked to write an SQL query and a flask function to pass a parameter from the url and 2. Explain url_for and redirect. 3. What is put and patch functions. 4. Explain the HTML form used.	1. Show your id, GitHub repo and mention if you are doing checksum or downloading from the submission portal. 2. Show your demo and if asked explain your code.
3/19/2026 11:18:49	Ayush Gangwani	3/19/2026	Level1_129	1. Asked me to show whether i have added collaborator or not then show the project , add dum 2. then asked me to reject 1 company and approve another 3. Project functionalities pe questions ki yeh Aisa kyu hai aisa kyu nhi ho skta? 3. then asked me to add salary field in Placement drive (i added the salary field but in compan 4. What is MVC ? 5. Cascade = all,delete ? 6. http restful api ?? all methods	The proctor was chill , just be confident and know everything about your project.
3/19/2026 12:20:30	el wiwi	3/19/2026	level 1 95	• demo of admin,company,student • template inheritence • https methods • asked to explain line containg jinja2 templating • asked me to write a route which gets 2 var from html form and basically add them	Just know your project and he's nice
3/19/2026 14:55:15		3/19/2026	level1 95	1. show ID 2. show github and some files in it 3. download from the vivaportal, no need for checksum 4. asked me showcase the file, interuppted me after a min to ask questions 5. did u use template inheritance, cascading and what they are 6. did u stop a student from applying to the same drive again, how 7. https methods explain 8. write a code in notepad taking 2 num from the user and printing their sum with "hello" 9. what is lazy=true 10. explain some stuff from the admin dashboard html file	Just follow this sheet for this proctor, he's very polite and gave a good feedback as well my viva was over within 15mins
3/19/2026 20:07:20		3/19/2026	L2_142	-LEVEL 1 VIVA - PLACEMENT PORTAL Show ID Card -Run Checksum or download directly from portal and use -Explain full project -Asked to see some features in company side, admin and student side. -what techstack was used and MVC -have you implemented ORM -show your models, how many are there - asked me to open notepad and write a code for a small app that takes my name and displays it in another page. had to write the app route, input page html and output page html	
3/19/2026 21:26:53	Ananjay	3/19/2026	level3_24	Everything was same as in asked by others (flask boolen, client storage....) No code change	He is chill guy, dont care whats going on. Just yapp as much as you can. Yapp random things (if over, can say same thing in diff words) just dont stop yourself
3/19/2026 22:37:26	MAD Vivas Team	3/17/2026	All Proctors	Do not try to be oversmart. We will spend the first 20 minutes understanding your project, then That question will decide whether you pass the Level 1 viva or not.	Do Not try Be Oversmart in front of examiners , These examiners have taken 300+ vivas , many of them taken 800+ vivas & these examiners also use AI to generate , so they understand which code is AI gener many of these examiners have multiple hatricks of taking vickets of players like you in a single day. Some of these examiners take 17-18 vivas in a single day. Many stdudents are banned for 1 term , many are repeating course + project both for cheating / plagrism / malpractice. Accept your mistakes , show some professionalism. If you accept your mistake , you will fail only. But if you become arrogrant , you will be added to malpractice sheet as well.
3/20/2026 15:07:10	Hitesh	3/20/2026	Level2 131	1) Present the application 2) what is jinja? 3) what are the different Http methods you know of? 4) what is MVC? Show in your code what is M V and C. 5) Open notepad and write a controller code to fetch all users and render in a html file	He is supportive. Gives you hints if u are stuck somewhere
3/20/2026 16:51:20	*	3/20/2026	Level3_45	Level2 See the previous questions by this proctor Be ready to explain every file u have used in ur project Practice some frontend changes like changing the alignment and all What is difference between redirect and url_for Write a code so that all the drives will be automatically closed according to their deadline	Be strong with the basics She took my viva for 40 min Don't panic ,if u ask time she will let u think Even if u were unable to write the backend code ,just explain the backend logic,she will accept it
3/20/2026 17:19:07		3/19/2026	Level1_103	First he asked ID, github collaborator and print checksum in google meet chat Then he asked to show demo After demo, he asked to open code He asked if admin can search students and companies What is MVC He asked what is backref and lazy in my SQL Alchemy code He asked me to write a route with GET and POST Methods in Notepad He asked me where i used jinja He asked me what is the difference between Authorisation and Authentication	Just make sure you have all functionalities ready and know theory and your project well

Fill this sheet using this form https://forms.gle/769WTWE2NE2dPGx7A

Timestamp	Your Name (if you want, y	Viva Date	Viva Proctor ID (the id which was sent to you in	Questions asked by the Viva examiner (Write in points)	Any suggestions/tips to fellow students for this examiner?
3/20/2026 19:06:40	Sachiv	3/19/2026	level1_14	1.Asked to demo the project no interruptions 2.Asked to add a feature in student dashboard to display no of applications approved for the st 3.Then generic questions like http request, use of venv, frontend backend validation with exam 4. Very chill guy no interrupts 5. I explained all pages and routes deeply so the total viva took 35 mins	Be ready to code , For theory questions this sheet is enough In depth knowledge about models and routes helps
3/20/2026 19:11:29	RR	3/20/2026	Level1_96	- show demo - change button colour - What will happen after the student clicks on the apply button? - models me relation kaise hai o-o and m-o - where is the register route - etc	Sir is very nice
3/21/2026 16:11:32		3/21/2026		1. App demo 2. Jinja templating 3. Show the database models 4. Which ORM are you using? 5. What's the use of Jinja templating in HTML?	Just breathe and relax. The proctors are humans too and they were also students once, just like you. They're not going to eat you. Just be confident in whatever you're saying even if it's wrong.
3/21/2026 19:06:17	Shree	3/21/2026	l1_96	1. show the whole app. 2. limit the number of drives a student can apply to 2. 3. distinguish the newly made drives by changing their background for students 4. show the git repo	Sir is a great guy, interact well with him.
3/21/2026 23:32:14		3/21/2026	1_93	level-1 1.show the model 2.why import request, render_template() 3.Internal server error code 4.open one of the template and have you used template inheritance 5.priority of css 6.write the form, for loop in notepad 7.write the syntax to add id in student table in notepad 8.how to send data from backend to frontend 9.Have you used orm? which orm is used? 10.Checked the core functionality of the app by demo	
3/22/2026 11:51:54	Raushan Kumar	3/21/2026	Level 1_103	Can you show your Student ID? You have two options: either download your project from the portal and run it, or perform a che Register a user as a company and demonstrate the functionality. Show your project functionality. Open your notebook and navigate to the login route. Which HTTP method is used in the login route? What are HTTP methods? What are the functions of different HTTP methods	The proctor was very polite and supportive.The overall interaction was smooth and comfortable.
3/22/2026 12:42:52		3/20/2026	Level2 142	1. i explained my portal to which he was listening carefully and was silent to an extent where i t 2. then he asked me to edit the drive in the company dashboard 3. to blacklist student from the admin dashboard 4. he asked me to write a route that prints my name in the notepad 5. he asked me to go to my models.py and asked me what is MVC and to list the frameworks a 6. He asked me what is JINJA used for apart from these he asked me to show the github and show the collaborator, and checksum an	i feel as if the proctors are looking for anything that could make the student eligible to pass, they are so patient and listening and just learn your project and prove them that you learnt.
3/22/2026 13:25:14		3/22/2026	Level1_viva16	1)Asked for id and to show GitHub collaborator 2)Project demo 3) In between the demo he asked, can students apply more than once for one particular drive a 4)Here and there asked me how things are working on the frontend. 5)He asked me about jinja2 template and where the data is coming from 6)I was also asked what crud operations are and to show how it was implemented in the backe 7)ORM and SQLAlchemy 8)Code question: When the company gets blacklisted, make sure that any drive from that particular company(evi	He was patient and even explained the question when I was not able to understand. Just try to explain what you understood from the question asked and try to implement it and don't let the pressure get to you.
3/22/2026 13:46:16	Yuvraj Singh Mor	3/22/2026	level1_129	1. Open GitHub 2. Check if collaborator added 3. Open Viva Portal and download the Submitted Code 4. Create two companies and two drives 5. Noticed a loophole that while creating drives application deadline for previous days can also be added so asked me to add a validation for application deadline	
3/22/2026 15:53:48	vijayaraghavan	3/21/2026	level2 131	1) show id,show,collaborator,download code from github 2) create student,company and show	He was cool, helped in the notepad syntax
3/22/2026 17:16:23	T.D.S.	3/22/2026	appdev_level1_viva34@study.iitm.ac.in	Proctor id: appdev_level1_viva34 Started at sharpe 3:30 pm. - Asked me to show my ID card, which I did by showing them my id in docs for downloads section. - Asked if I wanted to work with pre-existing file and then provide checksum or download from the portal. I downloaded from the portal. - I asked if I can open the project in VS code to which he replied affirmatively. - He then asked me to run the project and demonstrate the functionality. - After demonstrating they asked me to add a dummy button so that it is only visible to admin whose active was to transfer the administrative power. > To this I added the following code to the index.html for the admin: ``` <a href="{{ url_for(admin.transfer) }}">Transfer</a> ``` > And the following route: ``` @admin_bp.route('/transfer') ... pass ``` - Then he asked me to add a route so that Just "hello" appears on the screen. Which I did. - Then he asked me the difference between http and HTTPS. Which I did. - He also asked what is meant by MVC. Which again I did. That's all I remember. Went pretty smoothly.	
3/22/2026 18:36:06		3/21/2026	Lvl2-142	Level 1 Viva 1. Download submission from portal 2. Demo 3. No of tables in models.py and what are they? 4. Frameworks used 5. What is Sqlalchemy ? 6. What is Jinja2? 7. All purposes of using jinja 8. Write a basic route in notepad 9. Then apply password must be of 8 digits with special characters both front end and back en	Level 1 is easy if base is strong Know what part of your code does what
3/22/2026 18:36:54	HADES	3/22/2026	level2_131	1)Add company for registration and approve it from admin 2)Add Drive 3)Add Student Record and Apply for Drive like this he check for every imortant features and asked question related to it For Theory he asked for Http methods (i actually forgot about update of he corrected me on that as well), For Code he tasked me to write the controller program to fetch all company data and forward them to fro and then in front end how will i iterate though each record using jinja	Proctor is very helpful and calm, he even corrected me when i doing mistake in my syntax during coding task. overall very smooth viva .In the end he even gave a feedback of my performance as well , with smal

3/22/2026 18:46:04	Anon	3/22/2026	level1_viva20	1. Show ID and Download the project from the portal 2. Create a virtual environment 3. My Db instance was already populated so I was asked to delete it and made a new one , po 4. Asked me a demo, saw all the functionalities. 5. Asked me to write a basic Hello_world route in notepad 6. Then asked to alter the hello_world route to accept inputs via a get request and show them 7. Asked why we use API's in SD. (basically to separate out clients and server, security and sca 8. Asked me to change the bg color of app to black. 9. Asked me how excatly the search functionality in my app works through code. 10. Thats it	Know what you've built, the proctor is pretty chill, also go through basic operations in flask
3/22/2026 18:49:23	Apurav Kashyap	3/22/2026	Level2_127	First, he asked me to show my ID card. Then, he asked me to show my GitHub collaborator access. After that, he asked me to download the project from the viva portal. Then, he instructed me to set up and run my project. I took a little more time to set it up, so he After that, I demonstrated my project and explained its core functionality. Then, he asked me to write code for a route that accepts the PUT method and also write an if c At last, he asked me to explain MVC.	The examiner is very kind and supportive. You can focus on the core functionality and also review the previously asked questions from the sheet
3/22/2026 19:24:10	Rise of Devil	3/22/2026	Level_1_106	LEVEL 1_106 (MAD 2 LEVEL 1 VIVA) download project from portal and show ID card run project have u implemented RBAC? Show where you have implemented RBAC. Have you used JWT tokens? Tell me how JWT tokens work. open notepad and create an endpoint to send all past appointments. Have you used celery and Redis. Show me where you have used Redis. Why do we use Redis? (it is fast) Show me your admin dashboard and features. Show me your doctor dashboard and features. Change colour of a button in doctor dashboard from green to blue. Show me Doctors' Availability setting feature. Show to updated availability in patient dashboard. Book an appointment. Show email being sent (i had to update the code a bit for this). Show GitHub repo and collaborator.	Was really chill.
3/22/2026 22:46:15		3/22/2026	level1_viva20	tested core functionalities asked to change navigation bar to any other colour what is api difference between css & bootstrap difference between post & put write a jinja route in notepad	
3/22/2026 23:22:37	Pavan	3/22/2026	level1_14	1. Show GitHub repo and collaborator 2. Run the project from portal download 3. Full demo — register company, register student, approve company, create drive, approve dr 4. Code modification — show total number of drives a student has applied to (count in route + i 5. Difference between frontend and backend validation with examples 6. What is ORM, are you using it, why, advantages 7. What is venv and why do we use it	Proctor is very chill and guides you through the demo step by step Know your code well — he asks you to explain logic before modifying. Practice the code change — adding a count variable in route and displaying it in template For theory the sheet is enough
3/23/2026 1:13:19			mad 2 level1_viva16	1. demo 2. flask api 3. vue lifecycle hooks 4. token storage 5. vue model/bind 6. integration and flow	very good person, helpful and kind throughout the viva.
3/23/2026 12:34:09	Shradha	3/23/2026	Level2_127	My session was 11 30 to 12 00 I went inside the meet by 11 20 and he came by 11 25 1. he asked to show id 2. to show github collaborator 3. to show the demo(I explaine all functionalities, no interruption, u can use this time to waste) (at the start of the demo the website didnt open, i asked i ran the code before but no it's not he 4. he asked to show the code, asked model.py, in that he asked what is lazy(I explained lazy=t 5. At last he asked what do you understand by MVC the session was over by 11 50 so it was hardly 20 to 25 mins.	he was chill, half of the time he didnt speak he spoke only to ask questions or whenever i asked him anything. be calm. if you dont get any thing or error take your time and u can ask him also and explain what happened. All the best be confident in whatever u say.
3/23/2026 13:39:19		3/23/2026	level3_24	1. Can flask pass boolean values? 2. why did you use bootstrap and not CSS? 3. what are the ways you can store data? 4. what happends if you render an empty table?	Very chill proctor. He finished my viva in half an hour. Just explain your code in as detail as possible explaining different concepts and functions. No coding questions or changes were asked.
3/23/2026 15:40:01	Naveen	3/23/2026	Level1_139	Level 2 of MAD 1 - First the ID and checksum were vertified - Then I was tasked to explain what frameworks, I have used. - Then I was asked to explain my database. - Then came questions regarding HTTP Codes and to explain some. - Then It was about explaining how my controller is working (I mean how routes are connected - Then I was asked questions about the schema - Primary key - unique key - static method - relationship - use of commit Then I was tasked with running the app (it took a while) - Then I showed the updates of the page from the admin end. - Then I was tasked to set the frontend and backend validation - Use of get_or_404	My whole viva ended in about half an hour and the examiner was not just asking questions but also guiding me through them as I fumbled. My advice is don't take too much stress just know what your program is doing and why. All the best.
3/23/2026 20:07:28	Pookie Hulk	3/23/2026	Level1_Viva14	First he told me to show git hub collaborator then he told me to proceed further for the project c	He is too cooperative and best proctor ever.
3/23/2026 22:34:23	Anonymous	3/22/2026	level1_106	1. Change button color 2. Write route for searching student by name 3. type of http methods 4. what http methods used in the project?	
3/24/2026 1:48:28	xyz	3/23/2026	level1 128	Didn't showed the full project or demonstration asked to change code both frontend and backend jinja, flask, db, asked everything	nope
3/24/2026 8:37:23	..	3/23/2026	Level3_45	MVC MVC implementation in codes Debug = True Authentication Vs Authorization Make a button to link.. Simple jinja code = write a code in jinja: where the job title gets displayed only when the status of the drives is approved And rest questions asked from sheet only..

How is it different from HTTP Methods? 11) Explain login verify functionality without seeing the code. 12) What is template inheritance?	The proctor was chill and kind. Just do one thing, before viva begin greet him Good Evening. And at the end he asked me for any further doubt or query, so I asked him about giving feedback for me, he told me e
3/26/2026 0:38:46	s	3/25/2026	level3_42	He said good morning and asked me how i was doing then i told him i was nervous but he was 1.demonstrate the app 2.he did not ask anything beyond the code i have written 3.he is interested in knowing what i wrote in the code and asked me why i wrote this that etc 4.asked me about models,about orm,how relationship is formed, bootstrap, any api used, if i kr As for code change: asked me to add delete button for drive created by company but i got an e	Know your code very well like be ready to explain your kinda theoretically too. Sir is very calm and chill and polite. He is a young guy so i felt like he was more understanding. Even if u don't know the exact answ
3/26/2026 2:28:12		3/25/2026	level1_130	LEVEL 2 VIVA - PLACEMENT PORTAL 1) Show ID Card 2) Download project straight from vivaflow or run checksum 3) Give full demo 4) Explain project structure and models 5) Explain login route, stopped me at a random point and pointed at the code and ask me what 6) Explain company create drive route, frontend and backend 7) In company drive, add a new field called 'Age' as dropdown just in frontend and it should sho 8) what is the difference between block and inline elements? 9) difference between inline and internal css 10) difference between PUT and POST, can they be used interchangeably 11)what is an indempotent HTTP method. 12) how is the frontend html template connected to the backend	He seems very chill, he explains calmly and gives you sufficient time to answer, if you dont know just say what you know and say you dont know the rest, he'll move on. overall viva time was around 45 minutes for me.
3/26/2026 12:04:21	Aman Kumar Verma	3/26/2026	Level2_127	My viva level 1 is done today repeated questions is asked by proctor level2_127 like what is ca	If you understand code properly or like in this sheet your proctor is already taken viva other students so go to the question ask by proctor similar question asked by proctor many time and keep patience you are c
3/26/2026 15:44:57		3/26/2026	Level1 129	1. Open GitHub 2. Check if collaborator added 3. Open Viva Portal and download the Submitted Code 4. Create two companies and two drives and create two students and apply to those drives 6.AI percentage 5. Noticed a loophole that while creating drives application deadline for previous days can also be added so asked me to add a validation for application deadline where it won't accept a previous date 7. Asked theory questions: •explain cascade delete •how can we link two tables •explain mvc • put and post and it's difference And that's it. It was around 30-35 minutes	
3/26/2026 15:54:31		3/26/2026	Lvl1_103- sweet dude	Authentication v/s Authorisation MVC Login route with get and post method	Know your code
3/26/2026 18:04:03	H	3/26/2026	Level1_129	1) GitHub collaborator he asked to show 2) demo 3) while the demo he found out that the companies can create placement drives even if the dea 4) What is MVC 5)what is ON DELETE CASCADE 6)what is post and put He left me before 5 mins itself	He seemed pretty chill,he was patient Be confident you can crack it
3/26/2026 18:50:46		3/25/2026	Level3_12	LEVEL2 VIVA okay, so it started with him asking me to download the project and then run it during the demo, he asked lots of questions in between about what functionalities were possibl Now coming to the theory questions that he asked: MVC and to show it in the project where I've used it ORM and whether I have used it in my project. HTTP versus HTTPS Get versus post DOM Asked me to explain specific routes and the logic used in them Client and server side responsibilities Asked many more questions check the previous responses all similar to that (it was for 1hr) For the code change: Asked me to add a Pincode section in the form for placement drive information that is posted b	He will interrupt you a lot and ask lots of questions both about code and theory and he will rush you, just stay calm and be polite, pause to understand his question before answering. If you are thorough with this
3/26/2026 19:30:52	Tanishka Sharma	3/25/2026	Level1_viva14	1. Explain all the models, backref etc 2. Since i used unique constraint to stop duplicate application, he asked a hypothetical situatio 3. Have you used ORM what is it?	Very calm, well-behaved proctor, I was so nervous nd fumbling but he was understanding and pausing. If you have made the project yourself you have nothing to fear. All the best!
3/26/2026 19:41:51	saanjhi	3/24/2026	level1_14	1. difference between backref and back populated. 2. what is cascade, in cascade how parent and child are defined. 3. what is venv and what are its advantages 4.checked my model.py 5. all demonstration. 6. i have some issue with search bar so resolved it there.	be confident and try all to express your logic proctor was real sweet and kind .all the veryy best
3/26/2026 20:15:56	Aheartz	3/26/2026	Level1 107	1) Asked me to show ID (soft copy) and Collaborators in git. 2) Then I demonstrated the project and she didn't interrupt me in between. 3) Asked me questions regarding: -Can admin reject the companies? I said yes as he can manages students, companies n drives -Advantages of jinja. -Authentication vs Authorization. -GET and Post. Asked me to change code : -Simple hello route I answered all.	She was sweet n patient. Adviced me to prepare coding part well for the level 2.
3/27/2026 0:51:58	PkD	3/26/2026	L2_127	1.What is MVC. 2.What is nullable in your model 3.code question - to write a query which user filter. 4. to write for loop of jinja 5.asked about some functions of my project .	Overall he was very kind, Atleast prepare your basics and know you code.

3/27/2026 2:17:53		3/26/2026	Level1_131	1) No demo direct question. 2) Explain the basic structure of your project 3)Went through models files asked me to explain it then asked me specific questions like like w 4) Asked me diff btw GET and POST and can we create data using get. 5) Coding question- Make viva.txt file where u make route and a input form where the route tak 6) What is the need for name atribute in the form. 7) How does POST method get called- answer is the method= post in the form and then by clic 8) What is the code to fetch argument from url. 9)Project Specific question like how and where is the resume stored. 10) Why did u write <int:id> in the route and what will be the type of id in the subsequent functi 11)Why did i use blueprint class. 12) Explain the processs of profile change of student. 13) why did u write request.files.get for pdf and photo (show both route and html) 14) match the following with reason- redirect-/login, render_template-login.html url_for-user.log	Shes a very nice person. Quite helpful. Saw that I'm nervous and assured me there is nothing to be nervous about. Also talked about future plans and placement and guided me on how i could leverage the proje
3/27/2026 11:30:05	Poison	3/26/2026	Level1_viva20	Level 1 First asked to show the functionalities, simultaneously tested it Then asked to write a route that returns Hello world in notepad Then asked to change the background colour of app to black Asked Post vs Put What is API What are decorative functions Overall viva was completed in around 8-10 mins	He's very chill guy, after i downloader the zip from portal,the app wasn't running,like the whole laptop lagged, i asked him to wait for 5 mins until i restart it, he waited for 12 mins,just make that you know your cod
3/27/2026 12:03:41	Darshil	3/27/2026	appdev_level1_viva16	First he ask to show id card then he ask to show the github repo and collab then, he asked me to perform checksum or to download the project from viva portal after this, app demo whole functionalities and whole features of the web app in between he was asking to change any line in code and what would be its outcome on the ap to change the filter query in student dashboard then in coding question: to create a route for searching and statistics (just like on admin dashboard) a code of Jinja2 HTML to retrieve the data of total number of companies later on he came to theory part where he asked what is ORM SQL injections in ORM difference between 200, 201 message code difference between redirect_for and render_template	He joined 10 mins late but overall, the examiner was good he was chill and not strict he was helpful in between in some coding part and did not created any pressure he also help me in debugging some coding part and also explain me where i was going wrong
3/27/2026 17:21:50	Nans	3/26/2026	level1_viva30	Level 1: Asked to show ID Asked to download file from portal I demonstrated everything about the project Asked to show models, explained everything about the models Later asked to show some part of code like show create drive route and some other routes Later asked to show some templates, he went through all the codes Asked questions: ORM, Template Inheritance, MVC, POST & PUT Asked to open notepad, maximize it and write code: 1. An API route to search student with student_id 2. Jinja for-loop syntax	Know your project and explain. Be honest!
3/27/2026 17:42:42	Tanuj Nain	3/26/2026	Level1_103	1. Show the Project Demo 2. What is MVC? 3. What are REST APIs? explain GET POST PUT DELETE 4. write flask code for login route in Notepad 5. which tag is used to add signup button on login page, and to redirect to different page.	Go with full confidence, don't hesitate, he is really a chill guy done with viva in 15m
3/27/2026 19:19:44		3/27/2026	Level1_viva20	Be ready with ur bs id card GitHub profile to show collaborator And should download ur project from viva portal in meet Asked to show demo Checked core functionalites { he is asking one by one } Hello world route in notepad Asked to change website color theory questions .What are decorators .Diff between css and bootstrap . what is post and put	Nice proctor
3/27/2026 19:34:10	Rakesh Vajrapu	3/27/2026	Level3_13	Just now completed MAD-I Level-2 VIVA Proctor ID: Level 3_13 Feedback of Proctor: He's a very patient and nice proctor ever seen and doesn't over-complicate the students. He asked only normal most repeated questions for all VIVA's. Asked easy code change implementation. God has given me this proctor, because I got MAD-II Level-I Proctor very strict and he almost failed me even I answered all the questions asked. What happened during Viva: Initially, I joined 5 mins late and he patiently waited. Asked Self-Introduction Asked Problem Statement and What was implemented in project? Asked for Demo -> I given demo for 18 minutes and displayed working of each functionality and explored each role. Code Change Question: My Admin Dashboard displays the count of Total Students, Total companies, total applications, total drives, total placed students displayed as cards. He asked me to create a table, consisting of same names as Category and another column as their values. Made a Table using HTML, connected Backend route, and copied-pasted same query retreival code . I don't know he even seen it or not. Then, he asked me to make the data and the table center of the Webpage. Unable to make it into center as I am weak in remembering the CSS Properties and syntax. Theory questions asked: 1) What is Cookie? 2) What is difference between GET and PUT 3) What is ORM? 4) What is Database and how it is implemented? 5) What you learned from this project? Total Viva Time Taken: 48 minutes	
3/27/2026 19:56:38	Dhruv	3/27/2026	level1_93	VIVA - 1 (EASY PROCTOR) * TOLD TO SIT IN A OPEEE FASHION * SHE ASKED TO SHOW THE DEMO - TOOK 8 mins * SHE THEN ASKED TO OPEN APP.PY AND TELL ALL THE IMPORTS IN YOUR APP.PY LIK * THEN SHE SAID TO OPEN NOTEPAD AND SAID TO WRITE A ROUTE FOR PRINTING A L * THEN ASKED TO DO JINJA2 IF STATEMENT * THEN ASKED ABOUT ERROR CODES - WHAT DOES 500 ERROR CODE MEANS? * VIVA DONE IN 16 MINS	BE CHILL AND PLEASE PLEASE CHECK ALL THE VIVA QNS FROM THE FORMS, CAUSE THAT SAME ONLY THEY ASK

Timestamp	Your Name (if you want, y	Viva Date	Viva Proctor ID (the id which was sent to you in	Questions asked by the Viva examiner (Write in points)	Any suggestions/tips to fellow students for this examiner?
3/27/2026 21:11:05	e7	3/27/2026	Level3 13	MAD1 viva 2 (Double-click if full note not viewable) first the examiner asked me to show my Id card then he asked to give INTRO about me and the project to which I asked permission to download and open the submission which had project report, then I gave my intro along the project report then explain er diagram which I had in my project report then I gave the app demo, during which I was talking about for ~20min, he didn't ask que while CODE: Validate the password so that it has minimum 10 letter/char (used minlength [html boo THEORY : then he asked few theory ques one after another , like rapid-fire(it was fun) (these are not in order) 1. what is bootstrap (I've used bootstrap, he may ask this even if you don't) 2. PUT vs GET 3. list vs tuple 4. MVC (Model-View-Control) 5. finally what are the things I've learned after all that the examiner asked, if I have any ques, to which I asked for feedback, which I felt was amazing, he ask if my app had any thing that no other app in world has, (I said total viva time ~45-50 mins all the best!	This feedback form is the best resource relax and go though the que asked in the past initially I though this would be pretty difficult, but the proctors are awesome and there are alot of repeated ques for this form All the best! also please contribute to this form once your done
3/27/2026 23:54:06	Raushan Kumar	3/24/2026	L1_132	During my viva, he was first asked me to explain app.py then says to write the code of app.py. Then, they asked me to explain the difference between session and db.session. They also asked me to write and explain the code where I used dynamic URLs. After that, they checked my frontend knowledge by asking about Bootstrap and CSS. They spe There were several more questions, and overall, my viva lasted approximately 45 minutes.	It was okay, I am fine with what I did to myself. Compared to the rest, this is a bit strict. But I enjoyed it.
3/28/2026 0:15:39		3/27/2026	level1 107	Level 1 Viva 1. Asked to show id card and github repo 2. Asked to download project from viva portal 3. I gave the demonstration 4. Theory Questions: - which orm have you used (sqlalchemy) and what are its benefits? - advantages of using jinja - difference between authentication and authorization 5. Asked me to write a simple route which returns 'hello world' Viva was over in about 15 minutes.	It took me time to download the project from the portal as my laptop was working pretty slowly. Examiner waited patiently. Overall, seemed nice. At the end, advised me to focus on coding and preparing the demo better for level 2 viva. Go through all the questions in this sheet and you should be fine :)
3/28/2026 0:15:43	SV	3/27/2026	level 1_132	1. Show me your Id card 2. Explain folder structure 3.In your app.py why you initialised app=None, What will happen if we remove it I said it may th 4.Why we use app.context, ? Difference in app.app_context().push() and app.context() when to I answered but he corrected me . 5.After that write a code to close the drive after the deadline in a notepad. I forgot to write requ 6. In admin dashboard you used cards ? Write code only html to make cards in a row. I said I d 7.have you used Apis ? No sir .. Why ? It was optional and I am not comfortable using it. But it 8. Create a route and show display 404 message in terminal 9. Asked about status code 10. What security features have you used? What is SQL injection? Tell me one example of SQI 10.Finally Show me the demo of your app. It was utter silence I felt as if no one is in the meet. He said Overall it is a good app. Just work on the areas I suggested and know every line of your code.	He will start asking you questions directly from your code. He will go very deep.
3/28/2026 13:15:34	Subham	3/28/2026	level2_127	Github repo, ID card, download from portal Demo (10 mins) what is back_ref? MVC if statement in jinja app route using POST only	Chill guy very polite
3/28/2026 15:56:18		3/28/2026	level2_142	Level1 Asked to show ID card, Github repo Asked to download project from portal Demo of app (Asked to show each and every features of app) Show me your Models (Interested in database) Theory Questions: MVC HTTPS Methods 2-Tier VS 3-Tier Architecture Coding questions: Asked me to create a route that accepts input from HTML form and display it by using another	HTML page
3/28/2026 16:06:37		3/25/2026	Level3_13	Asked to show id, do checksum or download from dashboard Then asked to execute all the functionality of the web application (just explain in detail without Then asked to set certain restrictions for password like len>8, a special char,uppercase, lowerc Asked to explain the models used, with db diagram Theory questions: What is bootstrap Diff btw list and tuple Diff btw http and https Diff btw primary and unique key,etc	He was friendly and patient, be clear with the concepts.
3/28/2026 16:09:51	N/A	3/28/2026	lvl2_142	Show id Download project and run the application Can you change the resume? Blacklist any student and try to login that student Explain models.py MVC Create a route to take input and display it on another html page. Create form and display page HTTP vs HTTPS HTTP methods	Chill guy and giving hints
3/28/2026 19:10:08	sowmiya	3/28/2026	level1_viva20	-post vs put -Hello world route, jinja for loop in notepad -What are decorators -Why is virtual environment needed?	
3/28/2026 19:46:53	N	3/28/2026	L1_133	.Demo, stoped in between . Show MVC in code. . Show models, what thas cascade delete do, other forms of cascade(that I didn't know) . explain full flow of students dashboard, i.e, what happens after login (brouser -> controler -> .asked about some parts of code what they do. . Code change, in student dashboard display student name and today date. . Some ui questions	Know your code

3/30/2026 12:31:12	Mayukh	3/30/2026	Level1_viva30	Joined almost 20 minutes late.. 1. First asked me to show my Id 2. Then asked to download the file from submission 3. asked to run the code and show the process with voiceover, 4. In between demonstration asked if I added collaborator on Github 5. after demonstration,asked me to show my code,,asked to scroll down slowly,, 6. asked why I used lazy=True 7. asked me to show templates,specially Company_Dashboard. 8. asked what is template inheritance, 9. What is difference between PUT and POST 10. then asked me to open Notepad and told me to run 2 codes.. i. Fetch all details of User ii. Using Jinja2 for loop	Throughout whole demonstration sir was silent, spoke only to question something. He will watch how good your basics coding skills are,,Gives feedback after Viva and was chill I guess.,,I hope Y'all nail ur Viva..
3/30/2026 13:27:20		3/29/2026	Level1_95	•Asked me show id GitHub repo Then told to show demo and in between asked about how you are blocking the students from a •Asked to code a simple route where two num are give return sum	He told to focus more on theory for level 2 viva
3/30/2026 13:47:04	No need	3/29/2026	L1_133	Demo(stopped me in between) What is MVC and show in code What is ORM and show in code authentication vs authorization asked me to change the code to show date and student name on dashboard asked about cascade delete and cascade update what is horizontal scaling? (i didn't know this) asked me about different parts of code asked to explain all http method jinja for loop my viva got over in 25mins...	The proctor was friendly. Just be chill and answer..
3/30/2026 17:08:42	Meet	3/28/2026	level1_149 (Level-2)	1.Download the proj and run it 2.Checked the edge cases of my project 3.What is ORM 4.What is scalability? What are its type? and what do they do? 5.What is cell spacing and cell padding 6.explain models.py(your db file) 7. explain search functionality without seeing the code 8. Coding question: Add a new row in the drive section named openings to show number of op Took my 30 mins for the viva	The proctor is very chill he will help you if you get stuck while coding jus know your proj in and out and practice the theory questions in the sheet he follows repeated pattern of theory questions so prepare well
3/30/2026 17:15:11	Meet	3/22/2026	Level1_93	1.Download your project 2.explain request ? why have you used it 3. how do we pass data from frontend to backend and vice versa 4.checked the duplicate applications 5.show the admin dashboard 6.company dashboard 7. can students edit profile? 8.what is ORM? Basically she checks all core functionalities CODE QUESTIONS: write the syntax for a route returning hello world write for loop in jinja THATS IT!	You r a one lucky person if u get her she is very sweet,kind and helpful jus know your code well then u r good to go
3/30/2026 17:34:16		3/28/2026	level1_92	1. Asked to open GitHub repository and show the project 2. Asked about collaborators and when they were added 3. Asked to go to viva booking portal 4. Asked to run the project and demonstrate functionality 5. Asked to register as a company and create a post 6. Asked to approve drive and show approval process 7. Asked to register as a student and apply for job 8. Asked to shortlist a student and verify in dashboard 9. Asked to demonstrate search functionality (company/student) 10. Asked to show blacklisting feature and test login for blacklisted user 11. Asked to view all applications and jobs 12. Asked to modify query to filter jobs with salary > 1 lakh 13. Asked to explain the query changes 14. Asked to change UI (button color to blue) 15. Asked if ORM is used 16. Asked which database is used (SQLite) 17. Asked to explain ORM 18. Asked which function is used to pass data from backend to frontend (render_template) 19. Asked to show frontend and backend validation 20. General project demonstration and explanation questions	Examiner is calm and focuses on practical understanding. Be confident with your project demo, know your code (especially ORM, queries, and validation), and be ready to make small live changes.
3/30/2026 17:46:14	Anuran Ghosh	3/30/2026	Level 1_131	Ma'am is great and supportive. 1)Explain the outline of the project 2) Explain models.py and the relationships. 3) Write a query in Vscode by making viva.txt (Was having confusion she corrected it) 4) Code a route and html page to return a name input given by the user (my idea was right bul 5) To match between render_template, redirect and url for 6) About the secret key what it does why it's needed 7) About actions in the html page 8)Why did I use <int> in the route 9)Explain the shortcuts in the models and code one shortcut accordingly 10)asked to explain the resume storing part. 11) Asked what is _main_ and why is it needed.	Know your code, especially the models and backend thoroughly. She is really supportive, I fumbled lot of times but she helped me a lot. Gave me confidence as I was getting nervous. At the end even gave me a

3/30/2026 23:25:38	Aayushi	3/30/2026	Level1_131	• Write a query for retriving students applications • Write a route and home.html which take a parameter name from a form and show it on a brov • Match render_template, url_for, redirect • why <name> is used in forms • Realtionships between modals like one to one and one to many • how is relationship one to one • Why we use <int:id> in route • Retreive student with help of primary key	She is very calm and supportive. If you are not able to answer then she will provide hints and help you. Just go through her previous questions and 90% questions will be the same
3/31/2026 0:26:21	AnatanoHime-sama	3/24/2026	level1_123	Download project from portal, extract, show id, show Git Colab, Show codes write decorator, Fi	Just do it!✔
3/31/2026 15:51:44	Subham	3/31/2026	level3_12	Same as previous qs - check the sheet exact same qs	he will grill a lot - rapid fire qs but dont worry chill
3/31/2026 18:28:15		3/31/2026	Level3_12	ORM VCS and he loves database models.py 2 tier and 3 tier Backref GET POST How html pages connecting routes Template Inheritance Client server (know everything about it) All the questions from him in this sheet db.create_all() Code change : i have to Make a job_location in create_drive !!	He will say we don't have time but don't rush he will rush let him cook!! Know all things at least say one line to everything if you don't try to explain through his questions he is asking
3/31/2026 20:12:41		3/30/2026	Level3_12	Level 2:- -Idcard and downloading zipfile from viva portal -Asked demo { checked some core functionalites } -Asked to point out website particular page in code and we should explain -Asked to show mvc in code And explaining flow like route and mode and template connection with some example from cod -asked to add pincode in creating drive { It should able to store the pincode into database also} Asked some theory questions just refer to previous responses that are same mostly	Nice proctor
3/31/2026 22:42:55	Level 2 viva	3/31/2026	Level1_133	show demo explain models show MVC in code what is ORM explain different http requests explain one full route (student applying for drive route) explain relationships between drives table and applications table authentication vs authorization code change: display student roll number and current date and time on student dashboard explain how controller and view are working during registration	overall chill proctor no need to be nervous, just know your code and which part of code connects to which functionality. he gave me good feedback.
3/31/2026 23:52:22	Anonymous	3/31/2026	Level1_149	Level1_149 *Theory* : There were lot of theory ques so I don't remember all but most of them were from this sheet 1. Demo of the app...asked me to create a student and a company and a placement drive and 2. Explain database schema and your project structure 3. Explain RESTApi and it's methods 4. Difference between sessions and cookies 5. Explain about different HTTP methods 6. Difference between authentication and authorisation 7. Explain the search functionality both frontend and backend 8. Explain your login feature both frontend and backend 9. How are you handling db migration 10. Where are session stored 11. What is stateless 12. How do you store the state of an object in flask *Code Change* Add a field "openings" in the post job section of Company also add it in the drives info table or	The proctor was very kind and patient he would let you speak but once done with the demo he would ask many questions back to back like rapid fire He will give you ample amount of time for code changes so don't worry
4/1/2026 2:26:37	Yoo_Yoo_Anirban	3/28/2026	Level1_92	in Level 1-: For 20min she just make me use my Application work flow, ORM, MVC, and some of the basic question that are in this sheet, What function i use for the data to send from Backend to Front End, How did i implemented Front end and Backend Validation, CSS vs Bootstrap, some changes like-: SHOW only the Shortlisted Students, Placed student rather than showing all, she asked me that what if a student apply twice in same post in your app (i said "mam here after appling the job, that will not be shown to student again, and EXPLAIN THE CODE), some front end Changes like Button colour changes, how the student can UPdate his CGPA and code explanation, how the Placement status changes in company dash board and how its changing in Student D How Admin is Approving , rejecting, blacklisting the Company and the Drives,. What happens a What happens with the job posting after got rejected.. these are most of the Questions	Mam is Very patient and Soft Spoken, She will give you proper time and will hear you.. Know you Code, some Changes, at the end part of the viva i messed a bit in validations questions that i have not implemented, backend validation, she said that "i saw you have implemented" then i show her the part where i have implemented that and explain..(i said "actually i am bit nervus" she said : "yeah i can understand its a Viva so its happens) So i am Saying the give Her proper respect. and Know your Code

4/1/2026 2:51:33	Yoo_Yoo_Anirban	3/31/2026	Level3_25	he will ask you to show the Official PDF of you ID card, 1) will have to show the Working of the application and all the core features and other (if you ir 2) Working of the Code, how the application is working, all the models, routes, relations ships (he may ask some question right here like "this part of you code where is working in your applic Try to Explain all the things you did here and how thats working by your self even before he asi and also explain the HtMLs in one go 3) Asks you about the relationships 4) ORM 5) MVC 6) db = sqlalchemy(app) from here he can ask what is what like which one is (7) how the Authorization and the Authentication is Working in you code, have to explain that Like the How Login Route and Register Route working 8) Change the Button Positions 9) Cell padding vs Cell Spacing 10) backref vs backpopulates 11) Client server vs Distributed server (also include whats in you project as example) 12) will ask you if you have implemented any API or not (i said i did not use api) 13) Difference between GIT and VCS 14) have implemented Hashing or not,,,, how i have implemented hasing also the library name all cover all the theory question from this sheet of viva examiner lvl3_25 Feedback - He likes the Theme of my App, and good with my Viva.. told me to "Expand around the API's that will help" and implement the Summary Chart.. also to work around the OOPs concept more	He is a Chill guy, will not interrupt you while taking, Just Know Your Code Properly, whats working for what and how, Cover as much Theory question as Possible, Know You CODE PROPERLY if you dont know the definition for that specific question, try to explain why that use and if you have implemented that in you code show that and explain work flow of that.. and you are good to go... also you can us eyour hand gestures to explain things like the padding and Spacing ..
4/1/2026 12:33:39	Hritik	3/31/2026	Level3_25	MAD 1 Level 2 Viva: Proctor: Level3_25 1. Show ID Card 2. Show Demo of the application 3. Walk-through of the code along with workflow management of each functionality 3. I did show the code with all the theory covered during the demo itself, the examiner has to in 4. What is MVC Paradigm 5. Asked about other architectural points utilised in this application 6. What is ORM, why you used it? How it works? 7. Gave feedback to study more OOPs concept and concluded the viva. It went for around 40 minutes and didn't ask any coding questions.	Be confident in your code section and cover as much theory and technical jargons during code demo to build confident repo during the viva. Prepare for code changes and coding part, thou in my he didn't asked
4/1/2026 15:59:57	Aryan Shukla	4/1/2026	Level3 11	Level 2 Viva 1)Show ID 2)Run the application 3)Checks almost all functionalities 4) Suggests Changes that will make the application better 5)ilike operation 6)Lazy evaluation 7)Standalone component 8)Authentication and Authorisation 9)cell padding and cell spacing 10)SPA 11)inline styling 12)I forgot to add he first said to explain models and database 13)and few more basic question in total around 10-12 questions. 14) After viva asks if you have any questions for him.	
4/1/2026 17:18:49		4/30/2026	Level3 13	Level2 1. Asked me to introduce myself? 2. Explain problem statement of the project. 3. Download the project and explain each functionality (I explained for about 20 minutes and he 4. he asked to add criterion in password, should be atleast 12 characters, one uppercase, one 5. Then asked theory questions like. 5.1 GET vs PUT 5.2 List vs Tuple 5.3 Cookies vs Session. 5.4 what are RestAPI's. 7. Then asked me to explain all the import statements, why have I imported that, what it is and 8. Ended the viva saying, if you have any question to ask. My viva lasted for about 45 minutes.	If you get this proctor, your viva will be very easy.
4/1/2026 17:48:56	Debanshi	3/30/2026	level1_92	Level 1Viva 1) Demonstrate app 2) What is ORM? Which ORM used and where? 3) Which function connects frontend to backend? 4) Which db used? 5) Practical: Change the colour of button to blue 6) Practical: In the All Application view window only showcase the shortlisted students 7) Frontend and backend validation- what are they and where have you used them in your app	She is patient and will nudge you in the right direction. Be calm and clear. Practise prev questions from this sheet- she tends to repeat them.
4/1/2026 20:14:56	Anonymous	4/1/2026	Level3 13	1) to show student Id 2) demo of the app 3) explain all models / er diagram 4) have done password validation? I didn't do asked to code for both frontend and backend pa 5) ask some theory questions - primary vs unique key , queue and stack , MVC and some mor 6) explain all imports	Very patient and will give you time to think. Just know your code well.
4/1/2026 20:53:11	Srishti	4/1/2026	level1_viva20	LEVEL 1 -show id, show git -asked me to download proj and run -asked to log in as admin and checked for the functionalities -further asked to register a new company, get it approved, post drives -asked to register a new student, apply for the drive then get it selected by the company and cl -explain how search is implemented -diff between GET, PUT, POST, PATCH -change bg colour of admin dashboard to black. I used bootstrap so he permitted to use bootst coding: -asked me to open notepad and write hello world route viva lasted 26 mins.	very calm and supportive!! helped me understand concepts doesn't rush and allows you to explain without interruptions

4/2/2026 0:32:40		4/1/2026	level3_11	1. show id 2. download from portal and start app 3. demostrated portal functionalities 4. Explain model.py 5. What is SPA 6. What is Lazy loading 7. What is Authentication 8. What is ilike 9. Suggested some improvements	
4/2/2026 8:40:49		3/28/2026	Level2 127	LEVEL-1 show ID download project from portal then he asked me to explain the project- didn't interrupt - let me finish explain MVC explain ORM write a jinja for loop	The proctor is very chill , doesn't ask a lot of questions , you are lucky if you get this proctor
4/2/2026 11:19:45	om	4/1/2026	level1_131	1)download the project from portal 2)explain folder structure and importance of each line 3)open db.py and explain db related questions primary key foreign key how did u ensure one t 4)open app.py and show route of student applying for drive why <> why <int : > and then scrol 5) redirect rendertemplate and url_for difference 6)get and post method and them in action in our code 7)how did u handle resume 8)how did u handle one student can apply for drive only once 9)write a sql query for inserting values into table 10)how did u get role into line xxx like she told to scroll app.py and then was randomly asking questions but if we struggle a bit she would help 11)make a viva.txt write a html and app.py code where a form is shown / name is shown and then if he submits name should be shown i wrote basic version and then with her guidance completed the code added jinja loops as her s 12)asked about written code then 13)and then discussed about how did u learn and what do u do aside this degree etc etc	mam is too supportive and wherever you feel struck dont lie or jargon tell straight related to what u know related to that and then she would help by providing hints and then u need to explain then
4/2/2026 11:23:03	om	3/29/2026	leve1_92	level 1 viva Repo and collaborator Id check 2 device meet join Helps you wherever you are stuck And she is patient as well If any error comes we can tell let me fix this She would be like ok Told to show some functionalities like registration search drive apply once And then told to change button color and then told to show only approved students in applicant And then asked about showing front end and backend validation in code show like and explain Then 5 methods get put post dlt patch And then show where only get was used	Good proctor
4/2/2026 12:26:55	Aarushi	4/2/2026	level1_131	Project code and folder overview Write new codes like fetch id from application and endpoint home that takes input form the form That match the column question redirect render template and url_for() Explain debug=True And basic to moderate questions	She is calm not loud and guide you at the end of your viva...She made me wear my ear buds because of echo
4/2/2026 13:50:17	Omi	4/2/2026	Level1_132 (level 2 viva) mad1	Mad 1 viva 2 id: level1_132 He asked about each folder and it's purpose. Asked How database is defined. Asked to showcase project Asked " ORM vs raw SQL " why use orm? Asked to show session cookies in inspect tool (inspect > application > cookies storage > sessi Asked why u can't use admin role and other role in same browser window Asked to write a query to fetch all used them list then in jinja2 all in notepad (i fumbled) Also asked to write another query I forgot I was confident in my explanation he did say u are wrong (simply) and proceeded to another c He was strict not giving any hints at all. Gave Feedback at end " you lack coding knowledge" Improve upon it or u not be able to do mad 2 " This meet is ended " " I may have missed some questions I might pass with minimum marks I explained all theory and wrote some code (jinja , orm query)	Basically understand your codebase to the bit. Learn to communicate and explain well.
4/2/2026 16:52:40	Ramyaprabha	4/1/2026	Level3_11	MAD 2 Project demo like Lazy Single page application Authentication	Know your code well

Fill this sheet using this form https://forms.gle/769WTWE2NE2dPGx7A

Timestamp	Your Name (if you want, y	Viva Date	Viva Proctor ID (the id which was sent to you in	Questions asked by the Viva examiner (Write in points)	Any suggestions/tips to fellow students for this examiner?
4/2/2026 17:54:09		4/1/2026	Level3 25	Level 2 Viva 1. Asked me to show id card and download the project from the viva portal. 2. Give a demonstration of the app, including all features you have implemented. 3. Explain the backend code. 4. Stopped in between to ask questions. 5. Theory Questions: - relationships, what all have you used and where? - MVC - what is ORM? where have you used it? - VCS vs GIT - back_ref vs back_populates - Client server vs distributed architecture. which one have you used? - have you used apis? I had not, so didn't ask any questions - what is @app.route() ? what does it do? - GET vs POST - explain the code about how the company can shortlist, select or reject student applicatior - some other questions based on my code 6. Coding question: change the login link to top right of the screen Viva took about 40 minutes.	Examiner come 18 minutes late. All questions I was asked were from this sheet only. Examiner was patient. Know your code and should be able to explain it well. Go through previous questions of this examiner from this sheet. At the end, suggested me to work on apis and oop concepts.
4/2/2026 21:50:51	Pablo Escobar	4/2/2026	Level3 13	Level3 13....nice proctor but very less attentive....after starting demo he may leave meeting and join after 10 minutes...then you perform whatever you want...can ask you for basic routes...some basic questions(see in gsheet it's repeated)....	
4/2/2026 23:06:15	SK	3/25/2026	VIVA2_Level3_12 time (9:30am-10:20am)	(VIVA-2) sare jo sheet me 2023 se hai ditto whi puche 1-2 to yaad bhi nhi sir ki voice kabhi kabhi low thi ask my name, rollnumber then soft copy of my ID then intro, which i gave about me with projtog MVC ?show mn in your proj codes models, view, controller GIT and its use GET vs POST Can we send data to get ? Is it possible Check functionality few only Explain models ORM and which orm are you using and after my answers he double checked are you sure ? Explain any specific route Or check my 1-2 html files admin_dashboard, login Template enheritace ?? Are you using it show me where and also where other html files inheriti Which code is used to create table How html connected to routes Http vs https and how https is more secure Which symbols are used for id and class in css. DOM did you know ?? Git is centralised or distributed?? What is distributed means here ?? name types of css and precedence did you know 2 layer and 3 layer what is stateless after my answer he asked what we do to handle this what we can use my ans Code change last me add pincode in drive like location also give hint similar like location add ir Hope I added all questions....bs 1-2 yaad nhi lekin wo the isi sheet se hi	his all questions from sheet .....ditto same he was like mai jo puchta hu sare puch hi lunga not like rapid fire..... i went his all question in this sheet from 2023.....jisne bhi ye shhet create kiya hai usko mera big big thank you Best of Luck
4/2/2026 23:41:18		4/2/2026	Level3_45	- Lazy= True vs dynamic - cascade - RBAC and show me in your code - Create a button only visible to students if salary greater than 1Lpa - Create a route which take input of user name from url and display it { used request. args} - Add a radio button for gender in student registration - convert job role text into link which shows drive details when clicked { in students dashboard - Authorization & Authentication - Z-index , html form tag for checkboxes - How will you centre a div -db.commit vs db.flush	She's a good proctor try to give correct answer in starting then she'll stay calm... She's mostly in rapid fire mode will not let you breathe much...code question will be easy, prepare theory well.
4/3/2026 0:18:13	Debanshi	4/2/2026	level3_12	Level 2 1) DOM 2) GET vs POST 3) Which database used? Code to create db in your file 4) What is used for template inheritance- Jinja 5) Types of Servers 6) Sessions and cookies 7) HTTPS and HTTP 8) GIT- advantages 9) VCS 10) MVC 11) Id and name in HTML difference and side they are-client or server 12) What happens when you click submit button- explain using your code file 13) Explain all the Models in detail 14) Add a new field pincode in your form. (You will have to first add it in model, route and then t 15) Add a new field in your table 16) Rest there were a few more questions that came up while demonstrating my code.	Really chill guy, it will go smoothly if you don't argue with him and listen to his advice. Prepare the questions present in this sheet, he will repeat them. If you end up stuck during the viva, he will help out
